VOLUME 2

GRAS MONOGRAPH SERIES

GLUTAMATES

BIBLIOGRAPHY

prepared for

THE FOOD AND DRUG ADMINISTRATION
DEPARTMENT OF HEALTH, EDUCATION
AND WELFARE

APRIL 30, 1973

prepared by

Tracor Jitco, Inc.

1 A. E. Staley Mfg. Co., Decatur, Ill. 1932
Herstellung von Glutaminsaure
A. P. 1,992,804 issued July 9, 1932

2 Aaron, Kurt. 1934
Untersuchungen uber die fermentativen fahigkeiten und uber das anaerobe wachstum des paratyphus-B-bacillus
Biochem. Z. 268:121-151

3 Ababei, L. 1960
Uber eine erythrocyten-glutaminase; ihr verhalten bei der reifung der roten blutzellen
Acta Biol. Med. German. (Berlin) 5:630-635

4 Ababei, L., and S. Rapoport. 1960
Influence of glutamine, glutamic acid, and alpha-ketoglutaric acid on the oxygen uptake and ammonia formation of rabbit reticulocytes
Acta Biol. Med. Ger. 5:636-643

5 Ababei, L., S.R. Sarkar, and S. Rapoport. 1962
Desaminierung als Wirkungsort der Glucose-Hemmung der Atmung von Reticulocyten
Acta Biol. Med. Ger. 8:266-273

6 Abadie, Fernande. 1967
Use by yeasts of some amino acids as a nitrogen source and as a nitrogen and carbon source
Ann. Inst. Pasteur 113(1):81-95

7 Abbott, Bernard C., Fred Lang, and Itzchak Parnas. 1969
Physiological properties of the heart and cardiac ganglion of Limulus polyphemus
Comp. Biochem. Physiol. 28(1):149-158

8 Abbott, W.E. 1957
Effect of intravenously administered fat on body weight and nitrogen balance in surgical patients
Metabolism 6(6 Pt. II):691-702

9 Abdel-Akher, M., Moustafa Loutfy, and Ahmed Ibrahim. 1966
Preparation of the cola coloring substances
Staerke 18(8):243-248

10 Abderhalden, Emil. 1923
Weitere Beitrage sur Kenntnis von organischen Nahrungsstoffen mit spezifischer Wirkung
Arch. Physiol. 201:416-431

11 Abderhalden, Emil. 1936
Eiweiss von Seefischen als Nahrungsmittel. Ein Beitrag zur Losnung der Frage der Deckung des Eiweissbedarfs im Inland
Dtsch. Fisch.-Rdsch. 1936:193-194

12 Abderhalden, Emil. 1942
Prufung auf das vorkommen von d-glutaminsaure in eiweiss von malignen tumoren und von normalen organen
Hoppe-Seyler's Z. Physiol. Chem. 275(3/5):135-154

13 Abderhalden, Emil. 1942
The optical behavior of the glutamic acid from the proteins of carcinoma and its metastasis and tissue of origin
Berichte 75B:1800-1802

14 Abderhalden, Emil. 1945
Isolation of amino acids from the incubation fluid of placenta and protective proteinases of pregnant urine
Fermentforsch. 17:573-576

15 Abderhalden, Emil, and Ernst Gellhorn. 1924
Weiterer Beitrag zur Kenntnis der Wirkungssteigerung von Adrenalin durch Aminosauren
Pflugers Arch. Physiol. 206:154-161

16 Abderhalden, Emil, and Ernst Komm. No date given
Weitere Studien uber den stufenweisen Abbau von Eiweiss stoffen. Partielle Hydrolyse von Keratin
Z. Physiol. Ch. 132:1-11

17 Abderhalden, Emil, and Ernst Wertheimer. 1921
Weitere Beitrage zur Kenntnis von organischen Nahrungsstoffen mit spezifischer Wirkung
Arch. Physiol. 191:258-277

18 Abderhalden, Emil, and Horst Hanson. 1937
The behavior of racemic amino acids in the animal organism
Fermentforschung 15:274-284

19 Abderhalden, Emil, and Oskar Bohm. 1940
Uber die Bildung von alpha-Aminobuttersaure bein Erwarmen von l-Glutaminsaure mit Natronlauge
Hopper-Seyler's Z. Physiol. Chem. 266(1/3):41-42

20 Abderhalden, Rudolf. 1937
Vergteichende Versuche uber das Verhalten von Pepsin-Salzsaure bzw. Magensaft, Trypsin und Erepsin und den Einfluss des entsprechenden pH-Bereiches ohne Fermentzusatz gegenuber Pyrrolidoncarbonsaure und Pyrrolidoncarbonsaureamid
Fermentforschg. 15:352-359

21 Abe, S., and S. Kinoshita. 1964
The guanine-cytosine content in DNA of glutamic acid producing bacteria (for taxonomy)
Conference on the taxonomy of bacteria, Brno, Czechoslovakia, 8-9 October, 1964 458:505-506

22 Abe, Sadataro. 1952
Metabolism of Hemophilus pertussis. I. Dehydrogenase system
J. Bacteriol. (Japan) 7:67-70

23 Abe, Sadataro. 1952
Metabolism of Hemophilus pertussis. II. The metabolic mode
Jap. J. Bact. 7:81-84

24 Abe, Shigeo, Ken-Ichiro Takayama, and Shukuo Kinoshita. 1967
Taxonomical studies on glutamic acid producing bacteria
J. Gen. Appl. Microbiol. 13(3):279-301

25 Abe, Teitaro. 1953
Metabolism of Hemophilus pertussis. I. The metabolic cycle
J. Exp. Med. (Japan) 23:197-203

26 Abelson, P. H., E. T. Bolton, R. Britten, D. B. Cowie, and R. B. Roberts. 1953
Synthesis of the aspartic and glutamic families of amino acids in Escherichia coli
Proc. Natl. Acad. Sci. U.S. 39:1020-1026

27 Abelson, Philip H. 1954
Amino acid biosynthesis in Escherichia coli: isotopic competition with C14-glucose
J. Biol. Chem. 206:335-343

28 Abelson, Philip H., and Henry J. Vogel. 1955
Amino acid biosynthesis in Torulopsis utilis and Neurospora crassa
J. Biol. Chem. 213:355-364

29 Abelson, Philip H., Ellis T. Bolton, and Elaine Aldous. 1952
Nutzbarmachung von kohlendioxyd in der proteinsyntnese bei escherichia coli
J. Biol. Chem. 198:173-178

30 Abelson, Philip H., Ellis T. Bolton, and Elaine Aldous. 1952
Utilization of carbon dioxide in the synthesis of proteins by Escherichia coli.
J. Biol. Chem. 198:165-172

31 Abeya, O.A. 1954
Protein hydrolyzates in pediatric therapeutics
Semana Med. (Buenos Aires) II:773-776

* 32 Abraham, R., W. Daugherty, L. Golberg, and P. Coulston. 1971
The response of the hypothalamus to high doses of monosodium glutamate in mice and monkeys
Exp. Mol. Path. 15:43-60

33 Abraham, S., I. L. Chaikoff, and P. Cady. 1961
Comparison of glucose utilization by mouse liver and by transplantable hepatocarcinoma C954
Cancer Res. 21:938-948

34 Abraham, S., J. Madsen, and I.L. Chaikoff. 1964
The influence of glucose on amino acid carbon incorporation into proteins, fatty acids, and carbon dioxide by lactating rat mammary gland slices
J. Biol. Chem. 239(3):855-864

35 Abramova, Zh. I. 1964
Specific prophylaxis of certain professional intoxications
Materialy Nauch. Sessii, Posvyashch. 40-letiyu Gos. Nauch.-Issled. Inst. Gigieny Truda Profzabol., Leningrad, Sb. 1964:102-105

36 Abrams, Adolph, and Henry Borsook. 1952
The conversion of L-histidine to glutamic acid by liver enzymes
J. Biol. Chem. 198(1):205-214

37 Abrams, Richard, and Marian Bentley. 1955
Transformation of inosinic acid to adenylic and guanylic acids in a soluble enzyme system
J. Am. Chem. Soc. 77:4179-4180

38 Abrams, Richard, and Marian Bentley. 1959
Biosynthesis of nucleic acid purines. III. Guanosine 5'-phosphate formation from xanthosine 5'-phosphate and L-glutamine
Arch. Biochem. Biophys. 79:91-110

39 Abrams, Richard, J. M. Goldinger, and E. S. Guzman Barron. 1950
Synthesis of protein and other cell substances from acetic acid in isolated bone marrow
Biochim. Biophys. Acta 5:74-80

40 Acher, Roger, and Jacqueline Chauvet. 1953
Die Struktur des Rindervasopressins
Biochim. Biophys. Acta (Amsterdam) 12:487-488

41 Acher, Roger, Claude Fromageot, and Marian Jutisz. 1950
Chromatographische Trennung von Aminosauren und Peptiden. 5. Mitt. Die einzelnen Aminosauren des Insulins und eine Bererkung uber die quantitative Bestimmung des Prolins
Biochim. Biophys. Acta (Amsterdam) 5:81-88

42 Acher, Roger, Jaqueline Chauvet, and Pierre Fromageot. 1952
Die Anordnung einiger Aminosauren im Rinder-Vasopressin
Biochim. Biophys. Acta 9:471-472

43 Achundow, M.K. 1964
Der Einfluss verschiedener Formen von Stickstoffdunger auf die Bodenfruchtbarkeit und die Teeblattereigenschaften unter Bedingungen der Sakatalzone
Ber. Akad. Wiss. Aserbaidshan SSR 20(9):49-52

44 Ackermann, H., and H. Langemann. 1960
Aminosauren-Decarboxylase im menschlichen Gehirn
Helv. Physiol. Pharm. Acta 18(1):C5-C6

45 Acs, G., R. Balazs, and F. B. Straub. 1953
Synthesis of adenosinetriphosphate in slices of brain cortex
Kiserl. Orvostud. F 5:466-472

46 Ada, G.L., G.J.V. Nossal, J. Pye, and A. Abbot. 1964
Antigene und Immunitat. 1. Mitt. Herstellung und Eigenschaften der Geisselantigene von Salmonella adelaide
Austral. J. Exp. Biol. Med. Sci. 42:267-282

47 Adachi, Akira. 1962
Study on the taste mechanisms of Na-glutamate and Na-inosinate
J. Physiol. Soc. Jap. 24(12):607-613

48 Adachi, Susumu. 1956
Neue Aminosaureglykoside aus tryptischen Hydrohysaten von Milchprodukten
Nature (London) 177:936-937

49 Adam, W., and G.W. Korting. 1955
Die freien Aminosauren im menschlichen Seminalplasma und ihre klinische Bedeutung
Dtsch. Med. Wschr. 80:249-251

* 50 Adamo, N.J., and A. Ratner. 1970
Monosodium glutamate: lack of effects on brain and reproductive function in rats
Science 169:673-674

51 Adamo, Norma Jean, and Albert Ratner. 1971
Monosodium glutamate effects
Science 172:294

52 Adams, Elijah. 1957
Enzymatische Umwandlung von D-Allohydroxyprolin in L-Glutaminsaure
J. Amer. Chem. Soc. 79:6338-6339

53 Adams, J. B. 1965
Das aus menschlichem "kolloidem" brustkrebs gewonnene mucin
Biochem. J. 94:368-377

54 Adams, J.E., H.A. Harper, G.S. Gordan, M. Hutchin, and R.C. Bentinck. 1955
Cerebral metabolism of glutamic acid in multiple sclerosis
Neurology 5(2):100-107

55 Adda, and Rivoire. 1957
Der gehalt von reis an aminosauren in verschiedenen graden des schalens
Riz Rizicult. 3:155-158

56 Addis, T., and D. R. Drury. 1923
The rate of urea excretion. VII. The effect of various other factors than blood urea concentration on the rate of urea excretion
J. Biol. Chem. 55:629-638

57 Adelberg, Edward A. 1956
Der stoffwechsel der aminosauren und proteine. 1. Mitt. Aminosaurestoffwechsel
Annu. Rev. Biochem. 25:349-372

58 Adezati, Luciano. 1951
Amino acid utilization for synthesizing purine compounds
Arch. "E. Maragliano" Patol. Clin. 6:1051-1063

59 Adkins, J.S., J.M. Wertz, R.H. Boffman, and E.L. Hove. 1967
Influence of addition of water or nonessential nitrogen on growth of rats fed low levels of essential L-amino acids
Proc. Soc. Exp. Biol. Med. 126(2):500-504

60 Adler, E., N. B. Das, H. V. Euler, and U. Heyman. 1938
Biological dehydrogenation and synthesis of glutamic acid
Compt. Rend. Trav. Lab. Carlsberg, Ser. Chim. 22:15-24

61 Adler, E., N.B. Das and H. V. Euler. 1937
Enzymic synthesis of glutamic acid
Arkiv Kemi, Mineral. Geol. 12B:No. 40, pp. 5

62 Adler, Erich. 1938
Enzymic decomposition and synthesis of glutamic acid
Arkiv. Kem. Miner. Geol. 12(B):42

63 Adler, Erich, and Walter L. Hughes. 1938
Uber die Komponenten der Dehydrasesysteme. XIX. Der enzymatische Mechanismus der Oxydoreduktionen der Triosephosphorsauren
Hoppe-Seyler's Z. Physiol. Chem. 253:71-79

64 Adler, Erich, Hans v. Euler, Gunnar Gunther, and Marianne Plass. 1939
Isocitric dehydrogenase and glutamic acid synthesis in animal tissue
Biochem. J. 33(6):1028-1045

65 Adler, Erich, Vidar Hellstrom, Gunnar Gunther, and Hans v. Euler. 1938
Uber den enzymatischen abbau and aufbau der glutaminsaure. III. In Bacterium coli
Hoppe-Seyler's Z. Physiol. Chem. 255(1/3):14-26

66 Adler, Julius. 1957
The metabolism of itaconic acid by liver mitochondria
J. Biol. Chem. 229(2):865-879

67 Adunts, G. T., and R. R. Nersesyan. 1969
Gamma-Aminobutyric acid metabolism in various organs of the chick embryo
Biol. Zh. Arm. 22(5):14-21

68 Aebi, H., H. Koblet, and J.P. von Wartburg. 1957
Uber den mechanismus der biologischen methanoloxydation
Helv. Physiol. Pharm. Acta 15:384-399

69 Aelony, Yo, John Logothetis, Bruce Bart, Frank Morrell, and Magdaline Bovis. 1962
Free amino acid concentrations in cerebral cortex of guinea pigs with epileptogenic lesions
Exp. Neurol. 5(6):525-532

70 Afar, J., and W. Rogozkin. 1961
Durch zulfur von proteinhydrolysaten im muskel hervorgerufene anderungen der adenosintriphosphat- und kreatinphosphatkonzentration
Naturwissenschaften 48:699-700

71 Afar, J.M., and V.A. Rogozkin. 1962
Adenylic acid content of mucsle after administration of casein hydrolyzates
Ceskoslov. Gastroenterol. Vyziva 16(3/4):288-290

72 Afar, J.M., and V.A. Rogozkin. 1963
Influence of injested casein hydrolyzate on the high energy nucleotide content of working muscle
Can. J. Biochem. Physiol. 41(7):1531-1536

73 Agar, W.T., F.J.R. Hird, and G.S. Sidhu. 1953
The active absorption of amino-acids by the intestine
J. Physiol. 121(2):255-263

74 Agarwala, S. C., V. K. Mohan Rao, and D. L. Shrivastava. 1953
The enzymic hydrolysis of glutathione by Vibrio comma (V. cholerae)
Experientia 9:257-259

75 Agnihotri, V. P. 1968
Effects of nitrogenous compounds on sclerotium formation in Aspergillus niger
Can. J. Microbiol. 14(11):1253-1258

76 Agnihotri, V. P., and B. S. Mehrotra. 1961
The amino acid composition of some ascosporic members of the Aspergillus nidulans groups
Lloydia 24:41-44

77 Agrawal, H. C. 1966
Postnatal changes in free amino acid pool of rat brain
J. Neurochem. 13:607-615

78 Agrawal, H. C. 1968
Developmental changes in mouse brain: Weight, water content and free amino acids.
J. Neurochem. 15(9):917-923

79 Agrawal, Harish C., Jimmie M. Davis, E. E. Haynes, and W. A. Himwich. 1969
Chlorpromazine and GABA (gamma-aminobutyric acid)
Ann. N. Y. Acad. Sci. 166(Art. 1):225-234

80 Agren, Gunnar. 1949
A micromethod for the microbiological determination of amino acids
Arkiv. Kemi. 1:179-185

81 Agren, Gunnar. 1952
Micobiological activity of a plasma-peptide fraction
Acta Chem. Scand. 6:999-1005

82 Agren, Gunnar. 1961
Saurelosliche nucleotidgebundene peptide in der kaninchenleber. 2. Mitt. Die Verteilung in verschiedenen Leberzellfraktionen
Acta Soc. Med. Ups. 66:297-314

83 Agren, Gunnar, and Tage Wilsson. 1949
Paper chromatographic analysis of amino acids and other ninhydrin-reacting substances in deproteinized human plasma
Acta Chem. Scand. 3:525-538

84 Ahmed, K., and P. G. Scholefield. 1962
Biochemische untersuchungen uber 1-aminocyclopentancarbonsaure
Can. J. Biochem. Physiol. 40:1101-1110

85 Aida, Ko, Kunio Oishi, and Toshinobu Asai. 1960
Untersuchungen uber Aminosauregarung. 2. Mitt. Uber den Mechanismus der L-Glutaminsauregarung
J. Agric. Chem. Soc. 34:70-77

86 Aida, Ko, Kunio Oishi, Katsumi Simizu, and Toshinobu Asai. 1960
Untersuchungen uber aminosauregarung. 5. Mitt. Uber den mechanismus der L-glutaminsauregarung
J. Agric. Chem. Soc. Japan (Nippon Nogeikagaku Kaishi) 34:77-83

87 Aimuchamedova, G.B., M.I. Daischew, K.P. Ssacharow, Je.P. Rukawischnikowa, K. Toktomuschew, A.B. Gelfenstein, W.P. Wdow itschenko, G.S. Jaroschewitsch, N.G. Rybnikowa, and B.A. Pedan. 1962
Die Gewinnung von Glutaminsaure und Betain in einer Versuchsanlage
Zucker-Ind. 36(3):16-20

88 Aimukhamedova, Giul'sym Buranovna. 1963
Chimicheskii Kontrol Protsessov Polichenyia Glutaminovoi Kisloty Betaina Ikh Proyebod - Nykh Ionoobmennym Metodom
Frunze, Izdvo Akad. Nauk. Kyprieskoi SSR 57:3

89 Airan, J. W., and H. V. Bhate. 1955
Stickstoffhaltige extraktivstoffe aus dem fleisch von scylla serrata
J. Univ. Bombay (N.S.) 24(3).Sect. B:60-63

90 Airan, J. W., and R. W. P. Master. 1953
Chromatographische Bestimmung von Aminosauren in einigen Bombayfisches
J. Indian Chem. Soc., Ind. News Edit. 16:63-69

91 Airan, J. W., P. V. Rangnekar, R. W. P. Master, and J. Barnabas. 1953
Identification of amino acids in certain parts of the body of the lobster
Sci. Cult. (India) 18:589-590

92 Airan, J.W. 1953
Aminosauren im Fingernagel des Menschen
J. Univ. Bombay 22B:26-28

93 Airan, J.W., and R.M. Desai. 1953
Amino acids in Pithecolobium dulce and Adansonia digitata
J. Univ. Bombay 34A:58-60

94 Aisenberg, Alan G. 1961
Normal and neoplastic mitochondria. I. Respiration
Cancer Res. 21:295-303

95 Aizawa, Toyozo, and Shoichi Hamaya. 1961
Cerebral sclerosis and cerebral circulation
Jap. Heart J. 2:133-146

96 Ajinomoto & Co., Inc. 1959
L-Glutamic acid manufacture by fermentation
Jap. Pat. 9261('59) issued Oct. 16, 1959

97 Ajinomoto and Co., Inc. and Sanraku Wine Manufg. Co. 1960
L-Glutamic acid manufacture by fermentation
Jap. Pat. 2897 issued Mar. 29, 1960

98 Ajinomoto Co. Inc. 1968
Meat-like flavour
Jap. Pat. 24,949 issued 1968

99 Ajinomoto Co. 1958
Sodium glutamate from fat-free rapeseed cake
Jap. Pat. 1,588 issued 1958

100 Ajinomoto Co., Inc. (Tokyo). 1961
Reine Glutaminsaure
E. Pat. 872,674 issued Jul. 12, 1961

101 Ajinomoto Co., Inc. (Tokyo). 1963
Gewinnung von Glutaminsaure (1) aus vergorenen Maischen
Schwz. Pat. 369,765 issued Jul. 31, 1963

102 Ajinomoto Co., Inc. Tokio. 1963
Speisewurze
Schwz. Pat. 368,699 issued May 31, 1963

103 Ajinomoto Co., Inc. 1957
Verhinderung des Klumpens von Tafelsalz bei Einw. von Feuchtigkeit
Fr. Pat. 1,134,667 issued Apr. 16, 1957

104 Ajinomoto Co., Inc. 1959
Gewinnung von glutaminsaure
Austrian Pat. 205,479 issued Sep 25, 1959

105 Ajinomoto Co., Inc. 1959
L-Glutamic acid from alpha-ketoglutaric acid and amino acid
Jap. Pat. 3061('59) issued Apr. 27, 1959

106 Ajinomoto Co., Inc. 1959
L-Glumatic acid by fermentation
Jap. Pat. 6262 issued Jul. 18, 1959

107 Ajinomoto Co., Inc. 1960
L-Glutamic acid preparation from alpha-ketoglutaric acid
Jap. Pat. 2909 issued Mar. 31, 1960

108 Ajinomoto Co., Inc. 1960
L-glutamic acid
Jap. Pat. 15,445 issued Oct. 15, 1960

109 Ajinomoto Co., Inc. 1960
L-Glutamic acid manufacture from gamma-aminobutyric acid by fermentation
Jap. Pat. 2911 issued Mar. 31, 1960

110 Ajinomoto Co., Inc. 1961
Glutaminsaure
E. Pat. 870,031 issued Jun. 7, 1961

111 Ajinomoto Co., Inc. 1963
Flavoring and preparation thereof
U.S. Pat. 3,109,741 issued Nov. 5, 1963

112 Ajinomoto Co., Inc. 1964
Gewinnung von L-glutaminsaure
Fr. Pat. 1,363,370 issued Sep. 25, 1964

113 Ajinomoto Co., Inc. 1965
Procedure for preparation of flavors and seasonings
Fr. Pat. 1,389,261 issued Feb. 12, 1965

114 Ajinomoto Co., Inc. 1965
Flavoring substances
Neth. Appl. 6,506,732 issued Oct. 29, 1965

115 Ajinomoto Co., Inc. 1966
L-glutamic acid preparation
Fr. Pat. 1,438,809 issued May 13, 1966

116 Ajinomoto Co., Inc. 1967
Obtaining L-glutamic acid by fermentation
Fr. Pat. 1,502-190 issued Nov. 18, 1967

117 Ajinomoto Co., Inc. 1967
Fermentative production of monoammonium glutamate and monosodium glutamate
Fr. Pat. 1,466,605 issued Jan. 20, 1967

