Subject: Engineered foods

Dear Ms Henney -

It is imperative - manufacturers of Engineered Foods label their products. Adequate testing has not been done to date - determining the long range effects of such a program. We must think not only of our own well-being including yours - but more important, that of our future children's generations.

So - I urge & beg you to promote the labeling of all Engineered foods -

Thanking you for your attention, I am

Sincerely,

Mrs Robert C. Stevens
