Dr. Michael Friedman, Commissioner

Downed Animals are Animals that are too sick or injured to walk. These Animals are treated as a nuisance & are usually allowed to suffer for Hours or Days without receiving their basic needs such as Food & Water. They are denied necessary Veterinary Care & many Die of Gross Neglect. Downed Animals are finally moved only when it is convenient to take them to the Slaughter. These helpless Animals are Cruelly dragged by Chains Attached to one of there hind legs or are showed with fork lifts. Young Calves are often

carried by their ears or dragged by one hind leg. They are kicked & prodded with electric prods!

I urge you to help!
