To The FDA,

It has come to my Attention recently that the contamination "Bacteria Warning labels" shouldn't need to be placed on egg cartons, since actually it CAN be prevented! If you would only stop the practice of Forced Molting. (which is proven to promote disease by destroying a starving hens immune system)

"You", as the FDA, have the jurisdiction to ban these totally unacceptable Farm practices that harm human health. The Forced Molting of Laying hens must be stopped because it is the primary cause of infectious diseases in hens, eggs, and the consumers of eggs (all of us!) The cruelty that these animals endure is very wrong. As long as this practice continues so will the contamination to humans & hens! Lets STOP IT NOW!

Sincerely,
Tammy Plover