118 Ajinomoto Co., Inc., and Sanraku Distillers Co., Inc., Tokyo. 1961
Erzeugung von L-glutaminsaure durch garung
U.S. Pat. 3,136,702 issued June 9, 1964; Brit. Pat. 968,428 issued Sep. 2, 1964

119 Ajinomoto Co., Inc., and Sanraku Distillers Co., Inc., Tokyo, Japan. 1959
Herstellung von L-glutaminsaure
Ind. P. 68 268 issued July 3, 1959

120 Ajinomoto Co., Inc., and Sanraku Distillers Co., Inc. 1959
Erzeugung von L-glutaminsaure durch garung
E.P. 873,448 issued Nov. 24, 1959

121 Ajinomoto Co., Inc., and Sanraku Distillers Co., Inc., Tokyo. 1957
Erzeugung von glutaminsaurekonzentraten fur speisewurzen
Swiss P. 367, 183 issued March 29, 1963

122 Ajinomoto Co., Inc., and Sanraku Distillers Co., Inc., Tokyo. 1962
Gewinnung von L-glutaminsaure
Can. P. 634, 377 issued Jan. 9, 1962

123 Ajinomoto Co., Inc., and Sanraku Distillers, Co., Inc., Tokyo. 1961
Erzeugung von l-glutaminsaure
Schwz. P. 368,190 issued July 7, 1961

124 Ajinomoto Co., Inc., and Sanraku Ocean Co., Inc., Tokyo. 1962
Herstellung von L-glutaminsaure durch garung
U.S. Pat. 3,164,531 issued Jan. 5, 1965; Brit. P. 973 376 issued Oct. 28,

125 Ajinomoto Co., Inc., and Sauraku Sake Manufg. Co., Ltd. 1961
L-Glutamic acid by bacterial fermentation
Brit. Pat. 873,448 issued Jul. 26, 1961

126 Ajinomoto Co., Inc., Sanraku Distillers Co., Inc., and Sanraku Ocean. 1964
Erzeugung von glutaminsaure durch garung
U. S. Pat. 3,138,540 issued June 23, 1964; Brit. Pat. 961,491 issued June 24, 1964

127 Ajinomoto Co., Inc., Takara-cho, Chuo-ku, Tokio, Japan. 1965
Erzeugung von L-Glutaminsaure durch Garung
Brit. Pat. 1,010,044 issued Nov. 17, 1965

128 Ajinomoto Co., Inc., Takaracho, Chuo-ku, Tokyo. 1965
Erzeugung und gewinnung von L-glutaminsaure durch garung
Brit. Pat. 981,358 issued Jan. 27, 1965

129 Ajinomoto Co., Inc., Takaracho, Chuo-ku, Tokyo. 1962
Erzeugung von L-glutaminsaure durch garung
Brit. Pat. 992,833 issued May 19, 1965

130 Ajinomoto Co., Inc., Takaracho, Chuo-ku, Tokyo, Japan. 1962
Erzeugung von aminosauren durch garung
Brit. Pat. 996,544 issued June 30, 1965

131 Ajinomoto Co., Inc., Tokio. 1962
Herstellung eines Wurzmittels
A.P. 3,039,880 issued Jun. 19, 1962

132 Ajinomoto Co., Inc., Tokyo, Japan. 1964
Gewinnung von glutaminsaure aus vergorenen maischen
Brit. Pat. 959,349 issued May 27, 1964

133 Ajinomoto K.K., and Sauraku Ocean K.K. 1965
Mikrobiologische Herstellung von L-Glutaminsaure
U.S. Pat. 3,212,994 issued Oct. 19, 1965

134 Ajinomoto K.K., Tokio. 1965
Isolierung von Glutaminasure (I)
D.A.S. 1,202,795 issued Oct. 14, 1965

135 Ajinomoto Kabushiki Kaisha, Ltd., Tokyo. 1962
Erzeugung von L-Glutaminsaure
E. Pat. 903,052 issued Aug. 9, 1962

136 Ajinomoto Kabushiki Kaisha, Tokio. 1963
Herstellung von Homocysteinsaure (I)
D.A.S. 1,151,510 issued Jul. 18, 1963

137 Ajinomoto Kabushiki Kaisha, Tokyo, Japan. 1969
Gewinnung von L-glutaminsaure
Ind. P. 66, 640 issued Nov. 24, 1961

138 Ajl, Samuel J., and C.H. Werkman. 1949
Anaerobic replacement of carbon dioxide
Proc. Soc. Exp. Biol. Med. 70:522-524

Die Aktivierung von Aminosauren in der Milchdruse der Ratte
J. Biol. Chem. 236:2015-2018

1015 Budanova, A. M. 1955
Relations between ammonia and glutamic acid in experimental epilepsy
Izvest. Akad. Nauk S.S.S.R., Ser. Biol. 1955(6):80-89

1016 Budanova, A. M. 1957
Biochemical changes in the blood of dogs during conditioned reflex type epilepsy
Zh. Vyssh. Nerv. Deyatel'nosti I. P. Pavlova 7:554-559

1017 Budanova, A. M. 1950
Uber anderungen im gehalt an ammoniak in der epileptogenen zone des gehirns
Ber. Akad. Wiss. UdSSR 75:875-876

1018 Budd, K. 1969
Assimilation of bicarbonate by Neocosmospora vasinfecta
Can. J. Microbiol. 15(5):389-398

1019 Budesinsky, Bretislav. 1956
Complexometry in organic analysis. II. Determination of amino acids and peptides
Chem. Listy 50:1236-1240

1020 Buehler, Henry J., E. J. Schantz, and Carl Lamanna 1947
The elemental and amino acid composition of crystalline Clostridium botulinum type A toxin
J. Biol. Chem. 169(2):295-302

1021 Buffoni, L., and B.M. Belotti. 1955
Ricerche sperimentali sull'associazione dell'idrazide dell'acido isonicotinico con l 'acido glutammico. (Experimental investigations on the isoniazidglutamic acid association)
Minerva Med. 46(8):581-587

1022 Buhler, Donald R. 1963
Untersuchungen an Fischhamoglobinen. Chinooklachs und Regenbogenforelle
J. Biol. Chem. 238:1665-1674

1023 Buig, J. 1957
Effect of protein hydrolyzate on experimental hypertension in rats
Acta Path. Microbiol. Scand. 40:384-387

1024 Bukatsch, F. 1937
The action of salts on the luminosity of bacteria
Sitzber. Akad. Wiss. Wien, Math.-naturw. Klasse 145:259-276

1025 Bukin, Yu. V. 1959
The effect of vitamin B6 antagonists (toxopyrimidine and isonicotinoyl hydrazine) on the content of NH3, glutamin, d and gamma-aminobutyric acid in the brain of rats
Ukr. Biokhim. Zh. 31:906-911

1026 Bulhak, Barbara, and Kazimierz Toczko. 1966
Amino acids and peptides of animal tissues. II. The content of predominant amino acids in bovine heart muscle and in bovine and porcine adrenal cortex
Acta Physiol. Pol. 17(5-6):787-794

1027 Bull, Henry B., J. Wilfrid Hahn, and Victor R. Baptist. 1949
Filter-paper chromatography
J. Am. Chem. Soc. 71:550-553

1028 Bullock, D. H. and O. R. Irvine. 1956
Chromatographische Untersuchung der Reifung des Cheddarkases.
J. Dairy Sci. 39:1229-1235

1029 Bulmash, Jerome, and R.H. Weaver. 1957
Ernahrungsuntersuchungen uber clostridium histolyticum
J. Bact. 74:110

1030 Bulos, Bernard, and Philip Handler. 1965
Kinetik der Rinderherz-Glutaminsaure-Alanin-Transaminase
J. Biol. Chem. 240:3283-3293

1031 Buman, R. K., A. R. Vejs, and M. A. Olte. 1965
Kristaline Aluminiumhydroxide als Sorbentien in der Dunnschichtchromatographie
Izvest. Akad. Nauk Latv. SSR, Ser. Chim. 1965:35-42

1032 Bunatyan, G. Kh. 1941
The oxidation and stabilization of vitamin C
Khim. Referat. Zh. (Moscow) 4(7/8):55-56

1033 Bunjatjan, G. Ch., and A. W. Arutjurjan. 1965
Entstehung von amidgruppen des glutamins und der proteine in den homogenaten und subzellularen fraktionen des gehirns
Dokl. Akad. Nauk Arm. SSR 40:209-215

1034 Bunney, W. Edward, and William C. Rose. 1928
Growth upon diets practically devoid of arginine, with some observations upon the relation of glutamic and aspartic acids to nutrition
J. Biol. Chem. 76(2):521-534

1035 Bunyatyan, G. Kh. 1962
Role of gamma-aminobutyric acid in brain tissue
Tret'ya Vses. Konf. po Biokhim. Nervnoi Sistemy, Akad. Nauk Arm. SSR, Inst. Biokhim., Sb.Dokl., Erevan 1962:133-151

1036 Bunyatyan, G. Kh. 1963
The role of gamma-aminobutyric acid in the metabolism of glutamic acid and glutamine in brain (slices from cats)
J. Neurochem. 10(6):461-469

1037 Bunyatyan, G. Kh. 1965
Role of N-acetyl-L-aspartic acid in brain tissue metabolism
Acad. Sci. Armenian S.S.R., Erevan (Russ) 37(5):679-690

1038 Bunyatyan, G. Kh. 1966
Participation of gamma-aminobutyric acid in metabolism of main energy sources of brain
Probl. Neirokhim., Akad. Nauk SSSR 1966:148-157

1039 Bunyatyan, G. Kh., and B. A. Kazaryan. 1967
Bound and free amino acids in the brain
Biol. Zh. Arm. 20(11):29-36

1040 Bunyatyan, G. Kh., and D. A. Akopyan. 1967
Rol'glutaminovoi kisloty kak istochnika svobodnogo ammiaka v mozgovoi tkani. (Role of glutamic acid as a source of free ammonia in brain tissue)
Dokl. Akad. Nauk Arm. SSR 45(1):28-34

1041 Bunyatyan, G. Kh., and R. R. Nersesyan. 1964
Transamination of gamma-aminobutyric acid with alpha-oxoglutaric acid in brain and other tissues of chicken embryo
Vopr. Biokhim. Mozga, Akad. Nauk Arm. SSR, Inst. Biokhim. 1:5-13

1042 Bunyatyan, G. Kh., and S. G. Movsesyan. 1966
Deamination and reamination of nicotinamide adenine dinucleotides in brain
Vopr. Biokhim. Mozga, Akad. Nauk. Arm. SSR, Inst. Biokhim. 2:5-22

1043 Bunyatyan, G.Kh., A.S. Oganesyan, Zh.S. Gevorkyan, and K.A. Chobanyan. 1968
Deamination of L-amino acids in renal tissue of immature rats
Dokl. Akad. Nauk Arm. S.S.R. 47(1):31-36

1044 Bunyatyan, G.Kh., V.B. Egyan, and G.A. Turshyan. 1964
Effect of gamma-aminobutyric acid on respiration of the brain tissue and on some aspects of its carbohydrate metabolism
Vopr. Biokhim. Mozga, Akad. Nauk Arm. SSR, Inst. Biokhim. 1:27-38

1045 Buogo, Giulio. 1934
The determination of amino acids (glutamic acid) in tomato paste
Ann. Chim. Appl. 24:79-82

1046 Buono, F. 1966
Physiology of growth and sporulation in Bacillus cereus. I. Effect of glutamic and other amino acids
J. Bact. 91:2291-2299

1047 Buonocore, Michael G. 1961
Auflosungsgeschwindigkeiten von Schmelz und Dentin in sauren Puffern
J. Dental Res. 40:561-570

1048 Buonocore, Michael G., and Biruta Sommer. 1957
Wirkung des Zusatzes verschiedener Aminosauren zu den Zahnschmelz decalcifizierende Puffern
J. Am. Dental Assoc. 55:781-784

1049 Buracevskij, I. I., V. L. Jarovenko, and V. B. Kotov. 1966
Assimilation der aminosauren durch einen amylaseproduzenten Aspergillus usamii 3758/45 (in Russian)
Prikl. Biochim. Mikrobiol. 2:605-609

1050 Burba, M., and Kastning, M. 1971
Stoffwechselphysiologische untersuchungen an zuckerruben wahrend der vegetationszeit. I. Glutamin, glutaminsaure, asparagin und asparaginsaure. (Investigations on the metabolism of sugar beet during the growing period. I. Glutamine, glutamic acid, asparagine and aspartic acid)
Zucker 24(13):386-396

1051 Burch, Robert E., Harry Rudney, and Julian J. Irias. 1964
The activation and metabolism of beta-hydroxy-beta-methylglutaric acid
J. Biol. Chem. 239(12):4111-4116
Arch Pharmaz. Ber. dtsch. pharmaz. Ges.

Effect of x-ray irradiation on the cytochromes of mitochondria irradiated in vitro
Tr. Leningrad Khim.-Farm. Inst. 20(1):156-158

1744 Derrick, J. B., and Audrey P. Hanley. 1957
Amino acids in the blood and urine of normal and arthritic subjects before and after a glycine load given with and without adrenocorticotropin
Can. J. Biochem. Physiol. 35(11):1005-1016

1745 Deschreider, A. R. 1964
Wirkung verschiedener metallischer kationen auf die proteine des weizens
Ind. Aliment. Agric. 81e:1083-1091

1746 Desclaux, P., I. Benoit, and S. Aussagel. 1953
Effect of glutamic acid on serious metal deficiency
Rev. Prat. 3:831-838

1747 Deshpande, V.G., and D.B. Desai. 1962
Weitere untersuchungen uber die rolle von kalium und natrium und natrium in der ernahrung der milchsaurebakterien
Indian J. Med. Res. 50:453-459

1748 Desi, I., Ildiko Farkas, J. Sos, and A. Balogh. 1967
Neurophysiological effects of glutamic acid ethylester (rat)
Acta Physiol. Acad. Sci. Hung. 32(4):323-335

1749 Dessi, P., and A. M. Gianni. 1959
Uber die veranderungen der animosaure- und kohlenhydratkomponenten des rattenhirns hac berabfolgung von alkaloiden mit neurotroper wirksamkeit
Arch. Ital. Sci. Farm. (3)9:143-144

1750 Dessi, P., A. M. Gianni, and M. Cresti. 1959
Weitere elektrophoretische und chromatographische untersuchungen uber die zusammensetzung der menschlichen galle
Arch. Ital. Sci. Farm. (3)9:145-146

1751 Dessi, P., A. M. Gianni, G. Pasini, and M. Greco. 1960
Free amino acids and structural proteins of Brucella melitensis resistant to Terramycin
Giorn. Microbiol. 8:122-128

1752 Dessi, P., G. Pasini, A. M. Gianni, and M. Greco. 1959
Vorlaufige untersuchungen uber die aminosaurezusammensetzung der gerustproteine von autotrophen und heterotrophen bakterien. 2. Mitt.
Boll. Soc. Ital. Biol. Sper. 35:1299-1301

1753 Dessman, Samuel P. 1952
Glutamate stimulation of malate and fumarate oxidation in brain homogenates (abstract)
Fed. Proc. 11(1):187-188

1754 Destunis, Georg. 1954
Rationelle therapie mit blutaminsaure in der neurologie
Dtsch. Gesundheitswes. 37:23-12

1755 Deuchar, E. M. 1955
Distribution of free amino acids in embryos of Xenopus laevis
Nature 176:258-259

1756 Deuchar, E.M. 1958
Free amino acid changes during cleavage in Xenopus laevis embryos
Exp. Cell Res. 14(1):84-87

1757 Deutsche Gold- und Silber-Scheideanstalt Vorm. Roessler. 1929
Food flavorings comprising derivates of glutamic acid
Brit. Pat. 352,673 issued Jun. 11, 1929

1758 Deutscher, M.P. 1967
Rat liver glutamyl ribonucleic acid synthetase.
J. Biol. Chem. 242:1123-1131

1759 Devenyi, T., and E. Szorenyi. 1956
Artspezifitat der prolamine vom gesichtspunkt der N-endstandigen aminosauren
Acta Physiol. Acad. Sci. Hung. 9:301-308

1760 Devik, Ole, G. 1967
Formation of N-nitrosamines by the Maillard reaction
Acta Chem. Scand. 21(8):2302-2303

1761 Devin, R., P. Jacquenoud, and S. Lacombe. 1953
Parenteral feeding with hydrolyzed proteins
Sem. Hop. Paris 29:565-570

1762 Dewan, John George. 1938
Die l(+)-Glutaminsauredehydrogenase der tierischen Gewebe
Biochem. J. 32:1378-1385

1763 Dey, P.K., and Chhabi Datta. 1966
Effect of psychotropic phytochemicals on cerebral amino acid levels in mice
Indian J. Exp. Biol. 4(4):216-219

1764 Deyl, Z., L. Schinkmannova, and J. Rosmus. 1967
Chromatographic separation of 2,4-dinitro-5-amino-phenyl derivatives of amino acids
J. Chromatogr. 30(2):614-617

1765 DeBusk, A. Gib., and Robert P. Wagner. 1953
Die Funktion der p-Oxypenylbrenztraubensaure in Neurospora crassa
J. Am. Chem. Soc. 75:5131

1766 DeFeudis, F.V. 1970
Role of the perineural sheath of peripheral nerve on fluxes of L-glutamate in vitro
Nature 227:854-855

1767 DeGroot, A.P. 1952
Amino acid requirements for growth of the honeybee (Apis mellifica L.)
Experientia 8(5):192-194

1768 DeLuca, H.F., M.R. Manatt, N. Madsen, and E.B. Olson. 1963
Wirkung von Vitamin A auf die Oxydation von Zwischenstufen des Tricarbonsaurecyclus in Leberhomogenaten
J. Nutr. 81:383-386

1769 DeMars, Robert. 1958
Hemmung der glutamyltransferasebildung durch glutamin in kulturen menschlicher zellen
Biochim. Biophys. Acta (Amsterdam) 27:435-436

1770 DeVay, James E., Albert R. Weinhold, and Gunter Zweig. 1959
Eigenschaften der athylester gewisser aminosauren in beziehung zu nachtraglich bei der chromatographie gebildeten verbindungen
Analytic. Chem. 31:815-817

1771 DeVries, W.H., W.M. Govier, J.S. Evans, J.D. Gregory, G.D. Novelli, M. Soodak, and F. Lipmann. 1950
Reinigung von Coenzym A aus Garungsquellen und seine teilweise weitere Identifizierung
J. Am. Chem. Soc. 72:4838

1772 Dhalla, N.S., C.L. Malhotra, and M.S. Sastry. 1961
Effect of Acorus oil on the respiration in vitro of rat brain
J. Pharm. Sci. 50:580-582

1773 Di Bella, Salvatore. 1952
Chromatographische Untersuchung der freien Aminosauren im Jensen-Sarkom von Ratten
Ark. Kemi (Stockholm) 5:89-91

1774 Di Macco, Gennaro. 1951
Eiweissdiat und experimentelle krebsbildung
Attiv. Accad. Sci. Torino, Clin. Sci. Fis, Mater. Nat. 86:308-313

1870 Drilhon, A., and C. Vago. 1953
Veranderungen des chromatographischen Bildes der freien Aminosauren und fluorescierenden Substanzen in der Hamolymphe von Bombyx mori L. als Folge mikrobieller Paralyse
Experientia (Basel) 9:143-145

1871 Drilhon, Andree. 1944
Papierchromatographische Untersuchungen uber die Verteilung der freien Aminosauren im Insektenblut
Biochemic. J. 38:224

1872 Drilhon, Andree, and Rene Guy Busnel. 1950
Nature of the free amino acids present in the hypodermis of crustaceans of various pigmentary types
Compt. Rend. 230:682-683

1873 Drilhon, Andree, and Rene Guy Busnel. 1950
Identification of free amino acids in the egg of Bombyx mori
Compt. Rend. 230:1114-1116

1874 Drori, J.B., G.R. Simon, and M.M. Cohen. 1963
The conversion of aspartic acid to glutamic acid in guinea pig cerebral cortex slices in vitro
Neurology 13(4):357

1875 Drosdowa, T. W. 1962
Chemische untersuchung von der fossilen haut eines amphibiums der unteren permperiode
Ber. Akad. Wiss. UdSSR 145:650-652

1876 Drouhet, E., and F. Mariat. 1952
Nutrition of dermatophytes. I. Study of the vitamin needs
Ann. Inst. Pasteur. 82:337-347

1877 Druckrey, Hermann. No date given
Inhibition of cell division in sea-urchin eggs and mammalian tissues by pituitary extracts, etc.
Arch. Exp. Path. Pharm. 188:196-207

1878 Drug Houses of Australia Ltd. 1954
Composition for tenderizing meat
Aust. Pat. 157,454 issued Jul. 6, 1954

1879 Dryden, E. C., M. L. Buch, and Claude H. Hills. 1955
A study of color changes in stored apple-juice concentrates
Food Technol. 9:264-268

1880 Du Ruisseau, Jean P., Jesse P. Greenstein, Milton Winitz, and Sanford M. Birnbaum. 1957
Studies on the metabolism of amino acids and related compounds in vivo. VI. Free amino acid levels in the tissues of rats protected against ammonia toxicity
Arch. Biochem. Biophys. 68(1):161-171

1881 Dubreuil, R. M., J. L. Auclair, and P. S. Timiras. 1952
Comparative study of the free amino acids in the serum of four mammals by partition chromatography
Rev. Can. Biol. 11:401-407

1882 Dubrowskaja, I. I. 1957
Untersuchung der eiweisskomponenten der antigenkomplexe von brucellen
Biochemie 22:924-928

1883 Duc-Nguyen, H., and Lawrence L. Weed. 1964
D-ornithin als bestandteil einer bakterienzellwand
J. Biol. Chem. 239:3372-3376

1884 Duchareau, G., and M. Florkin. 1958
A survey of aminoacidemias with special reference to the high concentration of free amino acids in insect hemolymph
Arch. Intern. Physiol. Biochim. 66:573-591

1885 Duchateau-Bosson, Gh., and M. Florkin. 1962
Adaptation of Chinese crabs to sea water shows in soft water a raised value in the amino acid composition of muscles
Arch. Intern. Physiol. Biochim. 70:345-355

1886 Duchateau, Chislaine, and Marcel Florkin. 1954
The composition of arthropodine and cuticular scleroproteins extracted from the cephalothoracic exoskeletons of two decapod crustaceans
Physiol. Compar. Oecol. 3:365-369

1887 Duchateau, Gh., and M. Florkin. 1954
Zustand der Nichtproteinaminosauren im Plasma der Hamolymphe von Schmetterlingspuppen
Arch. Int. Phys. 62:272-273

1888 Duchateau, Gh., M. Florkin, and H. Sarlet. 1954
Typen der Zusammensetzung von Gesamtproteinen und dem Pool der Nichtprotein-Aminosauren im Muskel
Arch. Int. Physiol. 62:512-517

