Dear Sir, 7-27-99

I am writing in regards to a serious on-going problem that you people are dragging your feet over. There is a petition, docket # 98P-0151/CP1, and I strongly urge you to move on this and classify meat from downed animals as adulterated!

'99 SEP 22 A11:17

The people in the meat industry are so greedy & without conscience that it disgusts me. And you people in the government are no better. Why don't you put a legal stop to all this waste and suffering of animal life. They can & do feel pain, or don't you care? You probably don't even have a conscience either. For this problem to be allowed to continue, I'm thinking that you people are either really stupid or get paid very well to protect the slaughterhouses. But I'm hoping you are instead an intelligent person who will not delay in doing what is right.
