I recently read the article "Frankenstein Food" in the Sept. issue of Marie Claire Magazine. I am writing because I am appalled that the U.S. Consumers have no choice in the matter of consuming gene-modified foods. I would like to know what I can do to support the movement against GM food! I also oppose growth hormone beef & dairy products, as well as poultry. I believe we should have a choice in this matter as well. I recently moved from Norwich, VT where a choice is available — I shopped the Hanover, NH Co-op. But, I now live in an area where finding these type products (non-growth hormone meat & dairy and organic produce) is hard! Could you direct me to information or an organization that can clue me in on where to shop in my area? Also, what can I do to support the movements?

Thanks! — Leslyn M. Dorris
