I Just found out about the hearing or meeting in Maryland on June 14 an 15 of 2001. Please think of the profound impact on people like me if this pain medicine is took off the market. I Am in Chronic Pain everyday of my life this is 24 hours a day. I Know it might be to late to contact you on this matter at this late date. When people like me find a pain medicine that works and don't hurt my Liver Please think of all the good it is doing for Chronic pain patients. I Am very sorry if there is or might be some abuse potential of this medicine. Please think of all the good it is doing for Chronic pain patients that it helps. So many of the medication I have take over the years have hurt me realy bad. This was a great and the best pain medicine with least side effects. I think it is wrong to make us go back to bad unbarible Pain because of it might be abused by a few. I have been in Pain for over 30 years I Know what Pain [redacted] control is. Now Please don't take Oxycontin away from the People who need Pain Control. It works very well.
