Aug 26, 1999

Dear Commissioner:

Please use your authority to prevent antibiotics which are used in human medicine to be used in animal feed.

I feel we over use antibiotics already, making them less effective in the long run.

Also, it would / could be dangerous to be combining medicines and/or not knowing how much any one person

is receiving. The private individual does not keep track of additives in their food - Nor do doctors.

This is an important issue. Thanks for hearing me out -

Sincerely,
Gloria Banach
