Dear Dr. Friedman & Commissioner:

Living across from a farm which had the pesticide sprayer out every day, I switched to organic.

Now this is being contaminated with genetically engineered foods. I'm very much against this and hope you will push for labels of (g.e.) foods, so allergic people can choose items and keep medical costs down.

Also, please support the Nat'l. Organic Std. Bds. recommendations to not allow (g.e.) organisms from organic production.

Gratefully,

Carole Guhl
