7-21-99

Dear Sirs:

It has been brought to my attention that through the drafted Section 503A of the FDA Modernization Act of 1997 that the MOU, as written, severly limits the practice and interstate distribution of compounded drugs. If this MOU is approved my medical doctor, Dr. Leigenberg here in Indiana would not be able to prescribe a compounded drug that I need on a monthly basis. I've used this compound for over three years and it helps me greatly! I want you to know that I strongly disapprove of the MOU as currently drafted! Thank you! Susan [illegible]