1889 Duchateau, Ghislaine, and Marcel Florkin. 1954
Typen der Zusammensetzung der Pools von Nichtprotein-Aminosauren in Muskeln
Arch. Int. Physiol. 62:487-504

1890 Duchateau, Ghislaine, and Marcel Florkin. 1955
Zusammensetzung der nichteiweiss-aminosauren der hamolymphe von raupen und puppen von Sphinx ligustri L
Bull. Soc. Chim. Biol. 37:239-245

1891 Duchateau, Ghislaine, and Marcel Florkin. 1957
Composition of the nonprotein-bound amino acids in the muscles of the river lamprey
Arch. Intern. Physiol. Biochem. 65:378

1892 Duchateau, Ghislaine, Marcel Florkin, and Henri Sarlet. 1952
Nonprotein free or combined amino acids in the blood plasma of several insects
Arch. Int. Physiol. 60:539-540

1893 Duczmal, Karol W. 1969
Metabolism of nitrogen compounds in germinating seeds and developing seedlings of Pisum sativum
Hodowla Rosl., Aklim. Nasienn. 12(5):523-549

1894 Duda, George D., and Philip Handler. 1958
Kinetics of ammonia metabolism in vivo
J. Biol. Chem. 232(1):303-314

1895 Dudani, A., S. N. Iyer, C. R. Krishua Murti, and D. L. Shrivastava. 1953
Dehydrogenation of various substrates by Vibrio cholerae
Nature 171:81-82

1896 Dudel, J., R. Gryder, A. Kaji, S.W. Kuffler, and D.D. Potter. 1963
Gamma-aminobutyric acid and other blocking compounds in Crustacea. I. Central nervous system
J. Neurophysiol. 26(5):721-728

1897 Dudman, W.F. 1959
Vergleich des Schlemes von Tomaten- und Bananenstammen von Pseudomonas solanacearum
Nature 184:1969-1970

1898 Dugal, L. P., and M. Therien. 1952
Effects of glutamic acid and of liver extract on the resistance of the white rat to intense cold
Rev. Can. Biol. 11(2):180-183

1899 Dugel'nyi, V.S. 1966
Experimental treatment of acute hemmorrhage with a mixture of lactaclis and hydrolysia
Eksp. Khir. Anest. 11:42-47

1900 Duggan, A. W., and G. A. R. Johnston. 1970
Glutamate and related amino-acids in cat, dog, and rat spinal roots
Comp. Gen. Pharm. 1(1):127-128

1901 Duggan, A. W., and G. A. R. Johnston. 1970
Glutamate and related amino acids in cat spinal roots, dorsal root ganglia and peripheral nerves
J. Neurochem. 17(8):1205-1208

1902 Dulaney, Eugene L., E. Bilinski, and W.R. McConnell. 1956
Extracellularer organischer stickstoff in der kulturflussigkeit von ustilago maydis
Canad. J. Biochem. Physiol. 34:1195-1198

1903 Dulce, H. J. 1954
Therapy of myasthenia gravis and mental disorders in chorea minor with glutaminic acid
Muchen. Med. Wchnschr. 96:1235

1904 Dumazert, C. 1950
Action of weak doses of complete protein hydrolysates on the mobilization of nitrogen reserves
Arch. Sci. Physiol. 4(3):291-298

1905 Dunn, Max S., and Edward A. Murphy. 1958
Wirkungen von Alter, Geschlecht, Stamm und Methioninanalogis auf die Nichtprotein-Aminosauren in der Leber von normalen und tumortragenden Ratten
Cancer Res. 18:569-574

1906 Dunn, Max S., Kiyoshi Sakamoto, Pilloo B. Sutaria, and Edward A. Murphy. 1962
Aminosaurezusammensetzung von Ratten- und Mausetumoren
Proc. Soc. Exp. Biol. Med. 110:475-477

1907 Dunn, Max S., Merill N. Camien, S. Shankman and Harriette Block. 1947
Urinary excretion of twelve amino acids by normal male and female subjects measured microbiologically
Arch. Biochem. 13(2):207-216

1908 Dunn, Max S., Merrill N. Camien, Louis B. Rockland, S. Shankman, and Samuel C. Goldberg. 1944
Amino acids, peptides and proteins. XVII. Determination of glutamic acid in protein hydrolyzates by a microbiological method
J. Biol. Chem. 155:591-603

1909 Dunn, Max S., Merrill N. Camien, Ruth B. Malin, Edward A. Murphy, and Philip J. Reiner. 1949
Percentages of twelve amino acids in blood, carcass, heart, kidney, liver, muscle, and skin of eight animals
Univ. Calif. Pubs. Physiol. 8:293-326

1910 Dunn, Max S., Merrill N. Camien, S. Shankman, and Harriette Block. 1947
The determination of d(-)-and l(+)-glutamic acid in protein hydrolyzates
J. Biol. Chem. 168:43-49

1911 Dunn, Max, S., and Lawrence E. McClure. 1950
Das Ansprechen von Lactobacillus casei auf partielle Eiweisshydrolysate
J. Biol. Chem. 184:223-233

1912 Dunstone, J. R., and W. T. J. Morgan. 1965
Glykoproteine in der ovarialzystenflussigkeit des menschen
Biochim. Biophys. Acta (Amsterdam) 101:300-314

1913 Duplan, Jean-Francois, and Albert-Jean Rosenberg. 1954
Schutzwirkung von Gluocosamin gegen die letale Wirkung einer Rontgentotalbestrahlung bei der Maus.
C. R. Hebd. Seances Acad. Sci. 239:116-117

1914 Durand, Paul, Gerard Renoux, and Maurice Huet. 1953
Glutamic acid and infection
Compt. Rend. 236:1705-1707

1915 Durand, R. 1970
Kinetics of interactions of oxidations of pyruvate and glutamate at the level of pig heart mitochondria
Bull. Soc. Chim. Biol. 52:539-545

1916 Durand, Roger, Antoine Younes, and Daniele Gautheron. 1969
Interaction de l'oxydation du pyruvate et du glutamate au niveau des mitochondries de coeurs de Porc. (Interaction of pyruvate and glutamate oxidation at the mitochondrial level in pig's heart)
Compt. Rend. Hebd. Seances Acad. Sci. Ser. D Sci. Natur. (Paris) 268(2):420-422

1917 Durand, Roger, Nicole Pialoux, Catherine Godinot, and Danielle Gautheron. 1965
Oxydation du glutamate par des sarcosomes de coeur de porc: Effets des inhibiteurs et des ions NH4. (Oxidation of glutamate by sarcosomes in the pig heart: Effects of inhibitors and NH4-ions.)
Bull. Soc. Chim. Biol. 47(11):2115-2124

1918 Duranton, Henri, and Monique Maille. 1961
Untersuchung uber den Prolinstoffwechsel bei Topinambur
Compt. Rend. Hebd. Seances Acad. Sci. 253:963-965

1919 Durham. Norman N., and Margie D. Perry. 1959
Effect of diethylstilbestrol on substrate metabolism in Aerobacter aerogenes
J. Bact. 77(4):439-444

1920 Durham, Norman N. 1963
Hemmung des Wachstums und der Teilung von Mikroben durch D-Serin, Vancomycin und Mitomycin C
J. Bact. 86:380-386

1921 Durmishidze, S.V., and G.I. Mosiashvili. 1948
Triose as hydrogen acceptor in the process of deamination of glutamic acid during the alcoholic fermentation
Biokhim. Vinodel., Akad. Nauk S.S.S.R., Sbornik 2:143-148

1922 Dus, Karl, Robert G. Bartsch, and Martin D. Kamen. 1962
Das dihampeptid von chromatium RHP
J. Biol. Chem. 237:3083-3093

1923 Dustin, J. P., S. Moore, and E. J. Bigwood. 1955
Chromatographic studies on the excretion of amino acids in early infancy
Metabolism 4(1):75-79

1924 Duvilanski, Beatriz H., Alicia E.R. De Guglielmone, and Ofelia Z. Sapia. 1968
Effects of ions on amino acids of brain-cortex slices metabolizing glucose
Acta Physiol. Lat. Am. 18(4):316-322

1925 Dvoneh, William, Odette L. Shotwell, Robert G. Benedict, Thomas G. Pridham, and Lloyd A. Lindenfelser. 1954
Weitere Untersuchungen uber Cinnamycin, ein Polypeptidantibioticum
Antibiot. Chemother. 4:1135-1142

1926 Dworschak, E. 1969
Comparative chemical study of thy proteins of raw and fried meat from the point of view of dietetics
Elelmisz. Kozl. 15(5):263-272

1927 Dyablova, P. E. 1960
Effect of glutamic acid on cholinergic excitation in central and peripheral synapses
Biull. Eksp. Biol. Med. 49(1):68-70

1928 Dyablova, P. E. 1962
The effect of glutamic acid, asparagine, glycine, and alanine on the contraction of skeletal muscle and its sensitization to potassium ions
Byul. Eksp. Biol. Med. 53(3):57-59

1929 Dyablova, P.E. 1960
Effect of glutamic acid on cholinergic excitation at the central and peripheral synapses
Byull. Eksp. Biol. Med. 49(1):83-86

1930 Dyr, J., and V. Krumphanzl. 1959
Determination of free amino acids in industrial and refined lactic acids
Kvasny Prumysl 5:189-192

1931 Dyson, G. Malcolm. No date given
Industrielle Chemikalien aus dem Meer
Chem. Age 15:390-393

1932 Dyson, G. Malcolm. 1931
Aji-no-moto
Chem. Age 24:328-329

The pathway of glutamic acid fermentation by Clostrodium tetanomorphum
Biochem. J. 60(1):vi-viii

2276 Fuchs, Heinrich. 1938
Sulfur compounds and other substances in bird muscle and arthropods
Z. Biol. 98:430-437

2277 Fuerst, Robert, and Robert P. Wagner. 1957
Analyse der freien intracellularen aminosauren einiger neurosporastamme
Arch. Biochem. Biophys. 70:311-326

2278 Fuerst, Robert, Alton J. Landua, and Jorge Awapara 1950
Das vorkommen eines durch papierchromatographie machgewiesenen peptids in tierorganen und menschenblut
Science 111:635

2279 Fujii, Hisao. 1963
Uber die Bildung von Schleimstoff durch Bacillus Natto. 3. Mitt. Chemische Bestandteile von Schleimstoff in Natto
J. Agric. Chem. Soc. Jap. 37:407-411

2280 Fujii, Hisao. 1963
Bildung von schleim durch bacillus natto. 6. Mitt. Mechanismus der schleimbildung.
J. Agric. Chem. Soc. Jap. (Nippon Nogei-Kagaku Kaishi) 37:619-622

2281 Fujii, Masao. 1926
Foods
Brit. Pat. 279,985 Sept. 11

2282 Fujii, Masao. 1927
Neutralisieren von sauren oder alkalischen Produkten, welche durch Behandeln eines oder mehrerer Proteine mit Alkali oder Saure erhalten werden
Fr. Pat. 621,589 issued May 13, 1927

2283 Fujii, Masao. 1928
Neutralizing protein food materials, etc., with glutamic acid or its salts
U.S. Pat. 1,680,865 Aug. 14.

2284 Fujii, Takashi, S. Utida, T. Mizuno, and S. Nanao. 1955
Effects of amino acids and some chelating substances on the motility and the oxygen uptake of starfish spermatozoa
J. Fac. Sci., Tokyo Imp. Univ. Sect. 4
7(3):335-345

2285 Fujii, Taro, and Yukio Ono. 1961
Beziehung zwischen Chlorophyllgehalt und freien Aminosauren in Einkornweizen-Mutanten
Proc. Jap. Acad. 37:633-637

2286 Fujioka, Hideko, and Harold A. Scheraga. 1965
Strukturuntersuchungen an ribonuclease. 18. Mitt. Peptische spaltprodukte von ribonuclease
Biochemistry 4:2197-2205

2287 Fujita, Akiji, and Takeshi Kodama. 1934
Untersuchungen uber atmung und garung pathogener bakterien. II. Uber atmung und garung von bac. diphtheriae
Biochem. Z. 271:185-198

2288 Fukai, Toshi, Shinroku Irie, and Kazuo Ishiguro. 1952
The fermentation-inhibiting substances contained in the waste liquor of the sodium glutamate industry. I. The relation between the multiplication of yeasts and the addition of crude amino acids to the koji extract medium
J. Soc. Brew. 47(4):211-214

2289 Fukuda, Teruo, Kimie Miyakawa, and Tamiko Ueki. 1967
Effect of food additives on the stability of ascorbic acid and sodium ascorbate solutions. IV. A mixture of 32 mg.% sodium alginate and 0.05M citric acid
Showa Yakka Daigaku Kiyo 5:1-8

2290 Fukuda, Teruo, Mumio Ishibashi, and Atsuto Kozuka. 1966
Effect of food additives on the stability of ascorbic acid and sodium ascorbate solutions. I. Use of redistilled water
Showa Yakka Daigaku Kiyo 4:35-42

2291 Fukuda, Teruo, Tamiko Ueki, Kimie Miyakawa, and Kazuoko Mimura. 1968
Effect of food additives on stability of ascorbic acid and Na ascorbate solutions. V. Sodium hexametaphosphate
Shokuhin Eiseigaku Zasshi 9(2):105-111

2292 Fukuda, Toshifumi. 1950
Detection by paper chromatography of the amino acids of the protein (albumin and globulin) in the blood of silkworm
J. Sericult. Sci. Jap. 19:305-307

2293 Fukuda, Toshifumi. 1950
Detection by paper chromatography of the free amino acids in the blood of silkworm
J. Sericult. Sci. Jap. 19:372-374

2294 Fukuda, Toshifumi, and Shun Sakane. 1950
Detection by paper chromatography of the free amino acids in the blood of silkworm pupae.
J. Sericult. Sci. Japan 19:490-491

2295 Fukuda, Toshifumi, J. Kirimura, M. Matsuda, and T. Suzuki. 1955
Microbiological determination of free amino acids in the body fluid of the silkworm larva
Nature 175:1041

2296 Fukumi, Hideo, Denichi Mizuno, and Sawako Irie. 1952
Sulfanilamide resistance and growth factor requirement of the Shigella strains isolated during the year 1950
J. Bacteriol. (Japan) 7:535-537

2297 Fukumoto, Juichiro, Takehiko Yamamoto, and Daisuke Tsuru. 1957
Untersuchungen uber bakterielle amylase. 24. Mitt. Der mechanismus der bakteriellen amylase- und proteinasebildung
J. Agric. Chem. Soc. Jap. (Nippon Nogeikagaku Kaishi) 31:724-727

2298 Fukuoka, Fumiko and Waro Nakahara. 1952
Toxohormone, a characteristic toxic substance produced by cancer tissue. IV. Toxohormone, and thymus involution in tumor-bearing animals
Gann 43:55-63

2299 Fukushima, Yoncharu. 1953
The metabolism of the brain of mice infected with Japanese B encephalitis virus. I. Oxidation of several organic acids and relation to some apoenzymes and coenzymes
J. Osaka City Med. Cent. 2:273-279

2300 Fukushima, Yoneharu. 1954
Metabolism in the brain of mice infected with Japanese B encephalitis virus. IV. Content of glutamic acid in the brain
Virus (Japan) 4:34-36

2301 Fuller, John L., and Benson E. Ginsburg. 1954
Effect of adrenalectomy on the anticonvulsant action of glutamic acid in mice
Am. J. Physiol. 176(3):367-370

2302 Fuller, R. C., R. M. Smillie, E. C. Sisler, and H. L. Kornberg. 1961
Kohlenstoffwechsel bei chromatium
J. Biol. Chem. 236:2140-2149

2303 Fults, Jess L., Merle G. Payne, John O. Gaskill, Lucile R. Hack, and Albert C. Walker. 1951
Glutamic acid in sugar beets increased by zinc dimethyldithiocarbamate
Bot. Gaz. 113(2):207-210

2304 Fumiwake, Etsuro. 1957
Interrelation between amino acids. Amino acid metabolism in rats injected with glutamic acid and egg protein
Osaka Daigaku Igaku Zasshi 9:333-337

2856 Hashida, Wataru, Uichiro Maeda, Hiromichi Ueda, and Kanae Yokogawa. 1955
Determination of glutamic acid content in protein materials
J. Ferment. Technol. 33:364-369

2857 Hashimoto, Tatsuichiro, Kiyoshi Suzuki, and Denichi Mizuno. 1954
Nutritional requirements of bacteria. IX. Free amino acids within the cell of streptomycin-resistant Calmette-Guerin bacillus (BCG)
Japan. J. Med. Sci. Biol. 7:193-196

2858 Hashimoto, Y. 1964
Taste-producing substances in marine products
Technol. Fish Util. Int. Symp., Husum Ger. 1964:57-61

2859 Hashizume, Takeshi. 1951
Amino acids in tea. I. Synthesis of theanine from pyrrolidonecarboxylic acid
J. Agric. Chem. Soc. (Japan) 25:25-26

2860 Hashizume, Takeshi, Yu Horie, and Tetsuo Mitsui. 1952
Chemical constituents of beer. I. Identification of amino acids of beer by paper partition chromatography
Mem. Res. Inst. Food Sci., Kyoto Univ. 4:12-18

2861 Haskins, Willard T., and Paul P. Weinstein. 1957
Aminosaureausscheidung durch Trichinella spiralis-larven
J. Parasitol. 43:25-27

2862 Haslam, R.J., and H.A. Krebs. 1963
The metabolism of glutamate in homogenates and slices of brain cortex
Biochem. J. 88(3):566-578

2863 Haslam, R.J., and H.A. Krebs. 1963
Kompetitive Hemmung von Substraten in der Atmung tierischer Gewebe. Die gegenseitige Stoffwechselbeeinflussung von Pyruvat und Alpha-Ketoglutarat in Rattenleberhomogenaten
Biochem. J. 86:432-446

2864 Hassall, H. 1963
The bacterial metabolism of L-hydantoin-5-propionic acid to carbamylglutamic acid and glutamic acid
J. Biol. Chem. 238:3325-3329

2865 Hasse, K., and W. Neumann. 1964
Amin-alpha-ketosaure-transaminasen in extrakten tierischer organe
Naturwissenschaftern 51:243

2866 Hasse, Kurt, and H. W. Schumacher. 1953
Determination of L-glutamic acid
Z. Anal. Chem. 137:433-437

2867 Hata, H. 1951
Corynebacterium diphtheriae. V. The attitude of diphtheria bacillus to some growth factors (calcium pantothenate, glutamic acid, and trytophan)
Kitasato Arch. Expt. Med. 23:75-84

2868 Hatano, Hideoho. 1959
Monosodium glutamate
Yuki Gosei Kagaku Kyokai Shi 17:345-352

2869 Hatch, Frederick T. 1965
Beziehung zwischen der Aminosaurenzusammensetzung und bestimmten Charakteristika von Proteinen
Nature 206:777-779

2870 Hatcher, H. J., and E. L. Schmidt. 1971
Nitrification of aspartate by Aspergillus flavus
Appl. Microbiol. 12(2):181-186

2871 Hattori, S., S. Yoshida, and I. Noguchi. 1961
Prodigiosin-kohlenhydrat-eiweiss-komplex, ein extracellulares chromoproteid von serratia marcescens
Naturwissenschaften 48:305

2872 Hattori, Teruo. 1966
Studies on L-glutamic acid fermentation. VIII. Effects of sodium salt of several bile acids on L-glutamic acid formation under excess amount of d-biotin
Nippon Nogei Kagaku Kaishi (J. Agric. Chem. Soc. Jap.) 40(6):250-260

2873 Hatway, D.E., A. Mallinson, and D.A.A. Akintonwa. 1965
Wirkung von Dieldrin, Picrotoxin und Telodrin auf den Ammoniakstoffwechsel im Gehirn
Biochem. J. 94:676-686

2874 Hatz, F. 1949
Der Einfluss zugefuhrter naturlicher aminosauren auf den alanin- und brenztraubensauregehalt des blutes. (The effect of added natural amino acids on the alanine and pyruvic acid contents of blood)
Helvet. Chim. Acta 32(1):251-256

2875 Hatz, Felix. 1948
Influence of administered natural amino acids on the free alanine and the pyruvate contents of rabbit blood
Helv. Physiol. Pharm. Acta 6C:55-56

2876 Haugaard, Gotfred, and Thomas D. Kroner. 1948
Partition chromatography of amino acids with applied voltage
J. Am. Chem. Soc. 70:2135-2137

2877 Haukenes, Gunnar. 1962
Immunochemische Untersuchungen uber das Polysaccharid A des Staphylococcus aureus. 4. Mitt. Papierchromatographie von Saurehydrolysaten
Acta Pathol. Microbiol. Scand. 55:299-307

2878 Haukenes, Gunnar. 1962
Immunochemical studies on polysaccharide A of Staphylococcus aureus. III. Some chemical and physicochemical properties
Acta Pathol. Microbiol. Scand. 55:289-298

2879 Haury, H. 1955
Glutaminsauretherapie 1943-1955
Schweiz. Apotheker-Ztg. 93:932-936

2880 Hausmann, Werner. 1952
Aminosaurezusammensetzung von kristallisierter, aus hefe isolierter anorganischer pyrophosphatase
J. Am. Chem. Soc. 74:3181-3182

2881 Havas, H. Francis, and Anne Peters McGeady. 1953
Die Wachstumsforderung und Antisulfonamidaktivitat der Pteroylglutaminsaure und verwandter Verbindungen bei Escherichia coli und Aerobacter aerogenes
J. Bact. 66:531-537

2882 Havez, R., P. Roussel, P. Degand, Y. Delmasmarsalet, and G. Biserte. 1969
Etude de substances de groupe sanguin A isolees du mucus bronchique. (Study of A blood group substances isolated from bronchial mucus)
Bull. Soc. Chim. Biol. 51(2):245-259

2883 Hawkins, W. B., F. W. McKee, G. M. B. Hawley, and A. J. Kummer. 1947
Metabolism of amino acids and casein digest in phlorizinized dogs
J. Exp. Med. 85:479-489

2884 Hawley, B. 1970
Synthetic sweeteners and sugar substitutes
Sucr. Fr. 111(3):121-128

2885 Hayaishi, O., H. Taniuchi, M. Tashiro, and S. Kuno 1961
Studies on the metabolism of kynurenic acid. I. The formation of L-glutamic acid, D- and L-alanine, and acetic acid from kynurenic acid by Pseudomonas extract
J. Biol. Chem. 236(9):2492-2497

2886 Hayaishi, O., S. Kuno, M. Tashiro, H. Taniuchi, H. Yamada, K. Horibata, T. Sakan, S. Seno, and T. Tokuyama. 1960
The mechanism of enzymatic formation of glutamic acid (GA) from kynurenic acid (KA) (Abstract)
Fed. Proc. 19(1 Pt. 1):5

2887 Hayashi, James A., and S. S. Barkulis. 1959
Untersuchungen der streptokokkenzellwand. 3. Mitt. Die aminosauren der trypsinbehandelten zellwand
J. Bact. 77:177-184

