Hello, Jane Henney,

I wish to communicate to you my intense distress that the F.D.A. censors health informations.. labels... on supplimental products for sale in our country.

I would have liked to have known about the choice of Vitamin E, folic acid, vitamins B6 & B12, etc. toward prolonging my husbands' life (before he died of cardiovascular disease), as well as psyllium husk seeds as a possibility of lowering his cholesterol.

I'll always wonder if our friend who expired from prostrate cancer might have been assisted had he known saw palmetto could have helped him improve in the early stages.

It is wrong to suppress nutritional supplement information! Please support allowing citizens their right to be informed and then choose their action!

Sincerely,
Dixie Clark
