I am concerned about the foods I eat. Recently it has come to my attention that many items in my present diet are genetically altered. I would like to see testing of these genetically altered foods and labeling of them so that I can avoid eating them. I understand there is presently something called Alliance for Bio-Integrity vs. Shalala, Docket # 98-1300 (RK) Lawsuit. I WANT to see genetically Altered Foods labeled AS SUCH in the grocery store.

Thanks for your attention.