2888 Hayashi, Koichi, Moriyoshi Ishida, Tetsuo Hino, and Masami Ohara. 1962
D-amino acids. I. Determination of D-amino acids by D-amino acid oxidase
Nippon Nogeikagaku Kaishi 36(3):269-276

2889 Hayashi, T., H. Hoshino, and T. Ootsuka. 1967
Chemoreceptors in brain to gamma-hydroxybutyrate through cerebrospinal fluid of dogs
Olfaction Taste II, Proc. Int. Symp., 2nd Tokyo 1965:599-608

2890 Hayashi, Takashi. 1953
Effects of sodium glutamate on the nervous system
Keio J. Med. 3:183-192

2891 Hayashi, Takashi. 1956
Glutamic acid metabolism in brain
Shindan to Chiryo 44:481-484

2892 Hayashi, Takashi. 1960
Gamma-aminobutyric acid as the parent substance for an inhibitory and an excitory transmitter
Inhibition Nerv. Syst. Gamma-Aminobutyric Acid, Proc. Intern. Symp., Duarte, Calif. 1959:238-241

2893 Head, Marvin Laurence. 1956
Some metabolic correlates of amentia and dementia: A comparison of the physical, metabolic and psychological measures of childhood schizophrenics, mental defectives and normal children, and the effect of glutamic acid therapy upon these relationships.
Diss. Absts. 16(6):1177

2894 Heald, P. J. 1962
Die oxydation von fructose durch leber des haushuhns
Nature (London) 195:603

2895 Heald, P. J., and P. M. McLachlan. 1964
Isolierung von phosvitin aus dem plasma des mit ostrogen behandelten unreifen huhnchens
Biochem. J. 92:51-55

2896 Heald, P. J., and Patricia M. McLachlan. 1965
The synthesis of phosvitin in vitro by slices of liver from the laying hen
Biochem. J. 94(1):32-39

2897 Heald, P.J. 1961
Phosphorylserin als Bestandteil der Phosphoproteine des Plasmas von Legehennen
Nature 192:455

2898 Heater, C. D., and W. C. van der Zant. 1957
Effect of the plating medium on the survival of heat-treated cells of Pseudomonas fluorescens
Food Res. 22(2):164-169

2899 Heathcote, J. G., and F. S. Mooney. 1962
Orale behandlung der perniciosen anamie nit einem Vitamin-B12-glutaminsaure-gemisch
Nature (London) 193:380-381

2900 Heathcote, J.G., and F.S. Mooney. 1958
Eine neue darstellung der physiologischen rolle von vitamin B-12
J. Pharm. Pharm. 10:593-612

2901 Heathcote, Jogn Godfrey. 1964
Arzneimittel zur oralen behandlung der perniziosen anamie, enthaltend als wirkstoffe wenigstens eine L-aminosaure, bes. glutaminsaure, u. wenigstens ein cobalamin
Brit. Pat. 955,683 issued Apr. 15, 1964

2902 Hecht, E. 1951
New inhibitors of the first stage of the blood-clotting process
Nature (London) 167(4242):279-280

2903 Hecht, E., and Chr. Mink. 1952
Zur Methodik der Ninhydrinreaktion und Papierchromatographie im Zusammenhang mit Untersuchungen uber Gerinnungsphysiologisch interessierende Phosphatide. (The method of the ninhydrin reaction and paper chromatography in relation to investigations of phosphatides of physiological interest in relation to blood coagulation)
Biochem. Biophys. Acta 8(6):641-653

2904 Hecker, R.J., W.T. Federer, L. Powers, and M.G. Payne. 1967
Relationships of four yield characters with five chemical characters in sugar beets
J. Am. Soc. Sugar Beet Tech. 14(7):556-573

2905 Hedbom, A. 1955
Ein nativer vitamin-B12-Polypeptidkomplex
Biochim. Biophys. Acta (Amsterdam) 17:447

2906 Hedge, Balakrishna, George C. Griffith, and Edward M. Butt. 1961
Mangan-gehalt in gewebe und serum bei der bewertung einer herzmuskelschadigung. Ein vergleich mit der glutaminsaure-oxalessigsaure-transaminase im serum
Proc. Soc. Exp. Biol. Med. 107:734-737

2907 Heidermanns, C., and I. Kirchner-Kuhn. 1956
Die harnstoffsynthese in der rattenleber bei verschiedenend physiologischen zustanden und ihre beeinflussung in vitro
Zool. Jahrb. Abt. Allg. Zool. Physiol. Tiere 66(2/3):295-354

2908 Heikel, T.A.J. 1968
Inhibition of biliary secretion by icterogenin and related triterpenes. I. Effect of icterogenin, rehmannic acid, and oleanolic acetate on liver mitochondria in vitro
Biochem. Pharm. 17(6):1079-1089

2909 Heim, Fritz, P. Mitznegg, and Willi Schwarzlose. 1968
Significance of nutritional protein and amino acids for growth, and synthesis of DNA, RNA, protein, and cells in the kidney
Med. Exp. 18(1):25-32

2910 Heimer, Ralph, and Karl Meyer. 1956
Untersuchungen an sialsaure aus submaxillardrusenmucoid
Proc. Nat. Acad. Sci. USA 42:728-734

2911 Heinen, Wolfgang. 1963
Siliciumstoffwechsel bei mikroorganismen. 4. Mitt. Die wirkung organischer verbindungen, insbesondere glucose, auf den siliciumstoffwechsel bei bakterien
Arch. Mikrobiol. 45:162-171

2912 Heinivaara, Olli, and Ilmari Palva. 1963
Absorption of vitamin B12-glutamic acid mixture
Nature 199(4890):289-290

3593 Katoh, Sakae, Irie Shiratori, and Atusi Takamiya. 1962
Reinigung und einige eigenschaften von spinat-plastocyanin
J. Biochem. (Tokyo) 51:32-40

3594 Kats, V. M., and L. K. Ivanova. 1960
Glutamic acid content of final molasses
Sakharnaya Prom. 34(11):18-23

3595 Katsuki, Hirohiko. 1955
Stoffwechselfunktion von Biotin. 1. Mitt. Einfluss von Biotin auf den organischen Saurestoffwechsel auf den Reisbrandpilz
Nippon Kagaku Zassi 76:941-944

3596 Katsumata, Masuyuki, Kazunari Hagiwara, Nobusada Inagaki, Yasuhiro Iinuma, and Eiichi Sakakibara. 1960
Untersuchung uber den stoffwechsel von bacillus aneurinolyticus kimura und aoyama. 4. Mitt. Der Effekt des Entwicklungsstadiums auf den Stoffwechsel von Bacillus aneurinolyticus
Vitamins (Kyoto) 19:87-91

3597 Katsumata, Masuyuki, Keiko Tsujimoto, Masako Sakamoto, and Eiichi Sakakibara. 1962
Untersuchungen uber den Stoffwechsel von Bacillus aneurinolyticus Kimura et Aoyama. 10. Mitt. Charakter der Bakterienkomponenten in zellfreien Systemen
Vitamins 25:50-56

3598 Katsumata, Masuyuki, Shinpei Jokota, Kazunari Hagihara, Toshikazu Seguchi, Yoshiyuki Shino, and Eiichi Sakakibara. 1959
Untersuchungen uber den stoffwechsel des bacillus aneurinolyticus kimura et aoyama. 2. Mitt. Begunstigende und hemmende faktoren bei der atmung des B. aneurinolyticus
Vitamins (Kyoto) 18:667-671

3599 Katsunuma, Nobuhiko, and Mitsuko Okada. 1962
Untersuchung uber alternative Kupplungsreaktion von an Mitochondrien gebundene Transaminase und Tricarbonsaurecyclus
Vitamins 25:321-329

3600 Katsura, Hirosumi. 1955
Comparative studies on the respiratory enzyme activities of thyroid, adrenal cortex and adrenal medulla
Endocrinol. Jap. 2(2):155-162

3601 Katsura, Shigehiro. 1954
Chemotherapy of tsutsugamushi disease
Acta Med. Biol. (Japan) 2:725-753

3602 Katunuma, N., M. Okada, and A. Hujino. 1964
The control of glutamate metabolism by (tricarboxylic acid) TCA cycle
Int. Congr. Biochem. 6(9):723

3603 Katunuma, Nobuhiko, and Mitsuko Okada. 1962
Die Bildung von Glutamat aus Kohlenhydraten oder Fettsauren durch den Tricarbonsaurecyclus
Proc. Jap. Acad. 38:572-577

3604 Katunuma, Nobuhiko, and Mitsuko Okada. 1962
Eine alternative Kupplungsreaktion Mitochondriengebundener Transaminase und Tricarbonsaurecyclus und ihre Rolle im Stoffwechsel
J. Vitaminol. 8:309-314

3605 Katunuma, Nobuhiko, and Mitsuko Okada. 1963
Respiration inhibition of TCA tricarboxylic acid cycle and control of glutamic acid synthesis by ammonia in rat liver mitochondria
Biochem. Biophys. Res. Commun. 12(3):252-256

3606 Katunuma, Nobuhiko, Kazuko Mikumo, Kakoto Matsuda, and Mitsuko Okada. 1962
Unterschiede zwischen den transaminasen der mitochondrien- und der loslichen fraktion. 1. Mitt. Glutaminsaure-brenztraubensaure-transaminase
J. Vitaminol. (Kyoto) 8:68-73

3607 Katunuma, Nobuhiko, Mitsuko Okada, Takeo Matsuzawa, and Yoshikata Otsuka. 1965
Studies on ornithine-keto acid transaminase. II. Role in metabolic pathway
J. Biochem. (Tokyo) 57(3):445-449

3608 Katunuma, Nobuhiko, Toru Shoda, and Hiroko Noda. 1957
Enzymic study of folic acid biosynthesis by Mycobacterium avium
J. Vitaminol. (Osaka) 3:77-85

3609 Katz, Edward, and William A. Goss. 1958
Der einfluss von aminosauren auf die biosynthese von actinomycin
Nature (London) 182:1668

3610 Katz, Elaine J., and Robert J. Hasterlik. 1954
Aminoacidurie nach Bestrahlung des ganzen menschlichen Korpers
J. Lab. Clin. Med. 44:816-817

3611 Katz, Elaine J., and Robert J. Hasterlik. 1955
Aminoaciduria following total-body irradiation in the human
J. Natl. Cancer Res. 15(4):1085-1107

3612 Katz, J., and I. L. Chaikoff. 1954
A chromatographic-radioautographic method for study of acetate utilization in animal tissues
J. Biol. Chem. 206:887-900

3613 Katz, Joseph, and I.L. Chaikoff. 1955
Systheses via the Krebs' cycle in the utilization of acetate by rat liver slices
Biochem. Biophys. Acta 18(1):87-101

3614 Katz, Joseph, and Jack Kornblatt. 1962
Propionate metabolism by slices of mammary gland and liver of lactating rat
J. Biol. Chem. 237:2466-2473

3615 Katznelson, H. 1947
Nutritional requirements of Streptococcus apis
J. Bacteriol 53:125

The respiratory activity of certain obligately halophilic bacteria with high salt requirements
J. Bact. 71:244-249

3617 Kauffman, Thomas, and Reinhard Kodding. 1957
Uber aminosaurehaltige atherlosliche verbindungen aus granasediment von Spinacia oleracea. (On ether-soluable compounds containing amino acids from grana sediment of Spinacia oleracea)
Z. Naturforsch. 12b(11):735-736

3618 Kauffmann, Thomas. 1957
Uber lose gebundene aminosauren im grana-eiweiss von dikotyledonen. (On loosely bound amino acids in the grana-protein of Dicotyledons)
Z. Naturforsch. 12b(11):736-737

3619 Kaufman, Bernard T., and Nathan O. Kaplan. 1959
Die wirkung von substraten auf das quellen und den pyridinnucleotidverlust von rattenlebermitochondrien
Biochim. Biophys. Acta (Amsterdam) 32:576-577

3620 Kaufmann, W. 1961
Effect of protein content of fodder on the digestive processes in the rumen of cattle
Kiel. Milchwirtsch. Forschungsber. 13:243-266

3621 Kawada, S., H. Fujiwara, and T. Maeda. 1960
Urinary amino acid excretion in feeble-minded prisoners
Annu. Rep. Nat. Inst. Nutr. (Tokyo) 1960:28-31

3622 Kawada, Shoji, Haruo Fujiwara, Toshio Maeda, Chiemi Nakamura, and Kimiyo Kaneda. 1963
Amino acid metabolism in the feeble-minded person. II. Urinary and fecal amino acids excretion of feeble-minded prisoners
Ann. Rept. Natl. Inst. Nutr. 1963:11-6

3623 Kawaharada, Masamichi. 1944
Studies on trypsin activity. IV. Enzymically split-products of proteins treated with pancreatic juice
Tohoku J. Exp. Med. 47:92-96

3624 Kawai, Akira, and Morihiko Sakaguchi. 1968
Histidine metabolism in fish: II. Formation of urocanic formiminoglutamic, and glutamic acids from histidine in the livers of carp and mackerel.
Bull. Jap. Soc. Sci. Fish. 34(6):507-511

3625 Kawai, Kiyoshi. 1957
Nitrogen metabolism of the brain. II. Ammonia and amino acid content of the normal rat brain
Okayama-Igakkai-Zasshi 69:2477-2483

3626 Kawai, Yasuo, and Teijiro Uemura. 1966
Studies on metabolism of pyrrolidone carboxylic acid in bacteria. II. L-Glutamic acid formation from pyrrolidone carboxylic acid by Pseudomonas alcaligenes
Agric. Biol. Chem. 30(5):438-446

3627 Kawai, Yasuo, Ko Aida, and Teijiro Uemura. 1969
Studies on metabolism of pyrrolidone carboxylic acid in bacteria: III. Cleavage of pyrrolidone carboxylic acid to L-glutamic acid by the enzyme preparation obtained from Pseudomonas alcaligenes ATCC-12815, with special references to optical isomerization of pyrrolidone carboxylic acid by the enzyme preparation
Agric. Biol. Chem. 33(2):212-219

3628 Kawai, Yoshio, Yasuo Kawai, and Teijiro Uemura. 1965
Stoffwechsel von pyrrolidoncarbonsaure in bakterien. 1. Mitt. Anreicherung von L-glutaminsaure durch bakterien in gegenwart von pyrrolidomcarbonsaure
Agric. Biol. Chem. (Tokyo) 29:395-402

3629 Kawamura, Yurio, Kuniharu Takenouchi, Teikichi Tamuki, Michio Satani, Yoshiki Sakata, and Takemi Hanaoka. 1970
Preparation of free-flowing spices containing salt and sodium glutamate
Ger. Pat. 1,492,957 issued Mar. 26, 1970

3630 Kawamura, Yuris, Teikichi Tamuki, Kuniharu Takenovchi, Michio Satani, Yoshiki Sakata, and Takeine Hanaora (to Ajinomoto Co., Inc.). 1962
Flavoring and the resulting product
U.S. Pat. 3,039,880 issued Jun. 19, 1962

3631 Kawanishi, Gosei, and Kensuke Saito. 1966
Free amino acids and related compounds in sweet and sour cream butter
Nippon Chikusan Gakkaiho 37:430-435

3632 Kawano, Kyoichiro. 1960
Influences of metabolic substances intracarotically injected to mice on the animals' electrocorticograms
Osaka Shiritsu Daigaku Igaku Zasshi, Suppl. 2:3037-3047

3633 Kawano, Tatsu. 1958
Verwendung von aminosauren als einzige stickstoffquelle fur Escherichia coli No. 1
J. Pharm. Soc. Jap. 78:126-128

3634 Kawano, Tatsu, and Masako Asakawa. 1964
Verteilung der aminosauredecarboxylasen in verschiedenen mikroorganismen
J. Pharm. Soc. Jap. (Yakugaku-Zasshi) 84:884-886

3635 Kawase, Shigemi. 1964
Aminosaurenzusammensetzung der blut- und mitteldarmproteine der seidenraupenlarve bombyx mori l.
J. Sericult. Sci. Japan 33:377-381

3636 Kawase, Yoshio, Kazuyuki Imada, and Hisao Hirose. 1958
Aminsaurenanalyse an tuberkulosem Material durch Papierchromatographie und Hochspannungspapierelektrophorese
Med. Biol. 48:192-196

3637 Kawata, Saburo. 1958
Nitrogen metabolism of the brain. V. Ammonia and glutamine contents of the brain of normal rats and mice
Okayama Igakkai Zasshi 70:1099-1102

3638 Kawerau, Einhart, and W. R. Pearon. 1944
Ascorbic acid. II. Factors determining stability in aqueous solution
Sci. Proc. Royal Dublin Soc. 23:171-180

3639 Kay, E.R.M. 1965
Wirkungen von Tween 80 auf den in vitro-Stoffwechsel von Zellen des Ehrlich-Lettre-Asziteskarzinoms
Cancer Res. 25(Part I):764-768

3640 Kay, R.E., D.C. Harris, and C. Entenman. 1956
Harnausscheidung und Plasmaspiegel freier, ninhydrinreagierender Verbindungen bei rotgenbestrahlten Ratten
Am. J. Physiol. 186:175-179

3641 Kay, Robert E., Dennis C. Harris, and Cecil Entenman. 1956
Quantitative auswertung der ninhydrinfarbreaktion in der papierchromatographie
Arch. Biochem. Biophys. 63:14-26

3642 Kay, W. W., and Audrey P. Gronlund. 1969
Influence of carbon or nitrogen starvation on amino acid transport in Pseudomonas aeruginosa
J. Bact. 100(1):276-282

3643 Kaya, Toshio, Shigemasa Osaki, and Tetsuo Sato. 1961
Untersuchungen uber caeruloplasmin. 3. Mitt. Endstandige aminosauren und zucker im schweine-caeruloplasmin
J. Biochem. (Tokyo) 50:24-28

3644 Kayashi, Yoshio. 1959
Tissue respiration of organs in rachitic white rats. III. The influence of butyric and acetic acids and various amino acids on the tissue respiration of the liver and the kidney. Statistical observation on the tissue respiration of the liver and the kidney
Nippon Shonika Gakukai Zasshi 63:1261-1268

4200 Kyowa Fermentation Industry Co., Ltd. 1960
L-Glutamic acid manufacture by fermentation
Jap. Pat. 743 issued Feb. 4, 1960

4201 Kyowa Fermentation Industry Co., Ltd. 1960
L-Glutamic acid
Brit. Pat. 849,279 issued Sept. 21, 1960

4202 Kyowa Fermentation Industry Co., Ltd. 1960
Glutamic acid
Jap. Pat. 15,847 issued Oct. 21, 1960

4203 Kyowa Fermentation Industry Co., Ltd. 1964
Fermentative production of L-glutamic and alpha-keto-glutaric acids
Fr. Pat. 1,447,541 issued Jul. 19, 1966

4204 Kyowa Fermentation Industry Co., Ltd. 1965
Improvement of seasoning products, foods, and beverages
Belg. Pat. 655,085 issued Feb. 16, 1965

4205 Kyowa Fermentation Industry Co., Ltd. 1965
Mixed seasonings
Fr. Pat. 1,400,912 (Cl. A231) issued May 28, 1965

4206 Kyowa Fermentation Industry Co., Ltd. 1965
Mixed condiment
Fr. Pat. 1,397,711 issued Apr. 30, 1965

4207 Kyowa Fermentation Industry Co., Ltd. 1965
Taste improvers for food
Belg. Pat. 666,087 issued Oct. 18, 1965

4208 Kyowa Fermentation Industry Co., Ltd. 1966
Production of L-glutamic acid
Fr. Pat. 1,461,030 issued Dec. 2, 1966

4209 Kyowa Fermentation Industry Co., Ltd. 1966
Manufacture of L-glutamic acid by fermentation
Jap. Pat. 21,755 issued Dec. 19, 1964

4210 Kyowa Fermentation Industry Co., Ltd. 1966
Seasoning containing aspartic acid
Fr. Pat. 1,438,831 issued May 13, 1966

4211 Kyowa Fermentation Industry Co., Ltd. 1967
Seasonings
Fr. Pat. 1,487,605 issued July 7, 1967

4212 Kyowa Fermentation Industry Co., Ltd. 1967
Seasonings
Fr. Pat. 1,480,152 issued May 12, 1967

4213 Kyowa Fermentation Industry Co., Ltd. 1968
Recovery of glutamic acid
Jap. Pat. 68 05,376 issued Feb. 28, 1968

4214 Kyowa Fermentation Industry Co., Ltd. 1968
A substance having the natural aroma of cooked meat and the method of its preparation
Fr. Pat. 1,534,770 issued Aug. 2, 1968

4215 Kyowa Fermentation Industry Co., Ltd., Japan. 1966
L-Glutamic acid production by fermentation.
Brit. Pat. 1,131,120 issued Jan. 29, 1969

4216 Kyowa Fermentation Industry Co., Ltd., Japan. 1968
Preparation of L-glutamic and alpha-ketoglutaric acids by fermentation.
Fr. Addn. 90,742 issued Feb. 2, 1968

4217 Kyowa Fermentation Industry Co., Ltd., Japan. 1969
Manufacture of L-glutamic acid by fermentation.
Fr. Pat. 1,552,503 issued Jan. 3, 1969

4218 Kyowa Fermentation Industry. 1968
Dry yeast
Fr. Pat. 1,535,830 (Cl. C 12c) issued Aug. 9, 1968

4219 Kyowa Hakko Kogyo Co. Ltd. Japan. 1963
Gewinnung reiner Glutaminsaure
Fr. Pat. 1,307,136 issued Feb. 11, 1963

4220 Kyowa Hakko Kogyo Co. Ltd. 1959
Herstellung von L-pyrrolidoncarbonsaure
A. P. 3,003,922 issued Nov. 4, 1959

4221 Kyowa Hakko Kogyo Co. Ltd. 1970
Seasoning compositions
Brit. Pat. 1,178,905 issued 1970

4222 Kyowa Hakko Kogyo Co. Ltd. 1970
Mixed condiment
Jap. Pat. 12,265 issued 1970

4223 Kyowa Hakko Kogyo Co. Ltd. 1970
Mixed crystal condiments
Jap. Pat. 12,264 issued 1970

4224 Kyowa Hakko Kogyo Co. Ltd., Tokyo. 1964
Gewinnung von L-glutaminsaure durch garung
Port. Pat. 43,923 issued Dec. 15, 1965

4225 Kyowa Hakko Kogyo Co. Ltd., Tokyo, Japan. 1959
Herstellung von L-pyrrolidoncarbonsaure
E.P. 884,415 issued Nov. 3, 1959

4226 Kyowa Hakko Kogyo Kabushiki Kaisha. 1956
Herstellung von l-Glutaminsaure
F. P. 1,185,383 issued Jul. 31, 1959

4227 Kyowa Hakko Kogyo Kabushiki Kaisha, Tokyo, Japan. 1957
Herstellung von l-glutaminsaure(I)
E. P. 839,597 appl. for March 14, 1957

4228 L'vova, A. I., E. E. Mel'nikova, G. A. Galegov, and S. Ja. Gajdamovic. 1966
Stimulierende Wirkung des L-Glutamins auf die Vermehrung des Virus der Venezuela-Enzephalomyelitis
Vopr. Virusol. 11:599-600

