Vancouver Wa.
Nov. 11, 1999

Dear Dr. Jane Henney:

Thank you for all the good things you have done in the FDA. I know it is a sometimes difficult job.

I am in favor of the FDA promptly approving claims filed for Saw Palmetto and the symptoms of benign prostatic hyperplasia; Psyllium husk seeds and the risk of heart disease; folic acid, Vitamin B6 and Vitamin B12 and cardiovascular disease; and Vitamin E and the risk of cardiovascular disease.

Dr. Reginald Cherry of Houston, Texas, Dr. Julian Kitabey M.D and others have seen many patients recover by using Saw Palmetto.

I was in Nursing 28 years and take 24 capsules and pills from herbs after breakfast, 3 p lunch and 20 p supper. My doctor tells me my heart, lungs, liver, blood vessels and other organs are in good shape and am 79.

This is important as well as other alternative medicine to me and many others, too.

Thank you

Sincerely,
Billie Wright

P.S. Do not have a pain in my body anywhere.
