I firmly Believe that ~~RBGH~~ is not necessary. Our cows do not need drugs. RBGH is Bad for our cows & Bad for family farmers. Farmers are important to Vermonts ~~[illegible]~~ economy.

I believe that if this must continue that we the people have the choice to purchase RBGH products, OR NOT! If 94% of consumers want RBGH labeling, then why is it not be done?

What is being done about the stop of production of Clorine-bleached paper? Why should industries continue producing a product that results in also producing a chemical that is toxic to the human race? There are alternative!! They should be done!!
