to whom it may concern; Docket No. 99D-0557

In April the FDA acknowledges the dangers of using non-human primates as donors in xenotransplants. How ever the FDA does not rule out species like pigs in-xenotransplants. The risks of viral transm-issions are greater than is being acknowledged. We are against <u>any</u> xenotransplants or-research on <u>any</u> <u>animals</u> regardless of species. Responsible health authorities should ban <u>all</u> xenotransplants outright-because of the threat of inter-species virus transmission.
