23 August 1999

Dear Ms Henney:

We urge you to take swift action regarding the use of human antibiotics in poultry, cattle, and pigs to counteract the effects of their unhealthy living conditions and hygiene. The effects of over-use and abuse of antibiotics are clear now. Bacteria are growing stronger and antibiotics' effectiveness is diminishing. Please consider legislation or regulation which would promote responsible use of medicines and well as healthy living conditions for the animals.

Sincerely,
Marija Sanderling + Robert Michels
