Dear Sirs,

8216 '99 AUG 26 A9:50

In regard to how to make the food supply safer, raising animals in factories is the biggest cause of salmonella, e.coli, and resistant bacteria.

Healthier animals make for safer meat and milk and eggs.

Humane treatment of animals is the most important step in making food safe.

(Docket 97N-0074)

thank you,

Donna Matthews
