To whom It may Concern:

I have long been concerned about the overuse of antibiotics, and I wish to urge the FDA ~~in the strongest~~ possible terms to ban antibiotics on livestock if they are used in human medicine. I stress that I speak only of animals used to feed humans by meat or dairy consumption, NOT house pets! Our bodies need to be able to respond to antibiotics when we really need them. Don't make us immune! Sincerely,

Susan [illegible]
