Dear Mr. Friedman,

Please require labelling of genetically engineered foods. It is obscene that a large portion of the American population is opposed to genetic engineering but have no means of eliminating GE foods from their shopping carts. The issue here is not whether genetic engineering is safe (which I believe is a lie), but about peoples' right to know what they are consuming and to be able to eliminate items they believe are morally or environmentally corrupted. Thanks for your time.

Awaiting your response,
Holly Poole Kavana
