DATE 8/7/99

Dear Mam,

I [illegible] to protest the way the FDA conducts the institution. Nutritional supplement manufactures should be able to print nutritional information on product labels. I am in favor of the FDA quick approval of claims for vitamin E and the risk of cardiovascular disease, along with folic acid, vitamin B6 and vitamin B12. Psyllium husk seeds and the risk of heart disease. Claims filed for saw palmetto and the symptoms of benign prostatic hyperplasia. The past wrong doing will have to be reckoned with Gods laws. Please discontinue the old regime of censorship of the nutritional supplement industry.

Sincerely,

John A. Elibourn
