

FINDING OF NO SIGNIFICANT IMPACT
FOR

Food Additive Petition 4M4407, originally submitted by Analytical Systems Engineering Corp, and subsequently transferred to R.F. Reiter and Associates, to amend the food additive regulations to provide for the safe use of a machine source of high energy X-rays to inspect cargo containers that may contain food.

The Chemistry and Environmental Review Team has determined that the approval of this petition will not significantly affect the quality of the human environment and therefore will not require the preparation of an environmental impact statement. This finding is based on information submitted by the petitioner in an environmental assessment prepared using the format described in previous 21 *CFR* 25.31a(b)(2).