4229 L'vova, V.V., and N.A. Fedorov. 1961
The role of vitamin B12 in increasing the efficiency of parenteral feeding with protein hydrolyzate during surgical trauma
Vitamin Resursy Ispol'z Akad. Nauk SSSR, Inst. Biokhim. Sb 5:261-268

4230 L'vova, V.V., and N.A. Fedorov. 1961
The role of vitamin B12 in the rise of the parenteral protein hydrolyzate nutrition efficacy in surgical trauma
Byull. Eksp. Biol. Med. 52(12):23-28

4231 Labbe, Robert F., Richard C. Thomas, Vernon H. Cheldelin, Bert E. Christensen, and Chih H. Wang. 1952
Aus C-14-markiertem Pyruvat und Acetat sich herleitende radioaktive Hefefraktionen
J. Biol. Chem. 197:655-661

4232 Labby, Daniel H. 1958
Hepatic coma. Prophylaxis and management
Am. J. Digest. Dis. 3:126-136

4233 Laborit, H., B. Broussolle, and R. Perrimond-Trouchet. 1957
Pharmakologische untersuchungen uber den mechanismus der krampfe durch erhoten sauerstoffdruck bei mausen
J. Physiol. 49:953-962

4234 Laborit, H., J. Boulet, and B. Weber. 1959
Experimentelle prufung der flussigen nahrung bei der ratte
Anesth. Analg., Reanimat. 16:682-690

4235 Lacourt, A., G. Sommereyns, C. Francotte, and N. Delande. 1953
Qualitative mikroanalyse auf grund physikalischer konstanten: Identifizierung von aminosauren
Nature (London) 172:906-907

4236 Lacourt, A., Gh. Sommereyns, C. Francotte, and N. Delande. 1953
Microanalysis of organic functional groups based on the determination of physical constants. Identification of amino acids

Ein synthetisches medium zur erzeugung von novobiocin durch Streptomyces spheroides
Antibiotics Annu. 1040-1045

4953 Miller, Irving L., M. Tsuchida, and Edward A. Adelberg. 1953
Die Transaminierung von Kynurenin
J. Biol. Chem. 203:205-211

4954 Miller, J. J. 1963
Stoffwechsel der hefesporulation. 5. Mitt. Stimulation und hemmung der sporenbildung und des wachstums durch stickstoffverbindungen
Can. J. Microbiol. 9:259-276

4955 Miller, J. J. 1964
A comparison of the effects of several nutrients and inhibitors on yeast meiosis and mitosis
Exp. Cell. Res. 33:46-49

4956 Miller, Leon L., and William F. Bale. 1954
The metabolic conversion of the carbon chain of lysine-6-C14 to glutamic acid, aspartic acid and arginine
Arch. Biochem. Biophys. 48(2):361-369

4957 Miller, Leon L., and William T. Burke. 1956
Biochemische untersuchungen von experimentellem pracarcinom: aminosaurestoffwechsel in der isolierten perfundierten rattenleber; untersucht mit hilfe von 14C(6)-Lysin und 14C(2)-histidin
Proc. Int. Conf. Peaceful Uses Atomic Energy 10:492-495

4958 Miller, Russell Jr., and Kenneth Goodner. 1953
The stability of lyophilized BCG vaccine
Yale J. Biol. Med. 25:262-283

4959 Miller, Shulamith, Y. Avidor, and J. Mager. 1963
Mechanismus der stimulierenden wirkung von kalium auf die atmung von Escherichia coli
Israel J. Chem. 1:198-199

4960 Miller, Shunamith, Y. Avi-dor, and J. Mager. 1964
Mechanism of potassium-simulated respiration in Escherichia coli
J. Gen. Microbiol. 36:123-131

4961 Millet, Jacqueline, and Jean Paul Aubert. 1960
Metabolism of glutamic acid during sporulation of Bacillus megaterium
Ann. Inst. Pasteur 98:282-290

4962 Milligan, L. P. 1970
Carbon dioxide fixing pathways of glutamic acid synthesis in the rumen
Can. J. Biochem. 48(4):463-468

4963 Milliken, J. R., and J. L. Standen. 1951
Investigation into effects of glutamic acid on human intelligence
J. Neurol. Neurosurg. Psychiat. 14:47-54

4964 Millin, D. J., and M. J. Saltmarsh-Andrew. 1965
Nuceotidpeptide in Hefe
Nature (London) 208:468-470

4965 Mills, D. A., R. Coyne, B. Pollara, and R. W. von Korff. 1964
Wirkung von Plasmin auf Fibrinogen and Fibrin. 1. Mitt. Anderung der N-endstandigen Reste
Biochim. Biophys. Acta (Amsterdam) 86:527-534

4966 Minaev, P. F., and R. I. Skvortsova. 1957
The effect of x-rays on nerve tissue metabolism
Vopr. Biokhim. Nerv. Sist., Akad. Nauk Ukr. S.S.R., Inst. Biokhim., Trudy 2-i Nauch. Konf. Kiev 1957:289-294

4967 Minaev, P.F. 1954
The decisive role of the nervous system in the etiology and pathogenesis of traumatic shock
Dokl. Akad. Nauk. SSSR 99(5):865-868

4968 Minajew, P.F. 1950
Die Heilung des traumatischen Schocks bei Tieren durch Adenosintriposphorsaure im Verein mit verschiedenen Stoffen
Ber. Akad. Wiss. UdSSR (N.S.) 74:397-400

4969 Minami, Kazumori. 1958
Isolierung eines Bodencoccus, der fahig ist, "Tween 80" als alleinige Kohlenstoffquelle auszunutzen
Nature (London) 181:430-431

4970 Minami, Kazumori, Saburo Hyodo, and Isao Yamane. 1955
Growth and respiration of tubercle bacteria
Fukushima J. Med. Sci. 2:99-120

4971 Minard, Frederick N., and Isa K. Mushahwar. 1966
Synthesis of gamma-aminobutyric acid from a pool of glutamic acid in brain after decapitation (in the rat)
Life Sci. 5(15):1409-1413

4972 Mineura, Kazuyuki, and Masao Tanaka. 1968
Enzymatic studies on the optical activity of amino acids. X. Acylase activities of glutamic acid-producing bacteria and related strains
Nippon Nogei Kagaku Kaishi 42(4):216-221

4973 Mino, Shoichiro, and Yosuke Mino. 1955
Koji for the brewing of Mieki
Jap. Pat. 4445 issued Jun. 28, 1955

4974 Minor, L.J., A.M. Pearson, and C.M. Stine. 1966
Chicken flavor studies
J. Agric. Food Chem. 14(4):416-419

4975 Minz, Bruno, Georges N. Cohen, and Germaine Cohen-Bazire. 1949
Biological synthesis of the coenzyme of the acetylating diastase (coenzyme A) by rabbit intestine from pantothenate and glutamate, under the influence of thyroxine
Compt. Rend. 229:389-391

4976 Mircevova, Libuse, Vladimir Jirgl, and Jana Vosykova. 1962
Stoffwechsel von alpha-ketoglutarsaure in menschlichen erythrocyten
J. Lab. Clin. Med. 60:110-116

4977 Mirone, D., and G. Cucuzza. 1958
Chromatographische Untersuchung der Aminosauren in der Sauton-Kulturflussigkeit nach 60 Tagen Entwicklung von Mycobacterium tuberculosis
Riv. Ist. Sieroterap. Ital. 33:67-71

4978 Mironow, W.A., and N.S. Jegorow. 1964
Oxydation der brenztraubensaure und biosynthese des novobiocins durch actinomyces spheroides
Antibiotika 9:681-685

4979 Mirza, A., E. Tulea, Fr. Schneider, and D. Neagoe. 1965
Biochemistry of the stimulating effect of L-glutamic acid and of gamma-aminobutyric acid on the interoceptors (in Romanian)
Studii Cercet. Fiziol. 10(3):281-289

4980 Mirzoyan, S. A., B. A. Kazaryan, and V. P. Akopyan 1969
Presence of gamma-aminobutyric acid in the brain and main blood vessels of man and animals (in Russian)
Dokl. Akad. Nauk SSSR 186(1):231-232

4981 Mirzoyan, S. A., B. A. Kazaryan, and V. P. Akopyan 1970
Dekarboksilaznaya aktivnost' glutaminovoi kisloty v sosudakh mozga. (Decarboxylase activity of glutamic acid in cerebral vessels)
Dokl. Akad. Nauk SSSR 190(5):1241-1242

4982 Misarin, S. I. 1966
Einfluss der Photoperioden auf die Zusammensetzung der freien Aminosauren und Amide in den Organen der Zwiebel
Fiziol. Rast. 13:730-732

4983 Mishchenko, I.I., and S.R. Frenkel. 1966
Conversions of glutamic acid in rat brain tissue with disturbed function during carbon monoxide poisoning
Ukr. Biokhim. Zh. 38(6):585-589

4984 Mishchuk, R. Ts., L. D. Bobrovnik, and K. D. Zhura 1968
The removal of nonsugars in the electroionic cleaning of molasses (in Russian)
Pishch. Tekhnol. 1968(4):79-82

4985 Mishenko, E.P., and E.I. Gol'dman. 1969
Technology and equipment for sausage production
Moscow, USSR: Pishch. Prom-st. 302 pp.

4986 Misiewicz, Leszek, and Alicja Choroszewska. 1965
Free amino acid levels in the secretion of human uterus mucosa in the estrogen and progesterone phases (in Polish)
Acta Physiol. Polon. 16(6):851-857

4987 Misiewicz, Leszek, Maria Rakowska, Barbara Pliszka, and Swiatoslaw Ziemlanski. 1968
Effect of certain steroid hormones on free amino acids in the uterine cavity fluid of rats
Acta Physiol. Pol. 19(5):625-634

4988 Mison-Crighel, Nella, Noemi Luca, and E. Crighel. 1965
The effect of an epileptogenic focus, induced by topical application of mescaline, on glutamic acid, glutamine and GABA in the neocortex of the cat
J. Neurochem. 11(5):333-340

*4989 Mital, H.C., and R.B. Mathur. 1969
Preparation and evaluation of certain protein hydrolysates
Pharm. Acta Helv. 44:389-394

4990 Mitina, V. S., and V. I. Rubin. 1955
The relative content of amino acids of S and R forms of intestinal rods
Zh. Mikrobiol., Epidemiol. Immunobiol. 5:105-106

4991 Mitoku, Shitoshi, Yasuya Ohori, Shoji Ebisawa, and Kazuyoshi Kinbara. 1970
Effect of amino acids supplemented to low protein corn-soya diet on egg production of laying hens (in Japanese)
Jap. Poultry Sci. 7(3):131-138

4992 Mitolo, M. 1963
Quantitative distribution of the glutamate system (gamma-aminobutric and glutamic acids, glutamine, reduced glutathione) in the neuraxis of albino rats of various ages
Arch. Fisiol. 62:172-193

4993 Mitra, B. N. 1936
Die Racemisierung der Proteine des Choleravibrios und verwandter Organismen II. Die Monoaminosauren
Indian J. Med. Res. 23:579-588

4994 Mittler, T. E. 1953
Amino acids in phloem sap and their excretion by aphids
Nature 172:207

4995 Miuno, D., and S. Kosaka. 1960
The nutritional requirements of bacteria. II. The nutrition of Shiga dysentery bacteria
J. Bact. (Japan) 5:53-57

4996 Mix, Hermann. 1959
Nichtenzymatische transaminierung zwischen alpha-aminosauren und alpha-ketosauren in gegenwart von metallionen
Hoppe-Seyler's Z. Physiol. Chem. 315:1-12

4997 Miyai, Kyoichi, Isao Tsuruo, Ryoji Kodaira, Shiro Hayakawa, Toru Akimoto, and Keizo Goto. 1963
Studies on glutamic acid fermentation by Microbacterium ammoniaphilum. I. Effect of cystine on fermentative production of glutamic acid (abstract)
Agric. Biol. Chem. 27(2):A7

4998 Miyai, Kyoichi, Keizo Goto, Isao Tsuruo, Ryoji Kodaira, and Toru Akimoto. 1963
Studies on L-glutamic acid fermentation by Microbacterium ammoniaphilum. III. Effect of the glutamic acid producing bacteria.
Agric. Biol. Chem. 27(2):A7

4999 Miyai, Kyoichi, Ryoji Kodaira, Isao Tsuruo, Keizo Goto, and Toru Akimoto. 1963
Studies on L-glutamic acid fermentation by Microbacterium ammoniaphilum. II. Biotin-effect of L-glutamic acid production
Agric. Biol. Chem. 27(4):243-248

5000 Miyamoto, Haruo, Kiyoto Akama, Etsuko Morita, and Toshio Ikeda. 1953
Investigation of amino acid metabolism in Hemophilus pertussis by paper chromatography
Gunma J. Med. Sci. 2:157-162

5001 Miyao, Gentaro. 1950
Amino acid composition of the chromosome
Science (Japan) 20:520

5002 Miyashita, Shiro. 1956
Studies on the nitrition of Candida. II. Assimilation of amino acids by Candida
Jap. J. Bact. 11(11):953-960

5003 Miyata, Kinichi. 1961
Protein metabolism in the cerebrospinal fluid in experimental hepatic disturbance
Iwate Igaku Zasshi 13:345-359

5004 Miyata, Norikazu. 1965
Clinical and experimental investigations on ammonia metabolism in hepatic injuries (in Japanese)
Nagoya Shiritsu Daigaku Igakkai Zasshi 16(2):468-509

5005 Miyauchi, David T., and Donald C. Malins. 1957
Chemical components formed during the spoilage of fish
Commer. Fish. Rev. 19(1):26-29

5006 Miyazaki, Toru. 1963
Paper-chromatographic investigation of free amino acids following x-ray irradiation on radiology technicians
Wakayama Med. Rept. 8:15-20

5007 Mizon, J., and P. Boulanger. 1966
Glucose, pyruvate, and lactate oxidation in normal and neoplastic cells
Compt. Rend. Soc. Biol. 160(4):759-763

5008 Mizon, J., P. Boulanger, and R. Osteux. 1964
The spontaneous degradation of C-14-labeled amino acids, a source of error during metabolic investigations
Bull. Soc. Chim. Biol. 46(5/6):759-767

5009 Mizumoto, Susumu. 1956
Studies on Lenzites abietina Fr. and some of its allied species. 8. Nitrogen sources of L. abietina Fr., L. subferruginea Berk., L. trabea (Pers.) Fr. and L. saepiaria (Wulf.) Fr.
J. Jap. Forest. Soc. 38(8):311-313

5010 Mizuno, Den'ichi, and Shogo Kosaka. 1951
Studies on the nitritional requirements of bacteria. VI. Nitrogen requirements of staphylococci and the influence of pyridoxine thereon
Jap. Med. J. 4(6):361-368

5011 Mizuno, Denichi, and Shogo Kosaka. 1950
Studies on the nutritional requirements of bacteria. II. On the nutrition of Shigella dysenteriae
Jap. Med. J. 3(2):99-105

5012 Mizuno, Katsuyoshi, Kuno Ozawa, and Yukio Kuno. 1966
Synthesis of some colored products related to rhodopsin and its degradation products
Exp. Eye Res. 5(4):276-285

5013 Mizushima, Shoji. 1957
Purified D-glutamic-aspartic oxidase of Aspergillus ustus
J. Gen. Appl. Microbiol. (Tokyo) 3:233-239

5014 Mizushima, Shoji. 1958
Metabolism of D-amino acids in microorganisms. VI. The occurrence of D-glutamic acid oxidizing enzymes in fungi
J. Gen. Appl. Microbiol. (Tokyo) 4:12-20

5015 Mizushima, Shoji, Kazuo Isaki, Hajime Takahashi, and Kinichiro Sakaguchi. 1956
Determination of D-glutamic and D-aspartic acid content of malignant tumors and normal tissues by means of a new oxidase
Gann 47:91-95

5016 Moat, A. G., and E. K. Emmons. 1954
The amino acid nutrition of yeast in relationship to biotin deficiency
J. Bact. 68(6):687-690

5017 Moat, Albert G., Charles N. Wilkins, Jr., and Herman Friedman. 1956
A role for biotin in purine biosynthesis
J. Biol. Chem. 224(2):752-758

5018 Moat, Albert G., Charles N. Wilkins, Jr., and Herman Friedman. 1956
Eine funktion des biotins bei der purinbiosynthese
J. Biol. Chem. 223:985-991

5019 Mochizuki, Akira, and Ya-Pin Lee. 1970
Effects of thyroid hormones on amino acid and protein metabolism: II. Glutamate concentration in rat tissues after thyroidectomy and thyroid hormone treatment
Endocrinology 87(4):816-819

5020 Moehler, Clement, and Werner Volley. 1969
Determination of hydroxyproline and glutamic acid in meat products. II. Colorimetric determination of hydroxyproline; hydroxyproline-glutamic acid ratio in meat and meat products
Z. Lebensm.-Unters. -Forsch. 140(5):257-269

5021 Moehler, Klement, and Werner Volley. 1967
Analysis of proteins in meat products
Z. Lebensm.-Unters. Forsch. 133(3):179

5022 Moffat, Edward D., and Ralph I. Lytle. 1959
Ein Mehrfarbenverfahren zum Nachweis von Aminosauren auf Papierchromatogrammen
Anal. Chem. 31:926-928

5023 Mogi, Koya, Yoshihiro Oshima, and Tetsuo Hayashi. 1961
Soy sauce production using a submerged culture. VIII. Factors in the increase of the free glutamic acid
Hakko Kogaku Zasshi 40:532-538

5024 Mohler, K. 1970
Determination of connective tissue in meat and meat products
Husipar 19(1):2-6

5025 Mohler, K., and W. Volley. 1969
Determination of hydroxyproline and glutamic acid in meat products. I. Influence of hydrolysis
Z. Lebensm.-Unters. -Forsch. 140(4):189-199

5026 Mojonnier, M. L., L. R. Hedrick, and Thelma Porter 1955
The microbiological assay of the amino acids of five genera of yeasts grown under controlled conditions
J. Nutr. 57(4):579-592

5027 Mokhoreva, S.I. 1967
Change of oxidative phosphorylation of the large hemispheres by x-ray and neutron irradiation
Dokl. Akad. Nauk Beloruss. SSR 11(1):65-67

5028 Moldave, Kivie, Richard J. Winzler, and Harold E. Pearson. 1953
Die Markierung der Aminosauren von normalem und virusinfiziertem Mausegehirn mit C-14 in vitro
J. Biol. Chem. 200:357-365

5029 Moli, S.L. 1957
Experimental studies on the specific dynamic action of protein hydrolyzates administered orally
Riv. Chin. Pediat. 60:146-150

5030 Molin, Nils. 1964
Wirkung verschiedener nahrsubstratkomponenten auf die biologische Artivitat von N-alpha-palmitoyl-L-lysyl-L-lysin-athylester
Physiol. Plant. (Copenhagen) 17:931-939

5031 Molnar, Gyula, and Ferenc Sztaricskai. 1967
Thin-layer chromatography of cerebrospinal fluid amino acids
Kiserl. Orvostud. 19(5):534-538

5032 Molotkowski, Ju.G., and W.F. Kaschuro. 1964
Die rolle der eiweisssynthese bei der Ablosung der Atmungssysteme in Kartoffelscheiben
Ber. Akad. Wiss. UdSSR 158:239-241

5033 Momose, Haruo. 1961
Untersuchungen von L-glutaminsaure bedurftigen mutanten von bacillus subtillis. 2. Mitt. Unausgeglichener Wachstumstod, beobachtet an der mutante 3d
J. Gen. Appl. Microbiol. (Tokyo) 7:365-369

5034 Momose, Haruo. 1961
Untersuchungen von D-glutaminsaure bedurftigen mutanten von bacillus subtilis. 1. Mitt. Isolierung von mutanten
J. Gen. Appl. Microbiol. (Tokyo) 7:359-364

5035 Momose, Haruo, and Yonosuke Ikeda. 1960
Isolation of mutants of Bacillus subtilis requiring D-glutamic acid
Nature 186(4724):567-568

5036 Momose, Haruo, and Yonosuke Ikeda. 1960
Physiology of D-glutamic acid-requiring mutants of Bacillus subtillis
Nature 186(4727):818

5037 Momose, Tsutomu, and Hiroko Tanaka. 1954
Organic qualitative analysis. IV. Identification of carboxylic acids by S-(p-nitrobenzyl)- and S-(2,4-dinitrobenzyl)thiuronium chloride
Pharm. Bull. (Japan) 2:152-154

5038 Monaco, P. 1956
Free amino acids in some organs of the dove with avitaminosis B1
Boll. Soc. Ital. Biol. Sper. 32:713-716

5039 Monaco, P., and F. Rubino. 1958
Content of aspartic acid, glutamic acid, and alanine in the heart, diaphragm, and skeletal muscle of the fasting guinea pig
Boll. Soc. Ital. Biol. Sper. 34:157-158

5040 Monaco, P., V. Castro, and U. Quartrini. 1957
Weiterer beitrag zur kenntnis des verhaltens der freien aminosauren in den organen von tauben, die einer gleichzeitigen bilateralen vagotomie unterzogen wurden
Boll. Soc. Ital. Biol. Sper. 33:178-181

5041 Monche, J., and M. Ferrer-Arenillas. 1958
Contribucion al estudio de las propiedades de la hidrazida del acido isonicotinico. (Contribution to the study of the properties of the hydrazide of isonicotinic acid)
Rev. Esp. Fisiol. 14(2):81-92

5042 Monden, M. 1964
A study of the free amino acids in the serum of liver diseases
J. Jap. Soc. Int. Med. 53:132-147

5043 Monder, Carl. 1956
The influence of blood on glutamic acid metabolism and the non-enzymatic conversion of dopa to melanin with special reference to leukemia
Diss. Absts. 16(11):2019

5044 Monder, Carl, Judith Ben-Ezzer, and Abraham White. 1962
Einfluss von steroiden in vitro auf die transaminaseaktivitat und die unversehrtheit von thymocytem
Endocrinology 70:123-130

5045 Mondolfo, Hugo. 1952
Unterschiede im Aminosaurenstoffwechsel der Bakterien unter der Wirkung bakteriostatischer Mittel
Rev. Asoc. Bioquim. Argent. 17:17-18

Manufacture of L-glutamic acid by fermentation
Jap. Patent 502(1967) (Cl 36 F 8)

5323 Noda, Haruhiko. 1955
Losliches Kollagen aus Sehnen
J. Chem. Soc. Japan, (Pure Chem. Sect.) 76:981-983

5324 Noe, Frederick P., and Walter J. Nickerson. 1958
Der Stoffwechsel von 2-Pyrrolidon und gamma-Aminobuttersaure durch Pseudomonas aeruginosa
J. Bact. 75:674-681

5325 Noguchi Research Foundation. 1967
Racemization of glutamic acid
Jap. Pat. 1,6287 issued Sep. 4, 1967

5326 Nogueira, G.J., C.A. Garcia Argiz, and E. Levin. 1965
Konzentrationsabnahme verschiedener substanzen bei beruhrung mit der ausseren gehirnhaut
Experientia 21:734-735

