To Jane Henney M.D.,
Commissioner of U.S.FDA

I would like Genetically Modified Organisms (GMO) to be ~~labeled~~ ~~[illegible]~~ labeled. It is unfair to the ~~comm~~ consumer when GMO food is not labeled. The long term effects of GMO foods are not known, and the consumer must know what he is buying in the store. Genetically Engineered foods are ~~polluting~~ polluting the food supply. Monsanto will not take responsibility if there there are bad effects from GMO foods.

Yours truly, Paul Mikhailofsky
