Dec. 6, 1999

Dear Secretary Shalala,

'99 DEC 14 P1:45

I am concerned about the possible weakening of labeling requirements for irradiated food, being considered by the F.D.A. I believe that I should know what is going into my food, since there are plenty of chemicals in edibles — as of today. We are being deluged by chemicals!

I insist on truthful, visible, labels on food packages.

Yours truly,
(Mrs.) Trudie Laster

98N-1038