5327 Noll, Franz. 1965
Hemmung der anaeroben Glykolyse von Krebszellen durch Glutamat-Pyruvat-Transaminase. (Inhibition of the anaerobic glycolysis of cancer cells by glutamate-pryuvate-transaminase)
Naturforsch 20b(3):245-251

5328 Nolte, Erwin. 1952
Der gegenwartige Stand der Glutaminsauretherapieforschung
Milchwissenschaft 7:362-365

5329 Nolte, Erwin. 1953
Protein glutamic acid. The homogeneity of the therapeutic effect of protein glutamic acid and pure L(+)-glutamic acid
Milchwissenschaft 8:354-364

5330 Nomoto, Masao, and Kaishi Narabashi. 1957
Uber den charakter der streptomycesprotease
Symp. Enzyme Chem. (Tokyo) 12:24-30

5331 Nord, Folke. 1926
A study of the influence of some protein derivatives on the regulation of the blood sugar. I. The effect of some protein derivatives on the blood-sugar curve and on the curve of adrenaline hyperglucemia
Acta. Med. Scand. 65:1-60

5332 Nord, Folke. 1927
Uber den Einfluss von einigen Aminosauren auf das chromaffine Gewebe der Nebennieren des Kaninchens
Beitr. Zur Pathol. Anatom. Zur Allg. Pathol. 78:297-302

5333 Nord, Folke. 1929
The effect of glycocoll and of d-glutamic acid on the non-fermentable reducing substances of the blood
Acta Med. Scand. 70:277-285

5334 Nordberg, B. K., and W. Thorsell. 1955
Papierelektrophoretische untersuchungen uber material aus entkapselten Bacillus anthracis
Acta Chem. Scand. 9:1030-1031

5335 Nordstrom, J. W. 1967
Destruction of molar teeth in rats fed amino acid diets
J. Nutr. 93:189-197

5336 Noren, Borje. 1955
Studies on myxobacteria. III. Organic factors in nutrition
Bot. Notiser 1955(1):81-134

5337 Norgine Laboratories, Inc., New York. 1960
Arzneimittel
A.P. 2,958,627 issued Nov. 1, 1960

5338 Norimitsu, Kazuichi. 1959
Metabolic interrelation between tryptophan and other amino acids
Kamamoto Med. J. 12:133-140

5339 Norman, A. W., and H. F. DeLuca. 1964
Vitamin D und der einbau von C-14(1)-acetat in die organischen sauren des knochens
Biochem. J. 91:124-130

5340 Norpoth, Leo, Theo Surmann, and Joseph Closges. 1954
Occurence of free amino acids in human gastric juice
Arztl. Wochschr. 9:83-85

5341 Norton, Karl B., Donald K. Tressler, and Lillian D. Farkas. 1952
The use of monosodium glutamate in frozen foods
Food Tech. 6(11):405-411

5342 Nossal, P. M., I. A. Hansen, and J. N. Ladd. 1957
The mechanism of yeast respiration. I. Preparation and properties of actively respiring cell-free yeast extracts
Biochim. Biophys. Acta 23(1):103-115

5343 Novak, A.F., M.S. Blum, S. Taber, and J.A. Liuzzo. 1960
Die Trennung und Erforschung der Aminosauren des Samenplasmas und des Samens der Honigbiene, Apis mellifera
Annu. Entomol. Soc. America 53:841-843

5344 Novosel'skaya, V. V., and E. D. Ponomareva. 1962
Amino acid composition of proteins in blood and certain organs in acute leukemia
Tr. Inst. Im. Sklifosovskogo 5(2):130-138

5345 Nowak, H. Fr., Halina Piotrowska-Olczak, and Danuta Duda. 1969
Proteins and fats in the liver of mice of the RIII 19c/b strain after intraperitoneal administration of glutamic acid
Folia Histochem. Cytochem. 7(1):41-45

5346 Nowikowa, Je. Tsch., and N. A. Troitzkaja. 1961
Aminosauregehalt im harn von rheumakranken kindern (in Russian)
Padiatrie (UdSSR) 40(8):37-41

5347 Noworytko, J., and M. Sarnecka Keller. 1956
Chromatographic analysis of amino acids in urine
Acta Biochim. Polon. 3:309-321

5348 Nowotny, A. 1955
Studies of the chemical structure of A, B, and O blood group antigens. I. Physicochemical examination of the A and B group red-cell stroma
Acta Physiol. Acad. Sci. Hung. 7:31-43

5349 Noznick, P.P., and R.H. Bundus. 1970
Dry roasted nuts
Can. Pat. 831,934 issued 1970

5350 Nuesch, J., F. Knuesel, and M. Scherrer. 1967
Effect of siderochromes on the glutamic acid-forming bacterium Brevibacterium flavum
Pathol. Microbiol. 30(6):890-899

5351 Nukada, Tadaatsu, Norio Ando, and Hiroshi Yoshida, 1967
Cerebral cortex swelling in vitro
Nippon Yakurigaku Zasshi 63(2):87-93

5352 Numers, C. v., O. Widholm, and H. Zilliacus. 1958
Qualitative bestimmung von freie aminosauren. Die anwendung der papierchromatographic bei malignen und normal menschlichen uterus- und ovargeweben
Ann. Med. Exp. Biol. Fenn. 36:207-212

5353 Nunez, G., and P. Hauszwalb-Nunez. 1951
Timonucleoproteine nei tumori spontanei-del topo. (Estrazione e cromatografia).
(Thymonucleoprotein in the spontaneous tumor of the rat. (Extraction and chromatography.))
Tumori 37(1):93-97

5354 Nunheimer, T. D., J. Birnbaum, E. D. Ihnen, and A. L. Demain. 1970
Product inhibition of the fermentative formation of glutamic acid
Appl. Microbiol. 20(2):215-217

5355 Nurmikko, Veikko and Raimo Raunio. 1961
Schwankungen in der transaminaseaktivitat von Escherichia-coli-zellen wahrend der latenzphase des wachstums
Acta Chem. Scand. 15:1263-1270

5356 Nurmikko, Veikko, and Esko Karha. 1962
Nahrstoffbedarf von milchsaurebakterien. 2. Mitt. Vitamin- und aminosaurebedarf von Streptococcus thermophilus-stammen
Suomalaisen Tiedeakatemian Toimituksia (Ann. Acad. Sci. Fenn), Ser. A II 114:1-21

5357 Nuryev, O.M. 1960
Changes in total blood plasma protein and its fractions in surgical patients following the administration of protein hydrolyzates
Zdravookhr. Turkemistana 6:3-6

5358 Nuta, Gh., and Teodora Tohaneanu. 1967
Variations in concentrations of rat serum amino acids following the administration of nickel acetate
Farmacia (Bucharest) 15(5):295-298

5359 Nyberg, H.T., M. Cefola, and D. Sabine. 1959
Chelation of cobalt, nickel and copper with glutamic acid
Arch Biochem. 85:82-88

5360 Nygaard, Agnar P., and William J. Rutter. 1956
Interaction of pyridine-nucleotide linked enzymes
Acta Chem. Scand. 10:37-48

5361 Nyhan, William L., and H. Busch. 1957
Metabolic patterns for L-glutamate-U-C14 in slices of tumors and other tissues
Cancer Res. 17(3):227-234

5362 Nyhan, William L., and Harris Busch. 1958
Metabolic patterns for L-glutamate-U-C14 in tissues of tumor-bearing rats
Cancer Res. 18(4):385-393

5363 Nyhan, William L., and Harris Busch. 1958
Metabolic patterns for succinate-2-C-14 in tissues of tumor-bearing rats
Cancer Res. 18(10):1203-1208

5364 O'Brien, D., C. H. M. Walker, and D. Walker. 1961
Amino acid composition of serum mucoprotein in rheumatic fever
Nature 191:922

5365 O'Brien, R. T., and L. L. Campbell, Jr. 1957
The nutritional requirements for germination and outgrowth of spores and vegetative cell growth of some aerobic spore-forming bacteria
J. Bact. 73(4):522-525

5366 O'Brien, R.W., and Joseph R. Stern. 1968
Stereospecificity of citrate synthetase in relation to glutamate biosynthesis by extracts oof Chloropseudomonas ethylicum
J. Bact. 95(2):385-388

5367 O'Leary, M.H. 1970
Carbon isotope effects on the enzymatic decarboxylation of glutamic acid
J. Am. Chem. Soc. 92:4435-4440

5368 O'Neal, R.M., and R.E. Koeppe. 1966
Precursors in vivo of glutamate, aspartate, and their derivatives in rat brain
J. Neurochem. 13(9):835-847

5369 O'Neal, Robert M., Roger E. Koeppe, and Eric I. Williams . 1966
Utilization in vivo of glucose and volatile fatty acids by sheep brain for the synthesis of acidic amino acids
Biochem. J. 101:591-597

5370 Obara, Tetsujiro, and Yasokichi Ogasawara. 1960
Polarographic study on the storage of meat. IX. Effect of irradiation with gamma-rays on organic acids and free amino acids in beef
Nippon Nogei Kagaku Kaishi 34:397-403

5371 Obara, Tetsujiro, and Yasokichi Ogasawara. 1960
Polarographic studies on storage of meats. V. Relation between protein waves of beef and changes of its components. 2.
Nippon Nogeikagaku Kaishi 34:202-208

5372 Obata, Yataro, and Mikio Tomoeda. 1953
Mechanism of microbiological synthesis of riboflavine by the butyl alcohol-acetone organism. II. Influence of the contituents in the synthetic media upon the biosynthesis of riboflavine
J. Agr. Chem. Soc. Jap. 27:867-869

5373 Obata, Yataro, and Shun'ichi Fukushi. 1952
Components of the autolyzate of bakers; yeast. I.
J. Jap. Soc. Food Nutr. 5(5):163-167

5374 Obata, Yataro, and Tei Yamanishi. 1952
Chemical studies on the substance of fish smell. V. Aroma of cooked fish
Bull. Jap. Soc. Sci. Fish. 17(10):326-328

5375 Obata, Yataro, and Yoshinori Ishikawa. 1955
L-glutamic acid content of mangels
Nippon Nogei-Kagaku Kaishi 29:603-605

5376 Oberg, K. E. 1964
Hemmung des sauerstoffverbrauchs von hirnmitochondrien rotenon-vergifteter fische
Exp. Cell Res. 407-410

5377 Obrador, S., P. Ortiz, and J. Mandoki. 1945
Accion de ciertas substancias sobre el electroencefalograma de epilepticos
Bol. Lab. Estud. Med. Biol. 3(3/4):97-104

5378 Obrazcova, A.A., and M.B. Petrenko. 1966
Aminosaurezusammensetzung einiger Rhizospharenbakterien
Mikrobiol. Z. 28(1):15-20

5379 Ochmann, Willibald. 1932
Uber den einfluss der stickstoffnahrung auf die sporenbildung von sechs verschiedenen hefen
Zbl. Bakteriol., Parasitenk. Infektionskr.
86:458-465

5380 Odiette, D. 1932
Influence of various amino acids on the formation of elastic fibers in tissue cultures in vitro
C. R. Soc. Biol. 110:940-941

5381 Odiette, D., and R. Truhaut. 1937
The nature of the acion of mitogenetic substances in tissue cultures in vitro
Bull. Histol. Appl. Physiol. Path. Tech. Microscop. 14:97-105

5382 Odin, Lars. 1959
Untersuchungen uber die chemie des ovarialcysteninhaltes
Acta Soc. Med. Ups. (N.S.) 64:25-31

5383 Oepen, H., and I. Oepen. 1965
Geschlechtsspezifische Konzentrationsunterschiede der Serum-Aminosauren
Klin. Wschr. 43:211-214

5384 Oeriu, S. 1965
Study of amino acids and peptides of the brain in relation to age and to the effect of glutamic acid treatment
Rev. Franc. Geront. 11:95-97

5385 Oeriu, S., and I. Tanase. 1963
Biochemical aspects of the ageing process in the central nervous system. V. The role of cysteine and of methylation and sulfur-metabolizing vitamins in the metabolism of amino acids in the gray matter of the cerebellum in rats of different ages
Comun. Acad. Rep. Pop. Rom. 13(2):145-162

5386 Oeriu, S., and I. Tanase. 1965
Biochemical modifications of endocrine glands during aging. II. Amino acid composition of several endocrine glands (thyroid, adrenals, and pituitary gland) in animals of various ages and in old animals treated with cysteine and vitamins involved in methylation processes and in sulfur metabolism
Giorn. Gerontol. 13(1):32-52

5387 Oeriu, S., G. Costescu, and O. Teodorescu. 1960
Biology of aging. XIV. Concentration of dicarboxylic amino acids of the blood serum of the rat as a function of age and under the action of cysteine
Acad. Rep. Pop. Rom., Inst. Biochim., Stud. Cercet. Biochim. 3:245-250

5388 Oesterlin, Maner. 1929
Oxidation of glutamic acid in the animal organism
Biochem. Z. 215:203-204

5389 Offenhammer, Kurt and Elimar Schonharl. 1954
Glutaminsaure bei der Behandlung von Sprachstorungen
Therap. Gegenwart 93:225-228

5390 Oganesyan, A. S. 1961
Influence of glutamic acid upon certain aspects of kidney function
Izvest. Akad. Nauk Armyan. S.S.R., Biol. Nauki 14(1):69-74

5391 Oganesyan, A.S. 1967
Amino acid deamination in renal tissue
Arm. Khim. Zh. 20(1):80-81

5392 Oganesyan, A.S., and Zh. S. Gevorkyan. 1968
Transfer of alpha-amino acids into renal tissue
Dokl. Akad. Nauk Arm. 47(2):95-100

5393 Oganesyan, V.S., and G.Kh. Bunyatyan. 1968
Role of aspartic acid and N-acetyl-L-aspartic acid in the regulation of glutamine and glutamic acid metabolism in brain tissue
Vopr. Biokhim. Mozga 4:81-91

5394 Ogasawara, Kazuo, Saneshige Abe, Iwao Ito, Masahiko Yoneda, Nobuo Asano, Tsunesaburo Takatori, and Shuichi Watanabe. 1953
Antibiological studies on Ekifi. II. Production of toxic amines by strains of Shigella dysenteriae
Nisshin Igaku 40:99-103

5395 Ogasawara, Kimi. 1959
Einflusse von Vitamin und Medikamenten auf die Kalium-resorption im Darm
Biochemistry 31:4-12

5396 Ogata, Eisaburo. 1959
Growth of Micrococcus tweenis. I. Carbon and nitrogen sources
Nippon Saikingaku Zasshi 14:873-877

5397 Ogata, Koichi, Nubuo Kato, Masahiro Osugi, and Tatsurokuro Tochikura. 1969
Low temperature fermentation. II. Amino acid formation by a facultative physhrophilic bacterium
Agr. Biol. Chem. 33(5):711-717

5398 Ogata, Tunemi. 1938
Transference of substances injected into the blood vessels to the lymphatics. I. Glycine, glutamic acid and d-alanine
Arb. Dritt. Abt. Anat. Inst. Kaiserl. Univ. Kyoto, D. 7:72-79

5399 Ogawa, H., M. Onagi, and K. Fukushima. 1970
Browning of foods by microorganisms. II. Effects of carbohydrates, proteins and amino acids on browning
J. Food Hyg. Soc. Jap. 11(5):356-360

5400 Ogawa, Kiyosi. 1954
Biochemische Untersuchungen an Kohlenhydraten
Tohoku J. Exp. Med. 61:27-37

5401 Ogawa, T., H. Shimada, K. Toyama, and S. Honjo. 1959
A studies on the examination of resistant tubercle bacilli to kanamycin. 3. Effect of potassium diphosphate and sodium glutamate on the resistance to kanamycin
Kekkaku 34(4):223-227

5402 Ogawa, Tesuo, and Mei Ohno. 1950
Amino acids. VII. Paper-partition chromatograms of glutamic acid
J. Chem. Soc. Jap., Ind. Chem. Sect. 53:170-172

5403 Ogawa, Tetsuo, and Ryohei Aoki. 1955
Extraction of glutamic acid from hydrolyzed solutions of protein
Jap. Pat. 3810 issued June 6, 1955

5404 Ogawa, Tetsuo, Toshinao Tsunoda, Ryohei Aoki, Ikkan Kinoshita, Shinji Okumura, and Yasuhiro Kondo (to Ajinomoto Co., Inc.). 1961
L-Glutamic acid from fumaric acid
U.S. Pat. 2,971,890 issued Feb. 14, 1961

5405 Ogawa, Tetsuwo, and Mei Ohno. 1953
Wurzmittel
A.P. 2,648,704 issued Aug. 11, 1953

5406 Ogawa, Yasuko, and Junko Aoki. 1950
Vitamin C contained in momiji oroshi, a mixture of grated radish and carrot
Eiyo To Shokuryo 12:190-195

5407 Ogilvie Flour Mills Co. Ltd. 1960
Aufarbeiten von Mutterlaugen der Glutaminsauregewinnung
A.P. 2,946,686 issued Jul. 26, 1960

5408 Ogilvie Flour Mills Co. Ltd., Montreal. 1955
Gewinnung von glutaminsaure aus gluten
Can. Pat. 561,451 issued Aug. 5, 1958

5409 Ogilvie Flour Mills Co. Ltd., Montreal. 1958
Gewinnung von Aminosauren aus Gluten
A. P. 2,828,336 issued Mar. 25, 1958 and A.P. 2,831,889 issued Apr. 22, 1958

5410 Ogilvie Flour Mills Co. Ltd., Montreal. 1962
Trennen von Monoaminomonocarbonsauren von Aminodicarbonsauren
A. P. 3,045,026 issued Jul. 17, 1962 and A. P. 3,014,921 issued Dec. 26, 1961

5411 Ogur, Maurice, Lowell Coker, and Sylvia Ogur. 1964
Glutamate auxotrophs in saccharomyces. I. The biochemical lesion in the glt1 mutants
Biochem. Biophys. Res. Commun. 14(2):193-197

5412 Ogura, Yasumi. 1959
The influence of various phenothiazine alkylamine derivatives on the concentration of ammonium and the metabolism of glutamine and glutamic acid in cerebral tissue
Folia Pharm. Jap. 55(5):949-958

5413 Oh-Uti, and Jun-Ichi Awataguchi. 1958
Free amino acids in gastric juice of patients with gastric or duodenal ulcer and gastric carcinoma with special reference to the change after operation
Tohoku J. Exp. Med. 67(2/3):123-130

5414 Ohler, Hermann. 1950
Zitronat und seine Herstellung
Food Manufact. 25:378-380

5415 Ohnishi, Eiji, Helen MacLeod, and N.H. Horowitz. 1962
An D-Aminosaureoxydase arme Mutanten von Neurospora
J. Biol. Chem. 237:138-142

5416 Ohno, Mei. 1962
Quantitative determination of glutamic acid by means of the decarboxylase of squash. I. Comparison of rapid methods for the determination of vessel constants and their accuracies
Nippon Nogeikagaku Kaishi 36(4):289-296

5417 Ohno, Mei. 1962
Studies on the quantitative determination of the glytamic acid by means of the decarboxylase of the squash. II. Studies on the recovery test and a comparison with the radio isotope dilution method (Abstract)
Agric. Biol. Chem. 26(5):A29

5418 Ohno, Mei. 1962
Studies on the quantitative determination of the glutamic acid by means of the decarboxylase of the squash. I. Comparison of brief methods for the determination of the vessel constant and their accuracy (Abstract)
Agric. Biol. Chem. 26(5):A29

5419 Ohta, Keizo, Toshinao Watarai, Tetsu Oishi, Yukio Ueshiba, Shinichi Hirose, Toru Yoshizawa, Yaeko Akikusa, Michio Sato, and Hideko Okano. 1953
Zusammensetzung von Finnwalmilch
Proc. Jap. Acad. 29:392-398

5420 Ohtaka, Yoichi. 1958
Systematische untersuchungen uber die bestandteile des sake, besonders seiner stickstoffhaltigen komponenten
Sci. Pap. Inst. Physic. Chem. Res. (Tokyo) 52(1491):171-197

5421 Ohtsu, Takawo, and Denn'ichi Mizuno. 1952
Quantitative paper chromatographic estimation of various amino acids. A modification of Fisher's method
Jap. J. Med. Sci. Biol. 5:37-44

5422 Oikawa, Tadashi. 1957
Studies on the amino acid nutrition of Bacillus anthracis. III. Amino acid composition without valine and isoleucine suitable for the growth of B. Anthracis
Jap. J. Bact. 12(12):965-967

5423 Oishi, Keiichi. 1962
Quality of sea food
Mem. Fac. Fish., Hokkaido Univ. 10(2):67-136

5424 Oishi, Kunio. 1967
Metabolic control of glutamate synthesis in Coryne-bacterium glutamicium
Nippon Nogei Kagaku Kaishi 41(10):35-44

5425 Oishi, Kunio, and Ko Aida. 1965
Aminosaurefermentation. 11. Mitt. Wirkung von biotin auf den embden-meyerhof-parnas-abbau und den hexosephosphat-nebenweg bei einem glutaminsaure produzierenden bakterium, Brevibacterium ammoniagenes
Agric. Biol. Chem. (Tokyo) 29:83-89

5426 Oishi, Kunio, Ko Aida, and Toshinobu Asai. 1961
Untersuchungen uber aminosauregarung. 8. Mitt. Uber den mechanismus der umwandlung von L-glutaminsaurefermentation in bernsteinsaurefermentation
J. Gen. Appl. Microbiol. 7:213-226

5427 Oishi, Kunio, Ko Aida, and Toshinobu Asai. 1962
Studies on amino-acid fermentation. IX. On the mechanism of conversion of L-glutamic acid fermentation to succinic acid fermentation (Abstract)
Agric. Biol. Chem. 26(3):A17-18

5428 Oishi, Kunio, Miwako Otawa, Ko Aida, and Teijiro Uemura. 1970
Biotin-dependent glutamate transport in Brevibacterium ammoniagenes
J. Gen. Appl. Microbiol. 16(3):259-277

5429 Oja, S. S. 1966
Postnatal changes in the concentration of nucleic acids, nucleotides, and amino acids in the rat brain
Ann. Acad. Sci. Pennicae, Ser. A 5(125):69 pp

5430 Oji, K. 1954
Treatment of muscular atropies with amino acid mixtures
Med. J. Osaka Univ. 6(1):291-308

5431 Oka, Kazuko. 1960
Studies on the in vitro change of glutamic acid to pipecolic acid by the action of HNO2
Nagasaki Med. J. 35(2):394-401

5432 Okabayashi, Tadashi, and Eitaro Masuo. 1060
Das vorkommen von nucleotiden in der kulturflussigkeit von mikroorganismen. 2. Mitt. Die nucleotide in der kulturlosung von brevibacterium liquefaciens novo sp.
Chem. Pharmac. Bull. (Tokyo) 8:1089-1094

5433 Okabayashi, Tadashi, and Eitaro Masuo. 1960
Vorkommen von nucleotiden in der kulturflussigkeit eines mikroorganismus
Chem. Pharmac. Bull. (Tokyo) 8:370-372

