To whom it may concern,

The FDA needs to do more about regulating egg refrigeration temperatures and do more than just put Bacteria lables on egg cartons.

The FDA also can stop forced molting which can be harmful to human health

It is also a primary cause of infectious diseases in hens, eggs

FDA should prohibit forced molting because it has been scientifically shown to promote disease by destroying the starving hens immune system

Forced Molting is cruel. Starving any animal for profit is inhumane.

FDA was petitioned in April 1998 to ban forced Molting. This petition should be granted!

Thank you,

Jean Chadwick
