Docket # 99P0485

I am writing to comment on the use of antibiotics in livestock feed if that antibiotic is to be used in human medicine.

2095 '99 SEP -9 A11:06

It has been shown that the routine use of human antibiotics in livestock diminishes the drug's ability to cure infections in people. Do not allow these antibiotics to be used in livestock feed.

Thank you for reading my comments.