5434 Okabe, Setsuzo, Mitsuru Shibukawa, and Takeyoshi Ohsawa. 1968
Bacterial formation and extracellular accumulation of L-glutamic acid form the mixture of sugar and acetate: I. Some characteristics in the course of the fermentation (Microbacterium ammoniaphilum)
Nippon Nogei Kagaku Kaishi 42(9):563-566

5435 Okabe, Setsuzo, Mitsuru Shibukawa, and Takeyoshi Ohsawa. 1967
L-Glutamic acid (enzymatic) fermentation with molasses: IX. Relation between the lipid in the cell membrane from Microbacterium ammoniaphilum and the extracellular accumulation of l-glutamic acid
Agric. Biol. Chem. 31(7):789-794

L-Glutamic acid fermentation with molasses. VI. Effect of the saturated-unsaturated fatty acid ratio in the cell membrane fraction of the extracellular accumulation of L-glutamate
Agric. Biol. Chem. 30(8):750-758

6669 Shibukawa, Mitsuru, Kenichi Komatsu, Hideomi Takahashi, and Takeyoshi Osawa. 1965
L-glutaminsaurefermentation mit melasse. 4. Mitt. Einfluss des verhatnisses von zellularen, gesattigten zu ungesattigten fettsaureestern auf die extrazellulare anreicherung von L-glutamat
J. Agric. Chem. Soc. Jap. (Nippon Nogei-Kagaku Kaishi) 39:150-156

6670 Shibukawa, Mitsuru, Kenichi Komatsu, Takayoshi Osawa, and Sotoo Yamamoto. 1964
L-glutamic acid fermentation with beet molasses. III. The time required for the polyoxyethylene fatty acid esters (POEFE) for the considerable accumulation of L-glutamate
Agric. Biol. Chem. 28(7):A29

6671 Shibukawa, Mitsuru, Kenichi Komatsu, Takeyoshi Osawa, and Sotoo Yamamoto. 1964
L-glutamic acid fermentation with beet molasses. II. The behavior of polyoxyethylene fatty acid esters in the medium
Agric. Biol. Chem. 28(8):A33-A34

6672 Shibukawa, Mitsuru, Masao Kurima, and Shunji Ohuchi. 1970
L-glutamic acid fermentation with molasses: XII. Relationship between the kind of phospholipids and their fatty acid composition in the mechanism of extracellular accumulation of L-glutamate
Agric. Biol. Chem. 34(8):1136-1141

6673 Shibukawa, Mitsuru, Masao Kurima, and Take Yoshi Ohsawa. 1967
L-Glutamic acid fermentation with molasses: VIII. L-glutamic acid accumulation by protoplast-like bodies
Agr. Biol. Chem. 31(7):782-788

6674 Shibukawa, Mitsuru, Masao Kurima, Setsuzo Okabe, and Tadeyoshi Ohsawa. 1968
L-Glutamic acid fermentation with molasses. X. The difference in mechanisms for the bacterial extracellular accumulation of L-glutamate between fatty acid derivatives and penicillin
Agric. Biol. Chem. 32(5):641-645

6675 Shibukawa, Mitsuru, Masao Kurima, Shigeru Arima, and Shunji Ohuchi. 1969
L-glutamic acid fermentation with molasses: XL. L-glutamic acid fermentation with body of an L-glutamate-producing bacterium in the presence of "lipase"
Amino Acid Nucleic Acid 19:34-38

6676 Shibukawa, Mitsuru, Setsuzo Okabe, Akio Mimura, and Takeyoshi Ohsawa. 1966
L-Glutamic acid fermentation with molasses: VII. The effect of polyoxyethylene fatty acid esters on cellular permeability in resting cell and its relationship to the fatty acids composition in growing cell
Nippon Nogei Kagaku Kaishi J. Agric. Chem. Soc. Jap. 40(8):300-305

6677 Shibukawa, Mitsuru, Takeyoshi Osawa, Taneo Nobukuni, and Sotoo Yamamoto. 1964
L-glutamic acid fermentation with beet molasses. I. The chemical characters of L-glutamic acid-accumulating polyoxyethylene fatty acid esters
Agric. Biol. Chem. 28(8):A33

6678 Shibuya, Hiroshi. 1953
The relation of amino acids in urine and liver function
Folia Pharm. (Japan) 49:185

Proline oxidizing enzyme system in a halophilic bacterium
J. Biochem. (Tokyo) 44:807-817

6682 Shiio, Isamu. 1960
Bacterial formation of glutamic acid from acetic acid. I. Glutamic acid formation and its related coenzymes in Brevibacterium flavum, No. 2247
J. Biochem. (Tokyo) 47(3):273-282

6683 Shiio, Isamu, and Ryosuke Uchio. 1969
Microbial production of amino acids from hydrocarbons. IV. L-Glutamic acid production by Corynebacterium hydrocarboclastus R-7
J. Gen. Appl. Microbiol. 15(1):65-84

6684 Shiio, Isamu, and Toshinao Tsunoda. 1961
Bacterial formation of glutamic acid from acetic acid. III. Incorporation of labeled acetate and kinetic relationships of the metabolites in Brevibacterium flavum, No. 2247
J. Biochem. (Tokyo) 49(2):148-153

6685 Shiio, Isamu, and Toshinao Tsunoda. 1961
Bacterial formation of glutamic acid from acetic acid. II. Formation of glutamic acid from C-14-labeled acetic acid in Brevibacterium flavum
J. Biochem. 49:141-147

6686 Shiio, Isamu, Haruo Momose, and Akiko Oyama. 1969
Genetic and biochemical studies on bacterial formation of L-glutamate. I. Relation between isocitrate lyase, acetate kinase, and phosphate acetyltransferase levels and glutamate production in Brevibacterium flavum
J. Gen. Appl. Microbiol. 15(1):27-40

6687 Shiio, Isamu, Kikuko Narui, Noriko Yahaba, and Masahiro Takahashi. 1962
Free intracellular amino acid of a glutamate-forming bacterium, Brevibacterium flavum, No. 2247. Analysis and release
J. Biochem. 51(2):109-111

6688 Shiio, Isamu, Koji Mitsugi, and Toshinao Tsunoda. 1959
Bacterial formation of glutamic acid from acetic acid in the growing culture medium
J. Biochem. 46(12):1665-1666

6689 Shiio, Isamu, Shin-ichiro Otsuka, and Masahiro Takahashi. 1961
Zur kenntnis der alpha-ketoglutarsauredehydrogenase bei der bildung von glutaminsaure durch Brevibacterium flavum
J. Biochem. (Tokyo) 50:164-165

6690 Shiio, Isamu, Shin-ichiro Otsuka, and Toshinao Tsunoda. 1961
Bakterielle bildung von glutaminsaure aus essigsaure
Sympos. Enzyme Chem. (Tokyo) 15:125-129

6691 Shiio, Isamu, Shin-Ichiro Otsuka, and Masahiro Takahashi. 1962
Effect of biotin on the bacterial formation of glutamic acid. I. Glutamate formation and cellular permeability of amino acids
J. Biochem. (Tokyo) 51(1):56-62

6692 Shiio, Isamu, Shin-Ichiro Otsuka, and Masahiro Takahashi. 1961
Effect of growth substrates on levels of glyoxylate by-pass enzymes in a glutamate-forming bacterium, Brevibacterium flavum, No. 2247
J. Biochem. (Tokyo) 49(3):262-263

6693 Shiio, Isamu, Shin-Ichiro Otsuka, and Masahiro Takahashi. 1961
Glutamic acid formation from glucose by bacteria. V. Oxidative metabolism of glucose in Brevibacterium flavum No. 2247
J. Biochem. (Tokyo) 49(5):397-403

6694 Shiio, Isamu, Shin-Ichiro Otsuka, and Masahiro Takahashi. 1961
Glutamic acid formation from glucose by bacteria. VI. Metabolism of the intermediates of the tricarboxylic acid (TCA) cycle and of the glyoxylate bypass in Brevibacterium flavum No. 2247
J. Biochem. (Tokyo) 50(1):34-40

6695 Shiio, Isamu, Shin-Ichiro Otsuka, and Noboru Katsuya. 1963
Cellular permeability and extracellular formation of glutamic acid in Brevibacterium flavum
J. Biochem. (Tokyo) 53(5):333-340

6696 Shiio, Isamu, Shin-Ichiro Otsuka, and Noboru Katsuya. 1962
Effect of biotin on the bacterial formation of glutamic acid. II. Metabolism of glucose
J. Biochem. (Tokyo) 52(3):108-116

6697 Shiio, Isamu, Shin-Ichiro Otsuka, and Toshinao Tsunoda. 1960
Bildung von Glutaminsaure aus Glucose mittels Bakterien. 4. Mitt. Fixierung von Kohlendioxid und Bildung von Glutamat in Brevibacterium flavum Nr. 2247
J. Biochem. 48:110-120

6698 Shiio, Isamu, Shin-Ichiro Otsuka, and Toshinao Tsunoda. 1960
Glutamic acid formation from glucose by bacteria. III. On the pathway of pyruvate formation in Brevibacterium flavum, No. 2247
J. Biochem. (Tokyo) 47(4):414-421

6699 Shiio, Isamu, Shin-Ichiro Otsuka, and Toshinao Tsunoda. 1960
Glutamic acid formation from glucose by bacteria. IV. Carbon dioxide fixation and glutamate formation in Brevibacterium flavum, No. 2247
J. Biochem. (Tokyo) 48(1):110-120

6700 Shiio, Isamu, Shin-Ichiro Otsuka, and Toshinao Tsunoda. 1959
Glutamic acid formation from glucose by bacteria. I. Enzymes of the Embden-Meyerhof-Parnas pathway, the Krebs cycle and the glyoxalate by-pass in the cell extracts of Brevibacterium flavum No. 2247
J. Biochem (Tokyo) 46(10):1303-1311

6701 Shiio, Isamu, Shinichiro Otsuka, and Toshinao Tsunoda. 1961
Bacterial formation of glutamic acid from acetic acid
Koso Kagaku Shimpojiumu 14:351-357

6702 Shiio, Isamu, Shinichiro Otsuka, and Toshinao Tsunoda. 1959
Glutamic acid formation from glucose by bacteria. II. Glutamic acid and alpha-ketoglutaric acid formation by Brevibacterium flavum, No. 2247
J. Biochem. 46(12):1597-1605

6703 Shiio, Isamur, and Ryosuke Uchio. 1969
Microbial production of amino acids from hydrocarbons: IV. L-glutamic-acid production by Corynebacterium hydrocarboclastus R-7 (in Japanese)
Amino Acid Nucleic Acid 19:88-96

6704 Shiio, Tsuyoshi, and Takuji Tsuchiya. 1966
A study on the semi-continuous culture of glutamic acid fermentation: II. Continuous operation of the primary fermentation tank (Brevibacterium lactofermentum)
Nippon Nogei Kagaku Kaishi 40(5):218-221

6705 Shiio, Tsuyoshi, zyuukurou Kawaoka, and Takuji Tsuchiya. 1970
Studies of protection from contamination in glutamic acid fermentation (in Japanese)
Nippon Nogeikagaku Kaishi 44(6):245-251

6706 Shimakoshi, Yoshio. 1953
Effects of ethylurethan on the brain respiration in rats
J. Nara Med. Assoc. 4:12-17

6707 Shimbayashi, Koichi, and Toshio Yonemura. 1965
Influence of nutritional alteration on the plasma amino acids of the milking cow. II. Low-protein low-calorie diet, and high-protein low-calorie diet
Natl. Inst. Animal Health Quart. 5(4):213-224

6708 Shimbayashi, Koichi, Yu Ide, and Toshio Yonemura. 1967
Plasma free amino acids of cow under different feeding conditions
Agric. Biol. Chem. (Tokyo) 31(5):628-332

6709 Shimbayashi, Koichi, Yu Ide, and Toshio Yonemura. 1965
Freie aminosauren im schalblutplasma
Agric. Biol. Chem. (Tokyo) 29:774-778

Salts of glutamic acid and a 5'-nucleotide
Fr. Pat. 1,449,596 issued Aug. 19, 1966

7257 Takeda Chemical Industries, Ltd. 1966
Flavor improvers
Neth. Appl. 6,509,369 (Cl. A23b) issued Sep. 30, 1966

7258 Takeda Chemical Industries, Ltd. 1966
Glutamate-nucleotide condiment
Belg. Pat. 670,151 issued Jan. 17, 1966

7259 Takeda Chemical Industries, Ltd. 1967
Production of L-glutamic acid
Fr. Pat. 1,473,341 issued Mar. 17, 1967

7260 Takeda Chemical Industries, Ltd. 1967
Liquid flavor enhancers
U.S. Pat. 3,326,697 issued Jun. 20, 1967

7261 Takeda Chemical Industries, Ltd. 1968
Seasonings
Fr. Pat. 1,533,251 issued Jul. 19, 1968

7262 Takeda Chemical Industries, Ltd., Japan. 1964
Gewinnung von L-Glutaminsaure
Fr. Pat. 1,358,176 issued Jul. 10, 1964

7263 Takeda Chemical Industrites, Ltd. 1967
Fermentative production of L-glutamic acid
Fr. Pat. 1,506,812 issued Dec. 22, 1967

7264 Takeda, Junichi. 1965
Nitrogen containing muscle extracts of the Japanese snake, Natrix tigrina tigrina
J. Biochem. (Tokyo) 57(1):1-6

7265 Takeda, Yoshito, Toshinori Matsui, and Hiroshi Okada. 1962
Erzeugung von l-glutaminsaure durch garung
A. P. 3,028,309 issued Apr. 3, 1962

7266 Takehara, Kazuo, Keiji Kawaguchi, and Matsue Suzuki. 1961
Chromatographic study on the free amino acids in cerebrospinal fluid
Ann. Rept. Res. Inst. Environ. Med. Nagoya Univ. 9:1-11

7267 Takemoto, T., and K. Daigo. 1960
Constituents of Chondria armata and their pharmacological effects
Arch. Pharm. 293:627-633

7268 Takemoto, T., Sh. Wada, J. Ueyanagi, and K. Shirakawa. 1966
Tricholomic acid and ibotenic acid, new tasty amino acids in certain species of mushrooms
Presented at the 2nd Intern. Congr. Food Sci. Technol., Warsaw, Pol., Aug. 22-27, 1966
Paper E 1.23

7269 Takemura, Takashi. 1957
Studies of determination of urinary glutamic acid using glutamic acid decarboxylase from squash
Med. J. Osaka Univ. 8(1):1-7

7270 Takenaka, Shojiro. 1954
Pharmacological studies upon the production of glutamic acid and glutamine in the brain
J. Pharmacol. (Japan) 3:129-148

7271 Takenishi, Tadao. 1961
Infrared absorption spectra of glutamic acid and related compounds
Nippon Kagaku Zasshi 82:805-813

7272 Takenouchi, K., S. Terajima, Y. Skata, and Y. Kawano. 1968
Seasoning compositions
Can. Pat. 799,925 issued 1968

7273 Takeuchi, A., and N. Takeuchi. 1967
Electrophysiologic studies of the action of GABA on the synaptic membrane
Fed. Proc. 26(6):1633-1638

7274 Takeuchi, A., and Noriko Takeuchi. 1964
The effect on crayfish (Cambarus clarkii) muscle on iontophoretically applied glutamate
J. Physiol. (London) 170(2):296-317

7275 Takeuchi, Akira, and Noriko Takeuchi. 1963
Glutamate-induced depolarization in crustacean muscle
Nature 198:490-491

7276 Takeucki, A., and Noriko Takeuchi. 1965
Localized action of gamma-aminobutyric acid on the crayfish muscle
J. Physiol. (London) 176(2):225-238

7277 Takeya, Kenji, Kazuhito Hisatsune, and Yasuko Inoue. 1963
Mykobakterielle Zellwande. 2. Mitt. Die chemische Zusammensetzung der Basalschicht
J. Bact. 85:24-30

7278 Takinami, Koichi, Hiroe Yoshii, Yasutsugu Yamada, Hiroshi Okada and Kazumoto Kinoshita. 1968
Control of L-glutamic acid fermentation by biotin and fatty acids
Amino Acid Nucl. Acid (Tokyo) 18:120-160

7279 Takinami, Koichi, Hiroshi Okada, and Toshinao Tsunoda. 1964
Biochemical effects of fatty acid and its derivatives on L-glutamic acid fermentation. II. Effective chemical structure of fatty acid derivatives on the accumulation of L-glutamic acid in biotin sufficient medium
Agric. Biol. Chem. 28(2):114-119

7280 Takinami, Koichi, Hiroshi Okada, and Toshinao Tsunoda. 1963
Biochemical effects of fatty acid and its derivatives on L-glutamic acid fermentation. I. Accumulation of L-glutamic acid in the presence of sucrose fatty acid ester
Agric. Biol. Chem. (Tokyo) 27(12):858-863

7281 Takinami, Koichi, Yasutsugu Yamada, and Hiroshi Okada. 1966
Biochemical effects of fatty acid and its derivatives on L-glutamic acid fermentation. IV. Biotin content of growing cells of Brevibacterium lactofermentum
Agric. Biol. Chem. 30(7):674-682

7282 Takinimi, Koichi, Yasutsugu Yamada, and Hiroshi Okada. 1967
Biochemical effects of fatty acid and its derivatives on L-glutamic acid fermentation: V. Dualistic property of oleic acid and synergetic effect of saturated fatty acid
Agric. Biol. Chem. 31(2):223-230

7283 Talalay, Pamela Samuels. 1954
Glutathione breakdown and transpeptidation reactions in Proteus vulgaris
Nature 174:516-517

7284 Talian, H. H. 1961
Free amino acids in brain after administration of imipramine, chlorpromazine, and other psychotropic drugs
Amino Acid Pools, Distrib., Form., Funct. Free Amino Acids, Proc. Symp., Duarte, Calif. 465-470

7285 Tallen, Harris H. 1955
Freie aminosauren der muskeln normaler und vitamin-E-mangel-kaninchen
Proc. Soc. Exp. Biol. Med. 89:553-560

7286 Tamaki, Hajime, Goro Hayashi, Hiroshi Kobayashi, Shiro Adachi, and Yoshio Kowa. 1963
Pharmacological studies on potassium and magnesium L-aspartates. II. Effects on fatigue
Yakugaku Kenkyu 35(5):166-175

7287 Tamaki, Tokiya. 1966
Clinical biochemical significance about the excretion of hydroxyproline in urine
Wakayama Igaku 17:111-119

7288 Tamanoi Su K. K. 1967
Reaction product of sodium glutamate and acetic acid as a dry acid seasoning
U.S. Pat. 3,346,396 issued Oct. 10, 1967

7289 Tamanoi Vinegar Brewery Co., Ltd. 1966
Solid seasoning
Fr. Pat. 1,441,757 issued Jun. 10, 1966

7290 Tamanoi Vinegar Co. Ltd. 1970
Powdered vinegar compositions
Jap. Pat. 1,238 issued 1970

7291 Tamasdan, Stephan, and Fernande Chatagner. 1965
Effects of reserpine and of chlorpromazine hydrochloride on the glutamic decarboxylase in the brain and the cysteinesulfinic acid decarboxylase in the liver (in French)
Bull. Soc. Chim. Biol. 47(4):719-722

7292 Tamura, Atsushi. 1961
Untersuchungen von aminosaure-erganzungen und proteinstoffwechsel. 2. Mitt. Die einflusse von aminosaure-erganzungen zum protein der japanischen nahrung
Jap. J. Nutr. 19:14-22

7293 Tamura, Einosuke, and Hideo Suzuki. 1954
Determination of amino acids by paper electrophoresis
Eiyogaku Zasshi 12:114-119

7294 Tamura, Einosuke, Shiro Niizeki, and Yoshiki Kobatake. 1967
Effect of excess amino acid intake on free amino acid content in tissues and blood. II. Effect of excess amino acid intake on free non-essential amino acids in blood, liver, and muscle of rat
Kokuritsu Eiyo Kenkyusho Kenkyu Hokoku 1965:10-11

7295 Tamura, Gakuzo, Toshinao Tsunoda, Jiro Kirimura, and Shigeru Miyazawa. 1952
The microbiological determination of amino acids by lactic acid bacteria. I. Amino acid requirements of lactic acid bacteria and the establishment of standard curves for amino acid assay
J. Agric. Chem. Soc. (Japan) 26:464-470

7296 Tamura, I. E., and A. Tamura. 1962
The influence of lysine supplementation on the serum and liver transaminase activity of rats
Annu. Rep. Natl. Inst. Nutr. (Tokyo) 9-10

7297 Tamura, Shizuaki. 1924
Weiterer Beitrag zur Kenntnis des Verlaufs der fermentativen Polypeptidspaltung
Acta Scholae Med. Kioto 6:441-447

7298 Tamura, Sinpatiro, and Kuniko Kenmochi. 1963
Amino acid content of rice. I. Amino acid composition of polished rice glutelin estimated by the Beckman amino acid analyzer
Nippon Nogei Kagaku Kaishi 37(5):278-282

7299 Tamura, Sinpatiro, and Kuniko Kenmochi. 1964
Aminosauregehalt von reis. 1. Mitt. Aminosaurezusammensetzung des glutelins aus poliertem reis, bestimmt mit dem beckmannschen aminosaureanalysator
Rep. Food Res. Inst. (Tokyo) 18:243-247

7300 Tan, Wee Chong, and Bernard Malin. 1964
Biosynthese von glutaminsaure
Butler Univ. Bot. Stud. 14(2):89-103

7301 Tanabe, Osamu, and Kenzo Tonomura. 1954
Formation of amylase by aspergilli. I. Effects of carbon sources on the formation of amylase by Aspergillus oryzae
Nippon Nogei-kagaku Kaishi 28:227-232

7302 Tanaka, Atsushi. 1963
Fraktionierung von Wachs D, einem Peptidoglucolipid aus Mycobacterium tuberculosis
Biochim. Biophys. Acta 70:483-485

7303 Tanaka, Katsunobu, Sadao Akita, Kazuo Kimura, and Shukuo Kinoshita. 1960
Untersuchungen uber L-glutaminsaurefermentation. 6. Mitt. Die rolle von biotin im stoffwechsel von micrococcus glutamicus
J. Agric. Chem. Soc. Japan (Nippon Nogei-Kagaku Kaishi) 34:600-615

7304 Tanaka, Katsunobu, Takeshi Iwasaki, and Shukuo Kinoshita. 1960
Untersuchungen uber L-glutaminsaurefermentation. 5. Mitt. Biotin- und L-glutaminsaureakkumulierung durch bakterien
J. Agric. Chem. Soc. Japan (Nippon Nogei-Kagaku Kaishi) 34:593-600

7305 Tanaka, Kiyoshi, and Yoshio Yuasa. 1956
"Lamson effect" in the intracisternal route of administration
Yonago Acta Med. 1(4):205-207

7306 Tanaka, M., T. Nakashima, H. F. Mower, and K. T. Yasunobu. 1964
Die C- und N-endstandigen aminosaurefolgen des Clostridium pasteurianum-Ferredoxins
Arch. Biochem. Biophys. 105:570-574

