1 Dec. 99

Dear Mr. Friedman, DEC -9 1999

My family is violently opposed to genetic engineering of our food supply.

We want these foods clearly labeled.

I'm going to ask our local markets to post signs over fresh corn, etc., stating that it has been altered.

June Moran

P.S. If this doesn't happen - I'm going to search for food imported from countries that do not ~~do this~~ genetically alter food.
