Dear Madam Secretary,

I am writing because of my great concern regarding proposed Federal funding of stem-cell research. Stem cell research involves human embryos. The thought of this brings back memories of Nazi experimentation during World War II.

The argument that much medical good can come from such research does not override the fact that a wrong cannot be done to produce a right.

C4927

Because it is possible, it should therefore be done? No. Please work to prevent this federal funding. Thank you.

A concerned citizen,
Mrs. Carole K. Bickimer
