Sept. 1, 1999

1465 '99 SEP -8 AM 10:13

As a consumer and a parent I am outraged by the farming practices involved in our nation. Of particular interest this month is the use of antibiotics used to treat human disease that are over-fed to our poultry, cattle and pigs - all under the banner of "the bottom line"!

This is leading to strains of antibiotic resistant disease in our children.

99P-0485 C1603

We must take our heads out of the sand and address it now!

Sincerely,
Suzanne Smith
