[illegible]

[illegible] Food and Drug Administration [illegible] been advised by its [illegible] Surgeon [illegible] human clinical [illegible] tion.

[illegible] will needlessly [illegible] possibly [illegible] limited trials, [illegible] result if a virus [illegible] to a human. [illegible] worldwide [illegible] today. It's [illegible] pig [illegible] disease [illegible] is the potential [illegible] retroviruses to [illegible]

[illegible] even limited human clinical trials affects the [illegible] dangerous ways, [illegible] the public has [illegible] ment decisions regarding [illegible] transplantation. You [illegible] begin educating the public in the government's [illegible] transplantation, and you must allow public input in the "informed consent" decision.

Even more important, please stop human clinical trials now - before it's [illegible]

Sincerely,

Keith H Valva
