Docket # 99P0485 Aug. 19, 1999
Regarding the use
of antibiotics

?204 '99 AUG 24 A10:20

To Whom it may concern:

As someone who has concerned herself for years with the issues of food, health and soils and the interconnections of all these issues, I strongly request that all antibiotics in animal feed be banned — this for the sake of the animals as well as the future of human health.

It has been demonstrated over and over again, that animals that are range fed, and stabled in healthy, clean environments do not need anti-bidics.

Please address this issue at the earliest possible moment.

With thanks for your sincere consideration
Sheila Brown

A reply would be appreciated.
