RE: Docket #98N-1038 "Irradiation ... and Handling of Food."

Dear Commissioner:

Please ensure that irradiated food is clearly labeled. This is vitally important to me because I consider food to be my medicine. I try to practice "preventive medicine" by my lifestyle choices, including a balanced and healthy diet. Small symbols, altering the meaning of words now used to mean irradiation or other ambiguous terms are not helpful. My Co-op now supplies magnifying glasses to help us read these labels that are written so small. Please Strengthen us and our ability in this regard. Why wouldn't you? Respectfully,

Susan Quinn
