RE: Docket # 00P-1211/CP1
Date: 5-31-00

I am writing in support of Docket #00P-1211/CP1. I do not want to eat genetically-engineered foods, but at present can't even know if I am, since they typically aren't labeled as such. To achieve uniform labeling of these products, there needs to be adequate testing of them to identify the side-effects & long-term dangers to us and the environment. It is our right to be able to choose what we eat or don't eat!

Stop us from being the corporate food producers' guinea pigs.
