1555 North Main St.
Frankfort, IN 46041
Dec 3. 1999

Dear Secretary Shalala:

Labeling requirements for irradiated food should not be weakened. Radioactive isotopes when exposed to food changes them. Disclosure on a prominent place on the package, and food not packaged should be accompanied by a poster in plain view where it is displayed for sale.

Only clear, honest and permanent labeling is acceptable for irradiated food.

Please demand the consumer's right to know this important decision-making process.

Sincerely yours, Rev Lester H Bill Jane E. Bill
