Re: Amending Food Saftey Act (21 U.S.C. 301-297)
Where have our sprouts gone?

1-28-00

e-mail: yojamey@hotmail.com

Dear Ms. Michell A. Smith:

We are the parents of 3 young children and just learned why there have been no sprouts at our local farmers market. The EPA issued a "Section 18" for the use of Calcium Hypochlorite (a pesticide microbial) to disinfect seed production. I cherish the availability of Organic Food produced without such chemicals. The sprout producers report there also is an expensive testing requirement for each batch of sprouts that has put he and his wife out of business. We believe there should be choice allowed in the sprouts we can buy. We would welcome a harsh warning rather than chemicals & the expensive testing requirements currently in place

Thank you for your attention and cooperation.
We look forward to your written reply.

Sincerely,

James Wagner
