7/6/99

Dear Dr. Henney

It is time for the FDA to act in accordance with the constitutions' guarantee of free speech and to protect the consumer public (rather than the drug industry). Approve claims filed for saw palmetto re symptoms of benign prostatic hypoplasia, psyllium husk seeds, re risk of heart disease; and folic acid, vitamin B6 and Vitamin B12, & vitamin E re cardiovascular disease!

Sincerely,

Marianne A. Crocker
