Jane Henney, M.D.
Commissioner

Food + Drug Ad.
Rockville, Md. 20857

Dear Dr. Henney,
We are very much in favor of the FDA very promptly approving claims filed for Saw Palmetto and the symptoms of benign prostatic hyperplasia; psyllium husk seeds + the risk of heart disease; folic acid, vitamin B6 and vitamin B12 and cardiovascular disease.
Please try to get this approved as quickly as possible!

Sincerely,
Valere + Larry Althouse
