Jane Henney,

I am writing to urge your support for the ban of antibiotics as livestock growth promoters.

1914 '99 SEP 22 A10:58

Using antibiotics as a feed aditive to fatten livestock more quickly is making disease-causing bacteria more resistant to the drugs we rely on to treat life threatening diseases. This action would be an important step in protecting the effectiveness of drugs used to prevent these diseases, and stop industrial type livestock production.

Thanks
