July 17, 1999

Dear Sir,

You may have the right to your genetic engineering foods, but we should also have the right not to have them. We want organic foods free of G.E. We want our soil + waters unpolluted. We want Holistic Drs. as well as mainstream Drs. We do not need BST in cows.

If this is a true Democracy then give us this choice.

I am opposed to genetic engineering of our foods.

Healthfully,
Mary H. Miller
