Secretary, U.S. Department of Heath
and Human Services

Donna Shalala

Dear Ms. Shalala,

My husband and I would like to voice our concern on the Irradiation of our foods and the changing of the genetic makeup.

We are very, very opposed to Both of these. We want the conditions cleaned up that cause the harmful bacteria and pathogens, without these two procedures, and we want our foods labeled if it has been changed.

The food industry has to much control over the American people.

Other countries have stopped these procedures and we should also.

We think you have done a wonderful job since you've been in charge and we hope our letter can make a difference.
