Dear Ms. Henney:

Re: Alliance for Biointegrity vs. Shalala
Docket Number 99-1300 (CKK)

I strongly support the lawsuit asking for stronger safety testing and mandatory labelling of all genetically engineered foods. I object to the secretiveness of using genetically engineered foods without our being aware of their presence. Other countries label biotech foods and so should we! And this should be done honestly as well.

I believe that American citizens have the right to know what is in their food. I hope you agree.

Sincerely,
M. Ruth Niswander