7307 Tanaka, Masao, Teruo Kishi, and Shukuo Kinoshita. 1960
Studies on the synthesis of L-amino acids. II. A synthesis of L-proline from L-glutamic acid. (2).
Bull. Agric. Chem. Soc. Japan 24(7): A84

7308 Tanaka, Masao, Teruo Kishi, and Shukuo Kinoshita. 1960
Untersuchungen uber die synthese von L-aminosauren. 1. Mitt. Synthese von L-prolin aus L-glutaminsaure
J. Agric. Chem. Soc. Jap. (Nippon Nogeikagaku Kaishi) 34:782-785

7309 Tanaka, Masao, Yo Kato, and Shukuo Kinoshita . 1960
Enzymatische untersuchungen uber die optische aktivitat von aminosauren. 3. Mitt. Racemisierung von glutaminsaure durch bakterien
J. Agric. Chem. Soc. Japan (Nippon Nogi-kagaku Kaishi) 34:852-856

7310 Tanaka, Nobuo. 1963
Wirkungsmechanismus von O-Carbamyl-D-serin einem neuen Inhibitor der Zellwandsynthese
Biochem. Biophys. Res. Commun. 12:68-71

7311 Tanaka, Nobuo, and Kumiko Sashikata. 1962
Biogenese der gamma-Aminobuttersaurehalfte von Variotin
J. Antibiot. (Tokyo), Ser. A 15:228

7312 Tanaka, Shigeo. 1957
Effect of aspartic acid on the pigment migration of retina
Osaka Shiritsu Daigaku Igaku Zasshi 6:395-400

7313 Tanaka, Shozo, Fumiko Katsuki and Satoru Egashira. 1953
Mikroanalytische Bestimmungsmethode fur Glutamin- und Asparaginsaure
J. Chem. Soc. Jap. 74:53-56

7314 Tanaka, T., N. Saito, A. Okuhara, and T. Yokotsuka 1969
Studies on the taste of alpha-amino acids. II. Ternary synergism of palatable taste of alpha-amino acids (1)
J. Agric. Chem. Soc. Jap. 43(3):171-176

7315 Tanaka, Zenryu, and Takashi Sakurada. 1958
Clinico-biochemical studies on glutamic acid. 1. Its recovery effect on the insulin-shock coma and its application in clinical practice as a new therapeutic method
Folia Psychiat. Neurol. Japon. 12(3):224-230

7316 Tanami, Junichiro, and Hassei Kawashima. 1953
Relation between cysteine and glutamic acid for the multiplication of coli phage
Virus (Japan) 3:129-138

7317 Tanase, I. 1968
Research on the energizing action of some amino acids. 3. Changes of the cerebral concentration of glutamic acid and glutamine in rats after administration of sodium glutamate and of an effervescent compound of glutamate
Stud. Cercet. Fiziol. 13:329-335

7318 Tang, P. S., and T. Y. Hsueh. 1943
Studies on the kinetics of cell respiration. IX. Acceleration of pyruvate oxidation in Escherichia coli by certain amino acids, ammonia and 4-carbon dicarboxylic acids
Arch. Biochem. 2:15-21

7319 Tani, Michiya. 1954
Convulsion induced by the intra-carotid injection of sodium glutamate and aspartate
J. Physiol. Soc. Jap. 16:685-687

7320 Tannenbaum, Miguel Robinovich. 1961
Uptake of ammonium by the glutamic acid-glutamine system in the cerebral tissue of normal rats and rats with experimental liver cirrhosis
Anales Fac. Quim. Farm., Univ. Chile 13:110-118

7321 Tanner, Fred W., Jr. 1959
Chemikalien aus cerealien: garungssauren
Cereal Sci. Today 4:256-258

7322 Tapia, R. 1967
Free amino acids and glutamate decarboxylase activity in brain of mice during drug-induced convulsions
Biochem. Pharm. 16:483-496

7323 Tapia, Ricardo, Herminia Pasantes, Berta G. Ortega, and Guillermo H. Massieu. 1966
Effects in vivo and in vitro of L-glutamic acid-gamma-hydrazide on metabolism of some free amino acids in brain and liver
Biochem. Pharm. 15(11):1831-1845

7324 Tapia, Ricardo, Herminia Pasantes, Miguel Perez De La Mora, Berta G. Ortega, and Guillermo Massieu 1965
Efecto protector de la 5-etil, 5-fenil, 2-pirrolidinona y de la 3,5,5-trimetiloxazolidina, 2,4-diona, contra dos convulsivantes: Tiosemicarbazida y la administracion simultanea de fosfato de piridoxal y gamma-hidrazida del acido glutamico. (Protecting effect of 5-ethyl, -5-phenyl-, 2-pyrrolidinone and of 3,5,5-trimethyloxazolidine-, 2,4-dione against two
Univ. Nac. Auton. Mex. Inst. Biol. An. 36(1/2):9-19

7325 Tapley, Donald F. 1956
Die wirkung von thyroxin und anderen substanzen auf das anschwellen isolierter mitochondrien aus rattenleber
J. Biol. Chem. 222:325-339

7326 Taranenko, A.G. 1961
Einfluss der Denervierung der Milshdruse auf die aminosaurenzusammensetzung des Milchcaseins bei Ziegen
Ssetschenow J. Physiol. 47:454-458

7327 Taranger, J. 1965
Clinical effects of a stimulating and liver-protective preparation in tuberculosis
Marseille Med. 102:839-841

7328 Tardent, Anne, and O. Hogl. 1951
Approximation of glutamic acid in some concentrated broths
Mitt. Lebensm. Hyg. 42:1-7

7329 Targett, G. A. T. 1962
Die aminosaurenzusammensetzung des blutes der wirtsschnecken von schistosomen
Ann. Trop. Med. Parasitol. 56:61-66

7330 Tarnowski, George S., Isabel M. Mountain, and C. Chester Stock. 1970
Combination therapy of animal tumors with L-asparaginase and antagonists of glutamine or glutamic acid
Cancer Res. 30(4):1118-1122

7331 Tarve, C.U. 1963
Distrubance in brain of oxidative phosphorylation and certain stages of tricarboxylic acid cycle under experimental accumulation of ammonia and effect of glutamic acid and vitamin C
Tret'va Vses. Knof. Biokhim. Nerv. Sistemy, Akad. Nauk Arm. SSR, Inst. Biokhim., Sb. Dokl., Erevan 1962:271-279

7332 Tarve, U. 1961
Influence of the accumulation of ammonia upon the formation of pyruvic and lactic acids in the brain
Uch. Zap. Tartusk. Gos. Univ. 1961(112):155-159

7333 Tarve, U. 1962
Disturbance of oxidation processes in the brain in experimental ammonia accumulation in the brain
Vopr. Klin. Nevrol. Psikhiat., Tartu 1:252-260

7334 Tasaki, I., and T. Takenaka. 1964
Effects of various K salts and proteases upon excitability of intracellularly perfused squid giant axons
Proc. Nat. Acad. Sci. U.S. 52(3):804-810

7335 Tatum, E. L., and W. H. Peterson. 1935
The effect of asparagine and related compounds on certain butyric acid fermentations
J. Bacteriol. 29:87-88

7336 Tatum, E. L., W. H. Peterson, and E. B. Fred. 1935
Identifizierung von Asparagin als die stimulierende Substanz bei der Bildung von Butylalkohol durch gewisse Bakterien
J. Bact. 29:563-572

7337 Tatum, E.L., H.G. Wood, and W.H. Peterson. 1936
Besondere Wachstumsfaktoren fur Propionsaurebakterien. II. Natur der Neuberg Prazipitatfraktion von Kartoffeln: Ersatz durch Ammoniumsulfat oder bestimmte Aminosauren
J. Bact. 32:167-174

7338 Tauber, Henry. 1954
Free amino acids and glutathione of normal and syphilitic rabbit testes
Proc. Soc. Exp. Biol. Med. 86(4):838-842

7339 Tauber, Henry, and Harold Russell. 1960
Aminoverbindungen in Lipopolysaccharide
J. Biol. Chem. 235:961-964

7340 Tauber, Stuart, and Leonard L. Madison. 1965
Isolierung und charakterisierung von schweinegastrin
J. Biol. Chem. 240:645-650

7341 Taufel, K., and I. Weissflog. 1959
The distribution of glutamic acid in the press and extraction cakes of some oil seeds
Nahrung 3:76-84

7342 Taverna, Giuseppe. 1964
Metabolic processes of acid functions in the tomato. Glutamic acid and aspartic acid
Ann. Fac. Sci. Agr. Univ. Stud. Napoli. Portici 30:495-502

7343 Tawde, Saroj, and H. R. Cama. 1962
Physikochemische untersuchungen an einheinuschen samenproteinen. 7. Mitt. Elektrophoretische charakterisierung und aminosaurenzusammensetzung von black gram (phaseolus mungo)-mehlproteinen und seinen globulinfraktionen
J. Sci. Ind. Res. (New Delhi) Sect. C 21C:212-219

7344 Taylor, D. W. 1952
Resorption durch den Darm von Ratten mit einer blinden, sich selbstfullenden Darmtasche
Nature 170:81

7345 Taylor, E. Shirley. 1947
Assimilation of amino acids by bacteria. III. Concentration of free amino acids in the internal environment of various bacteria and yeasts
J. Gen. Microbiol. 1:86-90

Biochemische wirkungen von sporidesmin
Can. J. Biochem. 43:881-888

8121 Wright, D.E. 1960
The metabolism of carbon dioxide by Streptococcus bovis
J. Gen. Microbiol. 22:713-725

8122 Wright, G. J., and M. K. Horwitt. 1962
Glucose and glutamic acid metabolism in ammonia-treated rats
Fed. Proc. 21(2):369

8123 Wright, L.A., and T.F. Nicholson. 1966
The proximal tubular handling of amino acids and other ninhydrin-positive substances
Can. J. Physiol. Pharm. 44(2):183-193

8124 Wright, R.D., and V. Wynn. 1951
Verdauung von protein im nahrungskanal
Austral. J. Exp. Biol. Med. Sci. 29:281-284

8125 Wu, Chung. 1954
Metabolism of free amino acids in fasted and zein-fed rats
J. Biol. Chem. 207(2):775-786

8126 Wu, Chung, and James F. Hogg. 1952
Die Bildung von Aminosauren und der Stickstoffstoffwechsel in Tetrahymena geleii
J. Biol. Chem. 198:753-764

8127 Wu, Chung, and Jere M. Bauer. 1960
Eine untersuchung der freien aminosauren und der glutaminsynthese bei tumortragenden ratten
Cancer Res. 20:848-857

8128 Wu, Helen L. C., and Merle Mason. 1964
Pyridoxamin-oxalessigsaure-transaminase der rattenniere
J. Biol. Chem. 239:1492-1497

8129 Wu, Jen, Shen-Ho Chen, and Yuan-Chi Su. 1966
Isolation and quantitative determination of the L-glutamic acid in soy sauce by paper electrophoresis
Chung Kuo Wung Yeh Hua Hsueh Hui Chih 4(1-2):1-4

8130 Wulfsson, P. L. 1958
Die stickstoffhaltigen extraktiven stoffe der muskeln wahrend der ontogenese
Biochemie 23:300-306

8131 Wurtman, Richard J. 1968
Daily rhythms in the concentrations of various amino acids in human plasma
N. Engl. J. Med. 279(4):171-175

8132 Wyman, Heather, and James K. Palmer. 1964
Organische sauren in der reifenden bananenfrucht
Plant Physiol. 39:630-633

8133 Wynn, V., and T.N.W. Williams. 1950
Beobachtungen bei der Chromatographie uber stickstoffhaltige Bestandteile von Petrolather-Ather-Extrakten des Plasmas
Nature (London) 165:768-769

8134 Wyschepan, J.D., R.K. Kednewa, and K.I. Iwanowa. 1961
Uber die freien aminosauren bei B. coli bei blockade der eiweissynthese durch chlortetracyclin
Biochemie 26:489-493

8135 Wyschepan, Je. D., K. I. Iwanowa, and R. K. Lednewa. 1961
Bildung und desaminierung von alanin bei B. coli
Biochemie 26:758-763

8136 Xander, Paul A. 1955
Herstellung von eiweisshydrolysaten aus kartoffeln und kartoffelabfallen
D. B. P. 940,983 issued Mar. 29, 1956

8137 Yabe, Yoshiro, Yoshimi Akita, and Kazuo Akita. 1957
Supplement to the studies on glutamic acid metabolism of Bacillus coli communis (Escherichia coli) and its application to the analysis of glutamic acid
Okayama-Igakkai-Zasshi 69:2135-2137

8138 Yabu, Kunihiko. 1967
The (enzymatic) uptake of D-glutamic acid by Mycobacterium avium (isotope study)
Biochim. Biophys. Acta 135(1):181-183

8139 Yabuki, Yuki. 1967
The amino acid contents of foods. The amino acid content of Takuan
Kaseigaku Zasshi 18(4):207-208

8140 Yagi, Yasuo, Tsuneko Tsujimura, and Kimiko Sato. 1957
Studies on the hemoglobin of Anadara inflata (Reeve). II. Terminal amino acid residues
J. Biochem. (Tokyo) 44(1):11-23

8141 Yagishita, Koki. 1957
Untersuchung uber die Pyridomycinbildung. 3. Mitt. Auswahl der Nahrlosung und Entwicklung einer Methode zum Nachweis der Vorstufe
J. Antibiot. (Tokyo), Ser. A 10:5-14

8142 Yakobson, L.M., A.S. Konikova, M.G. Kritsman, and S.S. Melik-Sarkisyan. 1949
Synthesis of amino acids from ammonia and keto acids by various bacteria
Biokhimiya 14:14-19

8143 Yamada, Chisae, and Marian E. Swendseid. 1968
Absorption of amino acid mixtures devoid of leucine from rat intestinal loops
Am. J. Clin. Nutr. 21(10):1194-1196

8144 Yamada, Koichi. 1961
L-Glumatic acid
U. S. Pat. 2,978,383-4 issued Apr. 4, 1961

8145 Yamada, Koichi, Joji Takahashi, and Kaetsu Kobayashi. 1963
Verwertung von kohlenwasserstoffen durch bakterien
Nature (London) 198:1115,1963

8146 Yamada, Koichi, Joji Takahashi, and Kaetsu Kobayashi. 1962
Die ausnutzung von kohlenwasserstoffen durch mikroorganismen
Agric. Biol. Chem. (Tokyo) 26:636

8147 Yamada, Koichi, Joji Takahasi, Kaetsu Kobayashi, and Yukio Imada. 1963
Untersuchungen uber die verwertung von kohlenwasserstoffen durch mikroorganismen. 1. Mitt. Die isolierung von aminosauren
Agric. Biol. Chem. (Tokyo) 27:390-395

8148 Yamada, Masakazu. 1932
Uber die alkoholische garung der aminosauren
Bull. Agric. Chem. Soc. Jap. 8:95-97

8149 Yamada, Masakazu. 1935
Alcoholic fermentation of amino acids. IV. Decomposition of glycocoll
Bull. Agric. Chem. Soc. (Japan) 11:20-21

8150 Yamada, Masakazu, Junichiro Shitara, Hitoshi Yoneama, Hayashi Komoda, Michio Kozaki, and Kiyoshi Yoshizawa. 1962
Alcoholic fermentation of amino acids. XV. Amino acid fermentation by yeasts. 1. A new pathway of fusel oil formation
Tokyo Nogyo Diagaku Nogaku Shuho 7(3):97-102

8151 Yamada, Shuichi. 1965
Effects of ATP and amino acid mixtures on progressive muscular dystrophy
Sapporo Igaku Zasshi 27:284-297

8152 Yamafuji, K., S. Hatano, and A. Ida. 1961
Glutamic acid formation by transoximase-oximase reaction
Nature 189(4762):397-398

8153 Yamagata, Shuzo, Yasuo Kurahashi, Hiroshi Ooka, and Hajime Katayama. 1964
Paper-chromatographic study of amino acids in chick embryo extract
Rept. Lib. Arts Sci. Fac. Shizuoka Univ., Nat. Sci. 3(5):243-247

8154 Yamagishi, Masaharu, and Makoto Yokoo. 1954
Application of azotometry. I. Determination of amino nitrogen
J. Pharm. Soc. Japan 74:278-280

8155 Yamaguchi, Ken, Takeo Suzuki, Kazuo Kimura, Katsunobu Tanaka, and Shukuo Kinoshita. 1969
Studies on the microbial utilization of hydrocarbon: XI. Effects of penicillin on the production of L-glutamic acid
Amino Acid Nucleic Acid 20:57-61

8156 Yamaguchi, M. 1970
Amino acid uptake in the peripheral nerve of the rat
J. Neurobiol. 1:419-433

8157 Yamaguchi, Michiya. 1959
Influence of amino acids upon cholinesterase activity in the brain. I. Influence of amino acids upon cholinesterase activity in cerebral cortex of idiopathic epileptics
Okayama-Igakkai-Zasshi 71:4671-4677

8158 Yamaguchi, Shizuko. 1965
The synergistic action of flavor materials
Shinku Kagaku 13(3):101-105

8159 Yamaguchi, Shizuko. 1967
The synergistic taste effect of monosodium glutamate and disodium 5'-inosinate
J. Food Sci. 32(4):473-487

8160 Yamaguchi, Shizuko, Tomoko Yoshikawa, Shingo Ikeda, and Tsunehiko Ninomiya. 1968
The synergistic taste effect of monosodium glutamate and disodium 5-guanylate
Nippon Nogei Kagaku Kaishi 42(6):378-381

8161 Yamaki, Hiroshi. 1965
Hemmung der Proteinsynthese durch die Steroidantibiotika Fusidsaure, und Helvolinsaure
J. Antibiot. (Tokyo) Ser. A 18:228-232

8162 Yamamoto, Hajime, and Shiro Hisada. 1964
Effect of glutamic acid and related compounds on the carotid blood flow in the rabbit
Igaku To Seibutsugaku 69(4):167-170

8163 Yamamoto, Kakuji, and Hitoshi Aono. 1962
Free amino acids in the aqueous humor, vitreous, and retina
Nippon Ganka Gakkei Zasshi 66(11):1077-1080

8164 Yamamoto, Kakuji, Hitoshi Aono, and Shinsaku Kunimitsu. 1964
GABA (gamma-aminobutyric acid) shunt of TCA (tricarboxylic acid) cycle in the retina
Nippon Ganka Gakkei Zasshi 68(1):48-52

8165 Yamamoto, Kiyoshi, Ichiro Ishikawa, and Shojiro Shimizu. 1960
Der einer transaminierung durch rattenierenmitochondrien zuzuschreibende stoffwechsel von L-thyroxin
Jap. J. Physiol. 10:221-223

8166 Yamamoto, Toshiichi. 1951
Lipase. III. The activation of liver esterase
J. Biochem. (Japan) 38:335-341

8167 Yamamoto, Yasuhisa. 1960
Influence of free amino acids on glucose metabolism in the brain. III. Influences of long-term administration of amino acids on glucose metabolism in the cerebral cortex of rabbits with convulsions
Okayama Igakkai Zasshi 72:1255-1260

8168 Yamamoto, Yasuhisa, Akitane Mori, and Dennosuke Jinnai. 1961
Amino acids in the brain. Alteration of amino acids in rabbit brain caused by repetitive convulsive fits, and a comparison of amino acid contents in epileptic and nonepileptic human brain
J. Biochem. (Tokyo) 49:368-372

8169 Yamamoto, Yasuhisa, Takaaki Iwado, Motoo Kitamura, Kazumasa Uno, and Ryosuke Sugiu. 1963
Amino acids in the brain - analysis of amino acids in various areas of the cerebral cortex
Folia Psychiat. Neurol. Jap. 17(3):299-305

8170 Yamamura, Yasuhiko. 1960
Fate of certain amino acids administered intravenously into rabbits. I. Effect of administration of amino acids upon the blood amino acid nitrogen content
Med. J. Shinshu Univ. 5:1-16

8171 Yamanouchi, Kazunaga. 1959
An amino acid medium for Shigella flexneri in relation to the purification of the entotoxin
Nippon Saikingaku Zasshi 14:1030-1034

8172 Yamasa Shoyu Co., Ltd. 1967
Flavoring composition containing sodium inosinate and monosodium glutamate
U.S. Pat. 3,318,710 issued May 9, 1967

8173 Yamashida, Kahei. 1931
Uber den einfluss der aminosauren auf die harnstoffzersetzung der bakterien
Sei-I-Kwai Med. J. 50:2-5

8174 Yamatodani, Saburo, Atsushi Kakinuma, Masaru Suzuki, and Matazo Abe. 1967
Formation of L-glutamic acid by mixed culture. I. Studies on cultural conditions
Annu. Rep. Takeda Res. Lab. 26:107-116

8175 Yamazaki, N. 1960
Myocardial metabolism (amino acid metabolism)
Japan. Circul. J. (Full edition) 24:228-243

8176 Yammamura, Michio. 1957
Effects of sodium glutamate in the feeble-minded
Hirosaki Med. J. 8(1/2):191-196

8177 Yang, Chang-Jen, Tswen-Rou Chien, and Kwang-Yu Chow. 1963
A new species of Brevibacterium capable of producing alpha-ketoglutaric acid and glutamic acid
Acta Microbiol. Sinica 9(2):118-122

8178 Yang, Fu-yu, and Jin-zhao Li. 1964
Anderungen im respiratorischen Kontrollindex bei bestrahlten Mitochondrien
Sci. Sinica 13:2026-2029

8179 Yankov, S. I. 1962
Comparative studies of the amino acid content of some canned vegetables
Nauch. Tr. Vyssh. Inst. Khranitelna Vkusova Prom. Plovdiv 9:49-53

8180 Yarnell, Gerald R., Patricia A. Nelson, and S. R. Wagle. 1966
Biochemical studies of the developing embryo. I. Metabolism of gluconeogenic precursors
Arch. Biochem. Biophys. 114(3):539-542

8181 Yassin, A.K. 1966
Active transport across biological membranes. III. Active transport of anions
Ann. Coll. Med. Mosul 1(3):158-168

8182 Yasuzumi, G., and G. Miyao. 1950
Aminosaurebausteine von Chromatinfaden der Erythrocytenkerne
Exp. Cell Res. 1:501-504

8183 Yasuzumi, G., and G. Miyao. 1951
Qualitative analysis of the amino acids in isolated chromosomes
Exptl. Cell Res. 2:153-157

8184 Yasuzumi, G., and G. Miyao. 1951
Amino acid constituents of prochromosomes isolated from blood cells of various animals
Science 114:38-39

8185 Yde, A., and M. Irgang. 1948
Glutamic acid treatment of mentally deficient children
Ugesk. Laeger 110:1104

8186 Yee, Robert B., Sylvia F. Pan, and Horace M. Gezon 1958
Stoffwechselstudien bei shigella. 3. Mitt. Hemmung der glutamatoxydation durch aureomycin
J. Bact. 75:56-62

8187 Yee, Robert B., Sylvia F. Pan, and Horace M. Gezon 1958
Studies on the metabolism of Shigella. II. The oxidation of glutamate by Shigella Flexneri
J. Bact. 75(1): 51-55
