TO: FDA Commissioner

Whereas... there are 3 million unintended pregnancies in this country every year, and EC has the potential to cut this number in HALF, eliminating the need for as many as 800,000 abortions each year.

Whereas... Right now, in 47 states in the nation, a woman must first obtain a doctor's prescription to use EC– a requirement that can delay use of the pills, possibly resulting in a preventable unwanted pregnancy.

Whereas ... millions of women in Great Britain, New Zealand, and Canada and in California, Oregon and Washington, have ready access to EC over-the-counter.

Therefore... I want you to know that you have my full support and encouragement to approve over-the-counter access to EC for all American women.

Sincerely,

Name Franny Baldwin Berrillo
