Dear Dr. Mike,

i'm writing because you have a lot of authority in the FDA, and i'm concerned about food warning labels.

6568 '99 SEP 29 P1:37

genetically engineered foods really worry me! please work to have food specially labelled to notify consumers if it contains genetically engineered ingredients. i'm sure you're aware of the plethora of reasons to be opposed to genetic engineering of food.

please take this into consideration.

your friend,
