Commissioner Henney:

The consumption of added sugar has jumped 25 percent since 1984, squeezing healthy foods out of the diet. As a member of the Center for Science in the Public Interest (CSPI), I urge the F.D.A. to establish a "Daily Reference Value" for added sugar of 40 grams and to require labels to disclose how much added sugar a food actually contains. Please take this suggestion into serious consideration.

A Sincerely Concerned Citizen,
Mrs. Barbara T. Bingham
