Docket # (99D0557)

To Whom It May Concern:

I am writing to tell you how very much I am against ANY Xeno-transplant research. You people never cease to amaze me. There are so many safer and more humane ways to research this but you are bound and determined to torture animals and subject the human animal to all kinds of God only knows what kind of inter-species virus transmissions. Pig viruses are just as dangerous as primate viruses. Have you never heard of AIDS?????

If you want to do something good for mankind, put the money you are going to waste into promoting more aggressively preventive medicine and increasing human organ donation rates.

Respectfully,

99D-0557 C.234
