Re: Docket # 98N-1265

In its present form this MOU as well as the Compounding Section 303 of the Modernization Act, restricts the rights of physicians + patients to obtain healthcare products from the provider of their choice and infringes on the rights of compounding pharmacists to serve the public.

I am currently using a compounded prescription for estrogen prescribed by my physical (M.D.) who advises me on my nutritional concern and this estrogen compound also has the approval of my H.M.O. physician (M.D.) I like being able to select pharmaceutical products use natural ingredients as much as possible rather than the patented synthetics of the pharmaceutical corporations.

I believe this registration as presented in MOU, in its present form, should be redrafted.

Sincerely.
A frustrated consumer distrubed at the way "big bucks", ~~of~~ representing corporate interests, can limit my choices of making informed decisions!!
