Dear Mrs Henney,

I wish to protest genetically modified or altered foods.

I spend most of my food shopping seeking pure, organically produced fruits and vegetables with no additives or preservatives. I don't eat red meat or veal. If I can obtain free roam "healthy" chickens I don't eat them at all.

The very idea that the government is

participation in adulterating the food supply any further that it already is — is frightening.

I see no necessity for GM foods!!

Sincerely
