RE: Use of human antibiotic medicines in livestock feed. Document # 99P-048

Dear Commissioner Henney,

This FAX is to urge you to prohibit the use of antibiotics in animal feed if those antibiotics are to be used as a human medicine. The lowering of the antibiotic's potential to fight disease in humans is a dangerous and scary trend. Using antibiotics to promote factory farming and endanger human health is a bad idea.

Please act to prohibit the use of human antibiotics in animal feed.

Thank you. Sincerely,

Tim Krause
