To Whom It May Concern:

I strongly oppose the Draft Memorandum which has been proposed by the FDA. I am strongly against any restriction on the availability and the right to obtain medically necessary compounded medications by limiting the number of prescriptions that can be shipped across state lines by the specialized compounding pharmacies.

We have a right, as individuals, to have a choice as to where and how we choose to manage our health. Our current health care system is severely lacking in quality preventive care options as well as medications that are tailored for individual needs.

As a health care practitioner, again, I strongly oppose any restriction on medically necessary compounded medications.

Marie Elena Scioscia, MS, RD, C
