Dear Secretary Shalala

8177 '99 DEC 14 P1:46

I am concerned about irradiated and genetically engineered food products. I feel that as a consumer I have a right to know the foods that are so treated and that I should be given a choice as to whether or not to use them.

Irradiated and genetically engineered foods must be identified and therefore request that you take the appropriate action to give the consumer free choice.

Thanking you in advance for your consideration, I am

Respectfully yours,
Otto Gartmann
