Dear Jane E. Henney, M.D.

1376 '99 DEC -9 3:54

I am writing out of concern about the disruptive effect genetic engineering may have on our environment and whether long-term human health issues have been thoroughly addressed.

There must be mandatory labeling of foods with genetically modified ingredients so that we, the consumers have the right to choose between genetically engineered and non-genetically engineered products.

Until that time, I am forced to buy only organic, or Whole Foods or 365 brand products.

Sincerely,

Jean Caizzo
